Cyber Security Infrastructure & Its protection

By Muataz Elsadig

Industrial Control System Are Interconnected

Internet

 2.2 million internet connected devices from 182 manufacturers discovered (Project Shine)

Converged Industrial Network Power olants. Green energy **Commercial buildings** Subdistribution stations. Main feeder stations Shoos and offices. Transformer stations Process industry Residential applications. Industry Green energy

Systems Are Easy to Target

New Industrial Connectivity Brings New Security Risks

- 67 % off critical infrastructure companies suffered an attack in the last year.
- Many Security Incident across all countries
- Varied motivations: spying, theft, disruption of operation

Impact can Be Catastrophic

And they keep coming:

Stuxnet/duqu/flame, watering hole attacks and energetic bears ---!!!!

Ending on a Positive Note

Steps To Securing Critical Infrastructure

Senior management has to be on board

- ✓ Management is in the dark usually and IT can basically do whatever they want
 - Understand Operations
 - Understand Ecosystem
- ✓ They need to make have objective resources are available
- ✓ They need to make sure that people are working together
- They have to make this a priority

To know what you have install

- ✓ you can't secure what you have, unless you know what you have
- Interview the stakeholders
- ✓ Collect data

Steps To Securing Critical Infrastructure

Risk Assessment

- ✓ Leverage third-party assessments
 - Design reviews
 - Device security
- ✓ Fix issues early
 - Improve product security
 - Reduce public breaches and recalls
 - Save money time and headaches

• Proper Policy & Procedure

- Build security into the process
- Train people on what to do ... understanding why the policy is their they need to have this understanding when it come to security
