

Using ICTs for  
Effective  
Disaster  
Management

**CARIBBEAN  
FORUM 2006**

Sunset Jamaica  
Grande Resort &  
Spa, Ocho Rios,  
Jamaica

Sept. 26 - 28, 2006

# ICTS IN DISASTER MANAGEMENT; FUELLING THE CDM PROCESS

# CDERA MANDATE

- ◆ Main function is to make “immediate and coordinated response” to disasters in Participating States (PS)
- ◆ To mobilize and coordinate disaster relief from governmental and non-governmental organizations for affected PS
- ◆ To promote the establishment, enhancement and maintenance of disaster response capabilities among PS.

# MAIN ACTIVITIES

- ◆ **Manage Transition to CDM**
- ◆ **Information Sharing and Management**
- ◆ **Managing Regional Response Mechanism**
- ◆ **Mitigation of Disaster Impacts**
- ◆ **Programme/Project design and implementation**

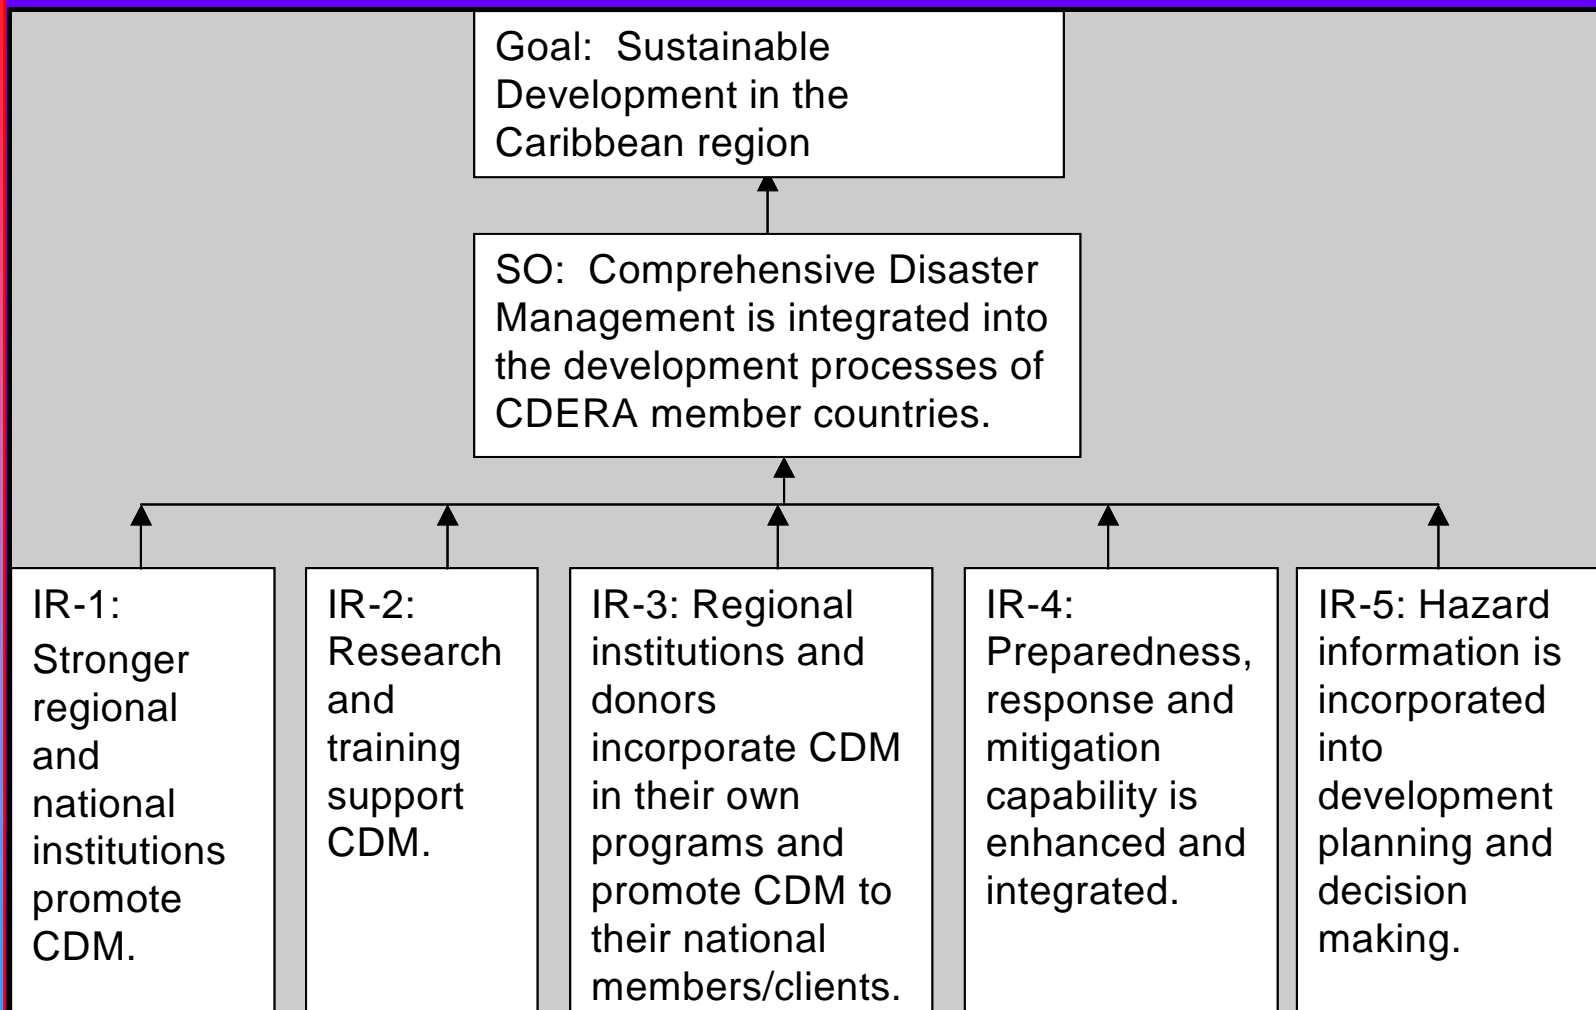

# CARIBBEAN CDM STRATEGY

Using ICTs for  
Effective  
Disaster  
Management

CARIBBEAN  
FORUM 2006

Sunset Jamaica  
Grande Resort &  
Spa, Ocho Rios,  
Jamaica

Sept. 26 - 28, 2006

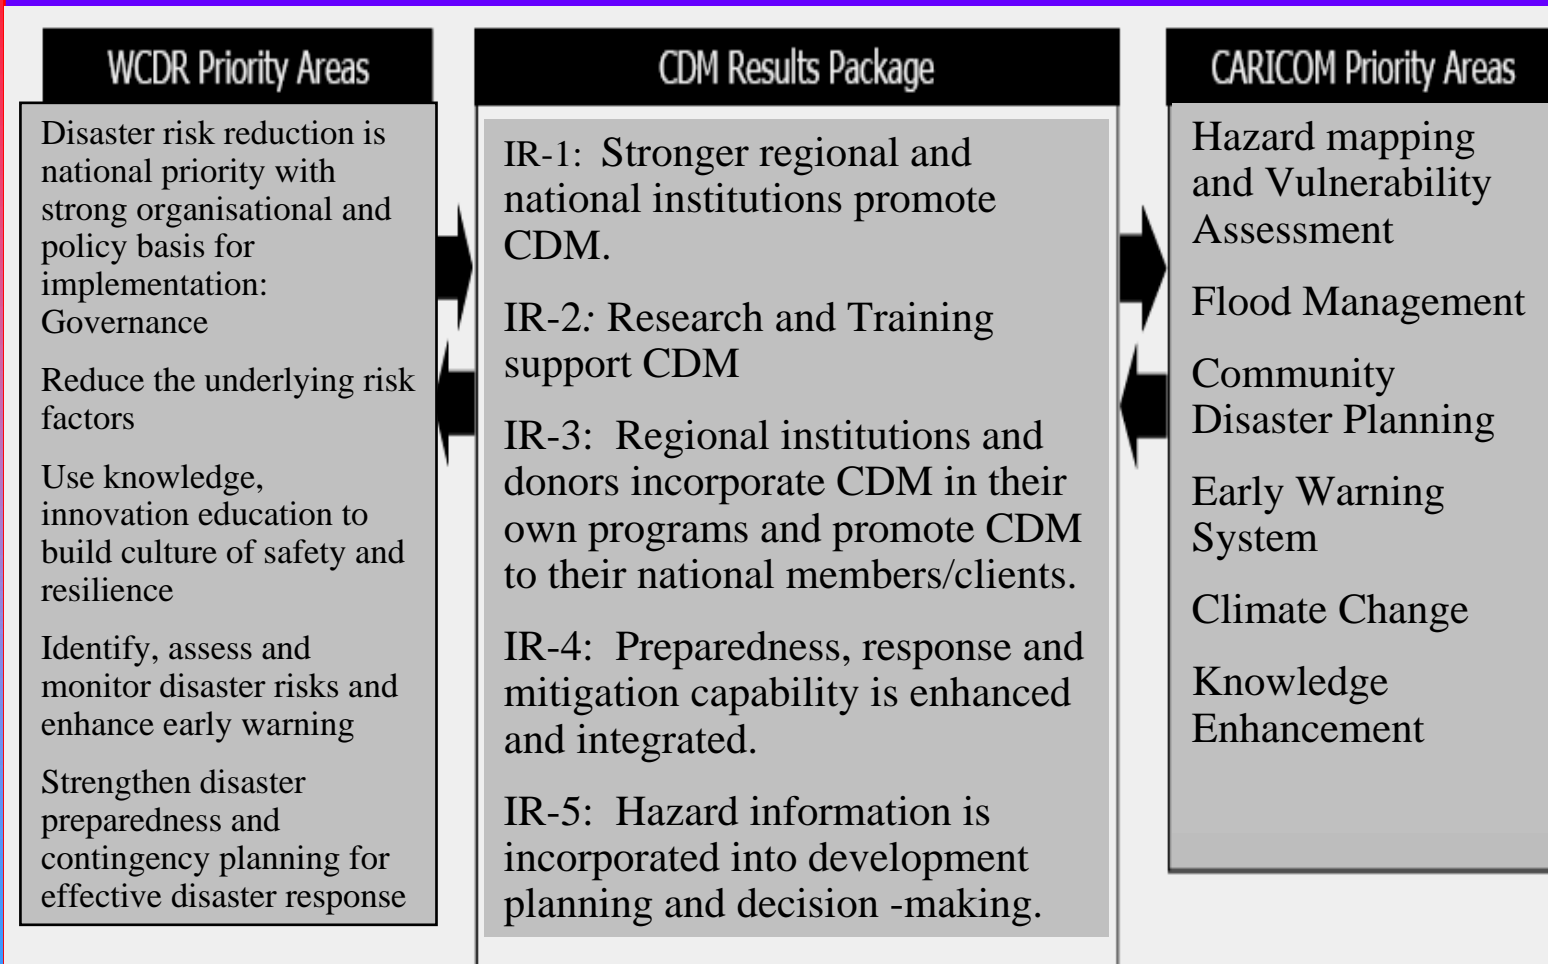

# DISASTER MANAGEMENT AND THE CARICOM REGIONAL PROGRAMMING FRAMEWORK

**Using ICTs for  
Effective  
Disaster  
Management**

**CARIBBEAN  
FORUM 2006**

Sunset Jamaica  
Grande Resort &  
Spa, Ocho Rios,  
Jamaica

Sept. 26 - 28, 2006

# KEY DIMENSIONS OF DISASTER MANAGEMENT WHERE THE USE OF ICTs IS MAKING A DIFFERENCE

## Using ICTs for Effective Disaster Management

**CARIBBEAN  
FORUM 2006**

Sunset Jamaica  
Grande Resort &  
Spa, Ocho Rios,  
Jamaica

Sept. 26 - 28, 2006

- ◆ ICT for development, poverty reduction, disaster recovery and initiatives to enhance human development
- ◆ Capabilities of meteorological services in the region and the use of information technology in advancing these services.
- ◆ Incorporating technology into disaster preparedness and management operations: Mechanisms for the practical application of scientific and technical solutions.
- ◆ Communications for decision making in disaster management and
- ◆ The transport dimension: a maritime/aviation safety system

