

Executive Summary

Ultra-broadband: Achieving Connect 2020 Targets through Innovations in ICT

Better and full connectivity is an irreversible trend during the ICT innovation, where Broadband plays the most important role.

Like water, roads, rail, and electricity before it, broadband is of fundamental importance to the social and economic development of all nations. There is strong evidence to suggest positive benefit to broadband in great economic growth through productivity-gains and employment, enhancing the social inclusion and citizen engagement.

Huawei raise the FMC3.0, FBB + MBB + Connectivity + Content + Cloud, as the Innovations for the Diversified Broadband Network, which shall be Ultra-Fast, Simplified and Agile, to enable the better connectivity. We can realize the fully connectivity whenever, wherever, whoever by any media, such as optical fiber, copper, coax, and wttx.

As a global leader in ICT industry, Huawei will continue to devote to the development of broadband, let' s jointly together to build a better connected world.
