Critical Infrastructure Components

Integrating the Critical Infrastructure

What's Done Elsewhere?

- **United Kingdom**
 - Formal definition of Critical National Infrastructure
 - Responsibility falls under the remit of the Cabinet Office
 - Companies are under legal directive from the Government
 - Business Continuity mandated under regulations and monitored by various regulatory authorities, eg FSA, DTI, OFTEL, etc
 - C&W chaired and ran the Government Emergency Planning Exercise in January '06
 - C&W represent the UK Government on the NATO Telecommunications Emergency Planning Forum
- **Channel Islands**
 - Guernsey have a dedicated Emergency Planning Officer responsible for pre-planning & maintaining multi-agency arrangements
 - C&W provide the Comms infrastructure & expertise
- **Australia have just added Water as the 4th sector to be assessed under their Critical Infrastructure Protection Modeling and Analysis (CIPMA) program**
 - Sectors already assessed are Banking and Finance, Power and Communications

The Importance of Language
