

# Microsoft's Approach to IoT

## Digital Transformation and The Internet of Things

Marc Israel – [misrael@microsoft.com](mailto:misrael@microsoft.com)

*Chief Technology Officer*

*Microsoft West, East & Central Africa and Indian Ocean Islands*

The Internet of Things isn't a  
technology revolution...

...IoT is a business revolution,  
enabled by technology

# Defining Internet of Things

Connect  
Things

30B

connected devices by 2020

Control  
Anything

\$1.5M

average increase in operating  
income for digitally  
transformed enterprises

Gain  
Insights

10%

of the data on earth will come  
from IoT by 2020

Take  
Action

\$10B

market for business process  
automation tools by 2020

# The Internet of Things is taking hold

According to a recent IoT survey...

**73%**

Of the companies surveyed are currently active in IoT

**60%**

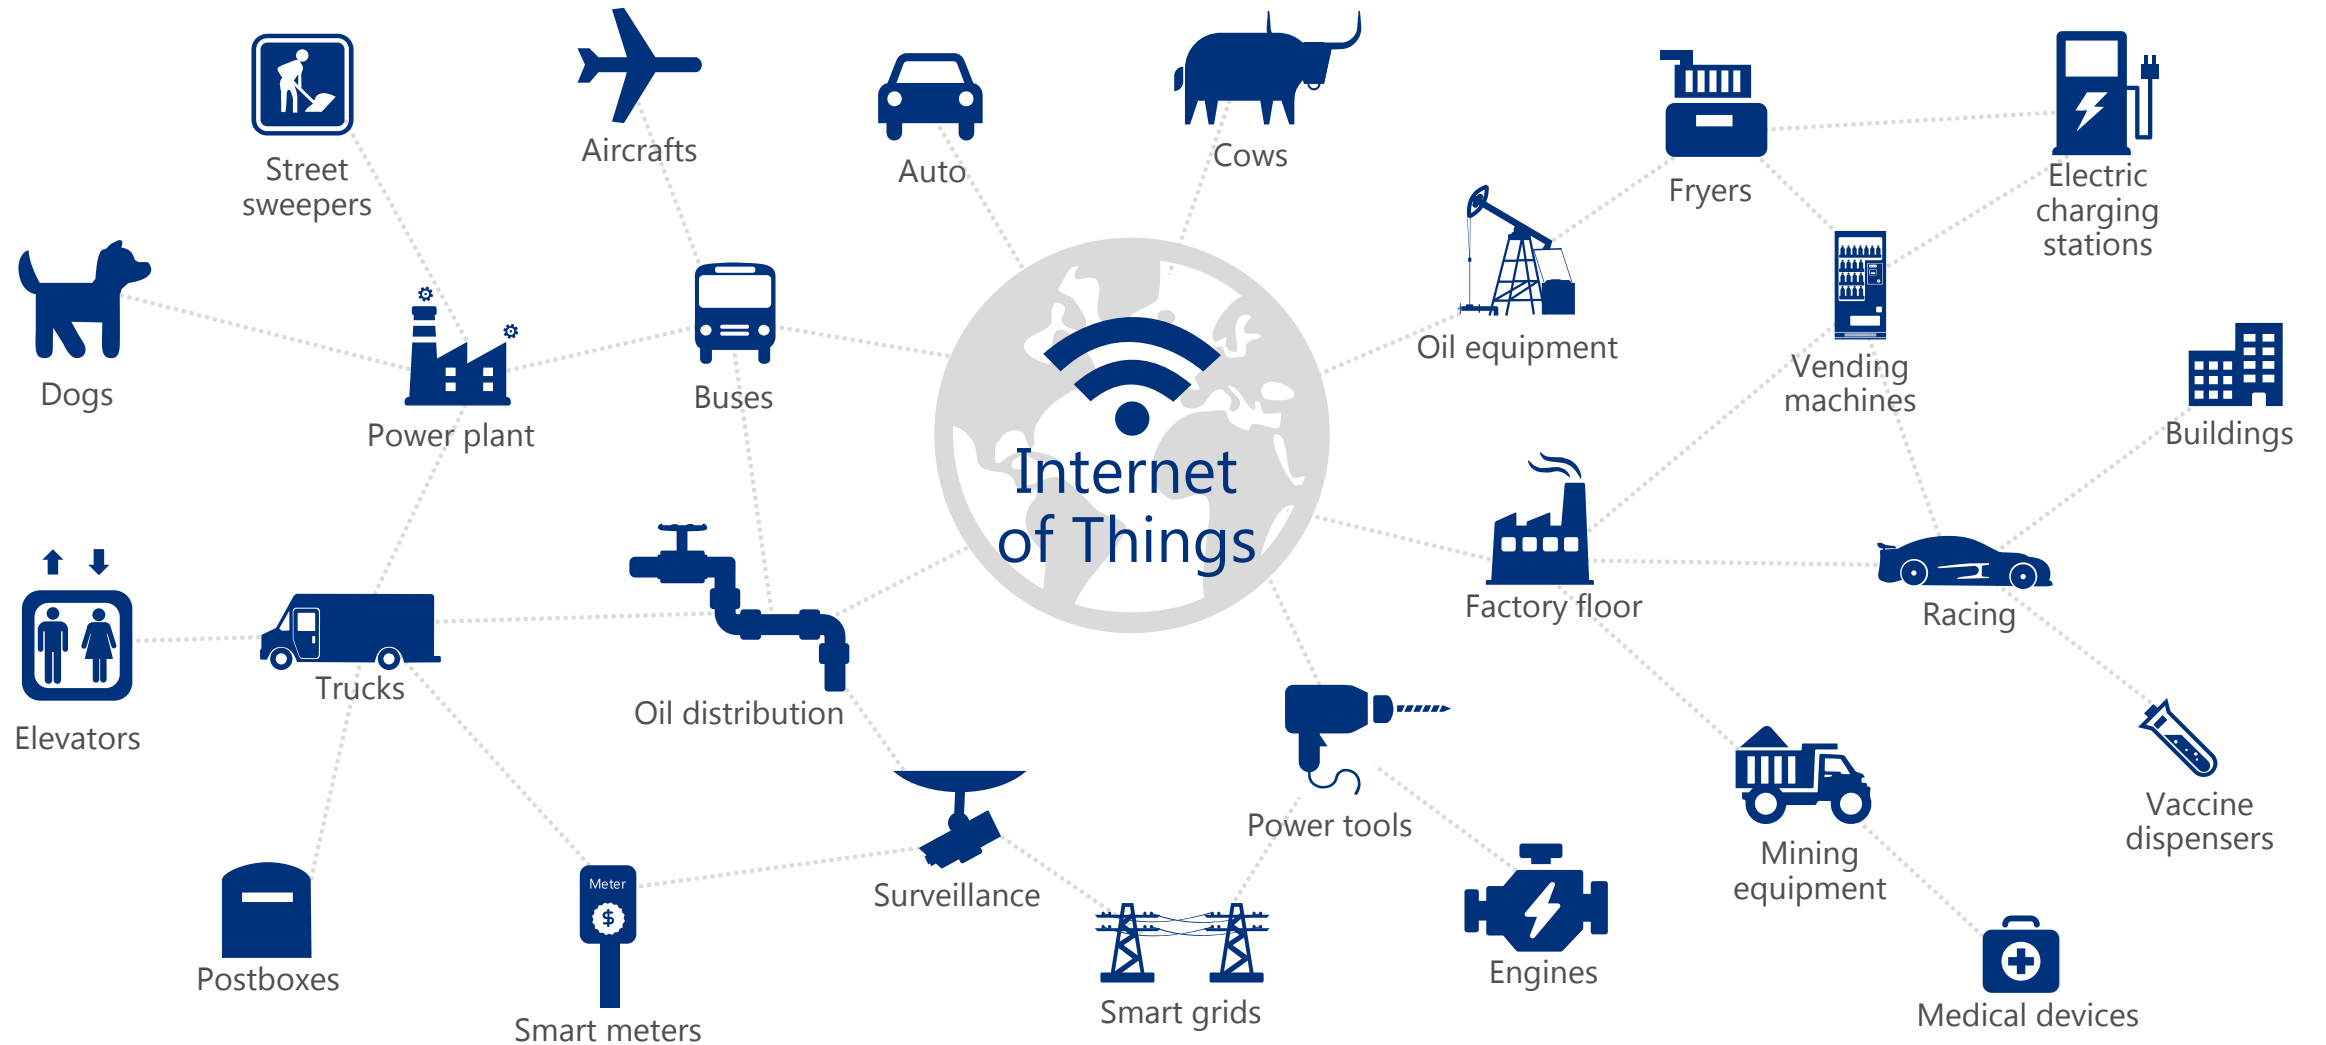

Of those working on IoT are aiming to grow revenue and profits

**50%**

Reduction in downtime with predictive maintenance

# Innovation at work – real world IoT use cases

# IoT is already delivering tangible results

Chillers now run **9x faster** than unconnected equipment, avoiding more than **\$300,000** in hourly downtime costs

Gathers data from sensors and systems to create valuable business intelligence and **reduce downtime by 50%**

Cutting fuel usage by 1% could save **\$250,000 per plane per year**

Improves **access** to production and supply chain **data** worldwide, reducing downtime costs by as much as **\$300,000 per day**

