Title: Support Equal Funding Model for all Member States

Abstract

In consideration of national sovereignty and equal rights of all MSs, all MSs should share equally in support of the estimated 70 Million CFH budget

Introduction

The current funding mechanism depends on a voluntary choice for the level of monetary contribution, or dues, by each MS. SMs also have a voluntary choice on the level of their contributions subject to a minimum level for each Sector.

Reasons of Equal Funding

- This would encourage MS participation and commitment to the workgroup. Countries in each region will play in more active role. The participation and contribution will continue to develop and helping regional growth of telecommunication industry.
- Equal funding allows all MS is having equal right, sharing and utilizing the resources. All MS shall be benefited on the same pool of budget and spending. Further, that would be fairest to all MS having participation in contributing the funding.
- Mandatory for equal funding across all nations allow the collection in more consistent and predictable vs voluntary contribution. As such, in view of administrative, control of budget is in more effective manner.

A fairest system and proper guideline has to be established to audit, monitor, keep track and control the collection of funding.

Conclusion

I would like propose GTO shall impose equal funding of all MS as mandatory so as to operate the organization in more effective manner.
