

**Martin Koyabe** is the manager and head of Technical Support and Consultancy division at the Commonwealth Telecommunication Organisation (CTO). He has extensive experience working in the telecoms sector and academia on ICT research and development mainly in Europe, Asia Pacific, Caribbean and Africa. He has over 20 years experience in ICT innovation, research & development, and in particular expertise in Network Information Security, Cybersecurity, tackling Cyber crime and Critical National Infrastructure Protection. Before joining the CTO in 2014, he was a Technical lead/Senior Researcher with British Telecommunications (BT), based at Adastral Park, UK for over 10 years. While at BT, he worked on various major projects including BT 21<sup>st</sup> Century Next Generation Network and developing ICT security solutions for BT's lines of business. He is a technical expert and reviewer for the European Commission (EC), International Telecommunications Union (ITU), United Nations (UN) and the WorldBank.

Martin has lead work on various Cybersecurity projects and delivered several strategic planning and capacity building workshops. Notably on Cybergovernance, Cybersecurity strategy development and Critical Information Infrastructure Protection (CIIP) workshops across both Commonwealth and non-Commonwealth countries. As the technical lead for the CTO, the organisation has assisted a number of countries develop their National Cybersecurity Strategies including Botswana, Cameroon, Uganda, Fiji, Mozambique, Tanzania, Malawi, Senegal, Swaziland and Bermuda.

Martin has an executive education in Service & Managing Innovation from Judge Business School, University of Cambridge, UK and a PhD in Communications Engineering from Aberdeen University, UK.