# CDERA's INFORMATION POLICY

Using ICTs for  
Effective  
Disaster  
Management

CARIBBEAN  
FORUM 2006

Sunset Jamaica  
Grande Resort &  
Spa, Ocho Rios,  
Jamaica

Sept. 26 - 28, 2006

- ◆ Enhance CDERA's visibility as a leader in the promotion of disaster management.
- ◆ Promote acceptance and ownership of Comprehensive Disaster Management.
- ◆ Enhance the Coordinating Unit's capacity to access, collate, analyze and disseminate information on all aspects of disaster management.
- ◆ Support the institutionalization of disaster management teaching and research in regional universities

# HOW ICTs SUPPORT DISASTER MANAGEMENT

## Using ICTs for Effective Disaster Management

**CARIBBEAN  
FORUM 2006**

Sunset Jamaica  
Grande Resort &  
Spa, Ocho Rios,  
Jamaica

Sept. 26 - 28, 2006

- ◆ Developing and maintaining a pool of persons skilled in IT in Disaster Management for the Caribbean;
- ◆ Integrating and aligning IT use with management processes;
- ◆ Changing management orientation towards decision-making and increasing the use of ICT to provide information; and
- ◆ Focussing on ICT applications that most directly support the objectives of CDM and ensuring that the technologies used are suitable

# INITIATIVES BEING USED TO IMPLEMENT INFORMATION POLICY

Using ICTs for  
Effective  
Disaster  
Management

**CARIBBEAN  
FORUM 2006**

Sunset Jamaica  
Grande Resort &  
Spa, Ocho Rios,  
Jamaica

Sept. 26 - 28, 2006

- ◆ CDERA Work Programme being implemented by Projects
  - ◆ Needs informed by Biennial Audit and Country Consultations
    - CADM – JICA
    - CHAMP – CIDA
    - UNSAR – UNTFHS/Japan
    - **Information Management – EU**
    - **TEWS – USAID/OFDA**
    - **Regional Public Goods – IDB**
    - CDM Review - CIDA
- } Pipeline Projects

# Initiatives Cont'd

Using ICTs for  
Effective  
Disaster  
Management

**CARIBBEAN  
FORUM 2006**

Sunset Jamaica  
Grande Resort &  
Spa, Ocho Rios,  
Jamaica

Sept. 26 - 28, 2006

- ◆ Regional Emergency Communications Plan
- ◆ Suite of Web based services
- ◆ E-Alert Messaging System
- ◆ Regional Coordination Centre

# THE IMPORTANCE OF ICTS IN DISASTER MANAGEMENT

Using ICTs for  
Effective  
Disaster  
Management

CARIBBEAN  
FORUM 2006

Sunset Jamaica  
Grande Resort &  
Spa, Ocho Rios,  
Jamaica

Sept. 26 - 28, 2006

- ◆ To catalyze the process of preparedness, response and mitigation.
- ◆ Providing access to vital information during all phases of the disaster cycle to citizens.
- ◆ Decision support systems for planning and policy making.
- ◆ To build a network of disaster management practitioners and people through communication networks.

# INFORMATION SYSTEMS FRAMEWORK FOR DISASTER MANAGEMENT

Disaster Management integrated into Development Planning

Facilitating

elements

## Planning & Policy decision for disaster preparedness & mitigation

- 1 Hazard mapping & Vulnerability Assessment
- 2 Database of disaster history for trend & pattern analysis
- 3 Database of disaster management plan.
- 4 Awareness & training materials
- 5 Inventory of legal, administrative and institutional framework

## Quick emergency response & recovery

- 1 Human & material response resources database
- 2 Database of Infrastructure, lifelines & critical facilities.
- 3 Database of trained human resources.
- 4 Demographic information
- 5 GIS based information system

Knowledge base for disaster management

# Role of Disaster Information Systems in Various Phases of Disaster Management

## ◆ Risk & vulnerability identification

- A database of past disasters effects to determine the risks in particular geographic location.
- Zoning of hazards using GIS.
- Validating the disaster history database with hazard maps and other external data for accuracy in risk assessment.

## ◆ Mitigation strategies and policies

- Mitigation strategies, policies and legislation based on statistical facts & figures from various databases.
- Development of a virtual knowledge net for creation of a network of institutions, developmental organizations and Government dept. for information sharing and preserving the research efforts

## ◆ Preparedness for response & recovery

- Database of existing skilled human & material resources for emergency response.
- Database on human resources trained on various aspects of disaster management.
- Develop preparedness plans based on risk, available skill & resources.
- Converting Disaster Management plans into electronic documents for easy accessibility and easy updating.

# ICT Tools

- Monitoring Systems

- Satellite imagery

Mitch 1998

Using ICTs for  
Effective  
Disaster  
Management

CARIBBEAN  
FORUM 2006

Sunset Jamaica  
Grande Resort &  
Spa, Ocho Rios,  
Jamaica

Sept. 26 - 28, 2006

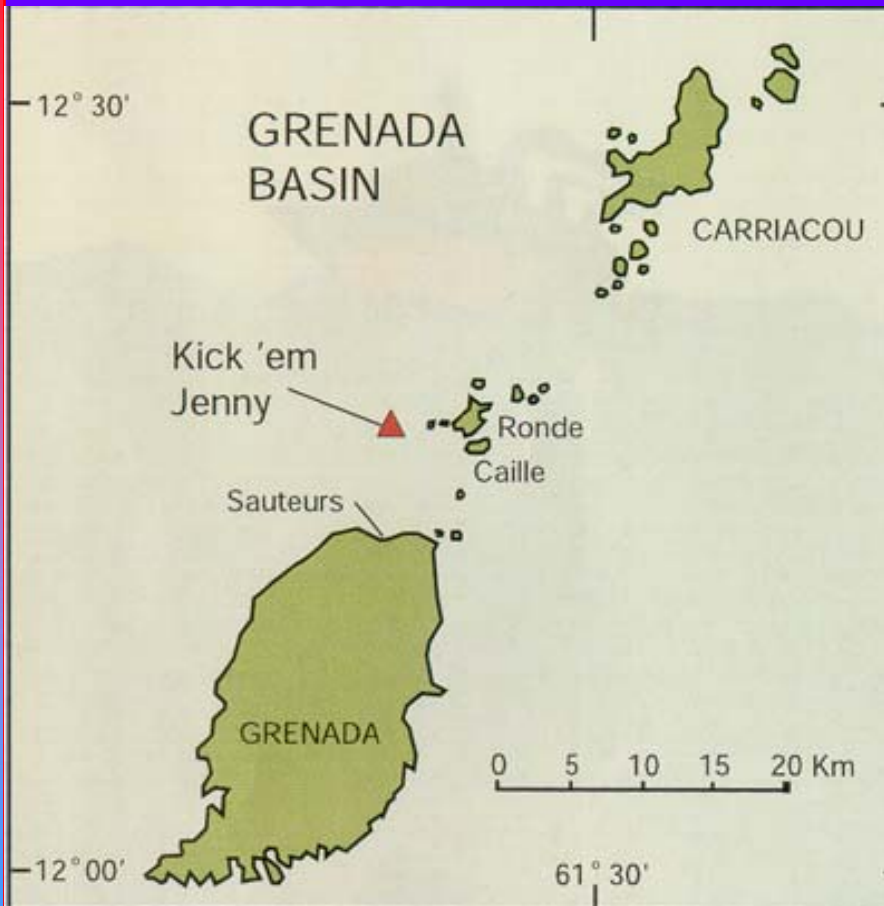

# ICT Tools

Using ICTs for  
Effective  
Disaster  
Management

CARIBBEAN  
FORUM 2006

Sunset Jamaica  
Grande Resort &  
Spa, Ocho Rios,  
Jamaica

Sept. 26 - 28, 2006

- Early Warning Systems

# ICT Tools

## ◆ Modeling

- Climate Change & sea-level rise
- Storm surge

## ◆ Geographical Information Systems (GIS)

# GIS Applications

## ◆ Planning/Prevention

- hazard mapping
- identification of critical resources or infrastructure at risk
- development planning
- Decision-making: What are **acceptable** levels of risk?

Using ICTs for  
Effective  
Disaster  
Management

CARIBBEAN  
FORUM 2006

Sunset Jamaica  
Grande Resort &  
Spa, Ocho Rios,  
Jamaica

Sept. 26 - 28, 2006

# GIS Applications

- ◆ **Mitigation - identification of needs**
- ◆ **Preparedness**
  - resource allocation - evacuation routing, shelter allocation ...
- ◆ **Response**
  - Emergency services dispatch and routing
  - Search and Rescue
- ◆ **Recovery/rebuilding - damage assessment**

# **Benefits of ICT's to Disaster Management**

- **Enhanced communication - E-mail, fax**
- **Public awareness and education - internet web-site, information databases**
- **Maximize use of limited resources**
- **Informed decision-making**
- **Cost savings - lives, infrastructure, time**

# SOME CONSTRAINTS

- ◆ Data/Information are available, but...
  - Hard to find and from multiple sources
  - Multiple formats
  - Difficult to integrate
- ◆ Tools are available, but...
  - Hard to find and from multiple sources
  - Multiple formats
  - Difficult to ingest data

# THE CHALLENGES

- ◆ Disparate “systems” and “information sources” need to be integrated
- ◆ Challenging to use and interpret
- ◆ Collaboration and coordination can be challenging particularly in a time of crisis - information needs to be shared among agencies (local/regional, planning, etc)

# CHALLENGES Cont'd

- ◆ IT infrastructure / Platforms are inconsistent - solution needs to accommodate all levels of capability.
- ◆ Policies and procedures at different levels of government and internationally are (necessarily) different - Some may not be in place to enable information sharing and full utilization of ICTs.

# ISSUES FOR CONSIDERATION

Using ICTs for  
Effective  
Disaster  
Management

CARIBBEAN  
FORUM 2006

Sunset Jamaica  
Grande Resort &  
Spa, Ocho Rios,  
Jamaica

Sept. 26 - 28, 2006

- ◆ **Compatibility Issues**
  - Data Format, Measurement Units, ...
  - Different Vendor Products, Versioning, ...
  - Ethernet, Token Ring, ...
- ◆ **Organizational**
  - Sensitive Data Definition Varies
  - Security Issues / Accessing Shared Data
  - Capacity Differs From Country to Country
  - Bandwidth Cost is High
  - Systems, Data, Models Expertise Limited

# Way forward for Governments??

Using ICTs for  
Effective  
Disaster  
Management

CARIBBEAN  
FORUM 2006

Sunset Jamaica  
Grande Resort &  
Spa, Ocho Rios,  
Jamaica

Sept. 26 - 28, 2006

- **Commitment to the use of ICTs**
- **Support for initiatives related to use of ICT's**
- **Building capacity in relevant Government departments including National Disaster Offices**

# INTEGRATED DECISION MAKING TO ACHIEVE DISASTER RESK REDUCTION

**Using ICTs for  
Effective  
Disaster  
Management**

**CARIBBEAN  
FORUM 2006**

Sunset Jamaica  
Grande Resort &  
Spa, Ocho Rios,  
Jamaica

Sept. 26 - 28, 2006

**The direction in which the  
disaster management  
community is going that will  
leverage technological  
advances and lead to  
sustainable development**

# Disaster Management Directions