IoT in your industry

# Manufacturing (1 of 2)

**Rockwell  
Automation**

## Moving from action to insights

Reduced development time and cost by 80% by gathering and analyzing data more efficiently and increasing automation across the company.

Demo

# Manufacturing (2 of 2)

## Transforming the urban landscape

Gathered data from sensors and systems to create valuable business intelligence and shift from reactive to proactive maintenance.

[Click](#) to learn more

## Empowering global operations

Collected data from 40,000 sensors around the world to create a best-in-class forecast that helps customers make critical operational decisions.

# Banking

## A growing bank's new approach

Leveraged company wide data to predict how likely customers are to go to other financial institution and drive better product features.

[Click](#) to learn more

## Fast, friendly, and reliable banking

Developed a complete business intelligence suite to track company data in under a week in order to drive up engagement and accounts holder satisfaction.

Connect  
your things

Turn data  
into insights

# Capitalizing on IoT

Transform your  
business

# Connect your things

## Objective

Increase efficiency by reducing costs and eliminating bottlenecks

## Organizational readiness

This is a great place to start if you have:

- An identified business process you want to gain visibility into
- An understanding of the kind of data you need in order to support your business objective
- Devices capable of providing the type of data required

# Turn data into insights

## Objective

Drive innovation and increase revenue using your existing assets

## Organizational readiness

This is a great place to start if you have :

- The ability to interpret incoming data from devices
- An understanding of the impacted business groups and processes
- A plan for using data to drive business process improvements

# Transform your business

## Objective

Create new lines of business and new business models

## Organizational readiness

This is a great place to start if you have :

- A strong baseline of historical device data (e.g. usage trends, repair records)
- Visibility into real-time operational status
- Predictive capability from advanced analytics
- Stakeholder commitment to support change efforts

Enabling IoT solutions in your  
business with Microsoft

# IoT projects are complex

Difficult to maintain cohesive security

Time-consuming to stand up

Incompatible with current infrastructure

Hard to scale

# Azure IoT Suite

Device Connectivity & Management

Data Ingestion and Command & Control

Stream Processing & Predictive Analytics

Workflow Automation and Integration

Dashboards and Visualization

Preconfigured Solutions

Remote Monitoring

Predictive Maintenance

# Gain defense in depth with Azure IoT Suite security

Securely connect millions of devices ...

## Device Security

Device Provisioning and Authorization

Over a secure internet connection ...

## Connection Security

X.509/TLS-Based Handshake and Encryption

To Microsoft Azure – built with security from the ground up

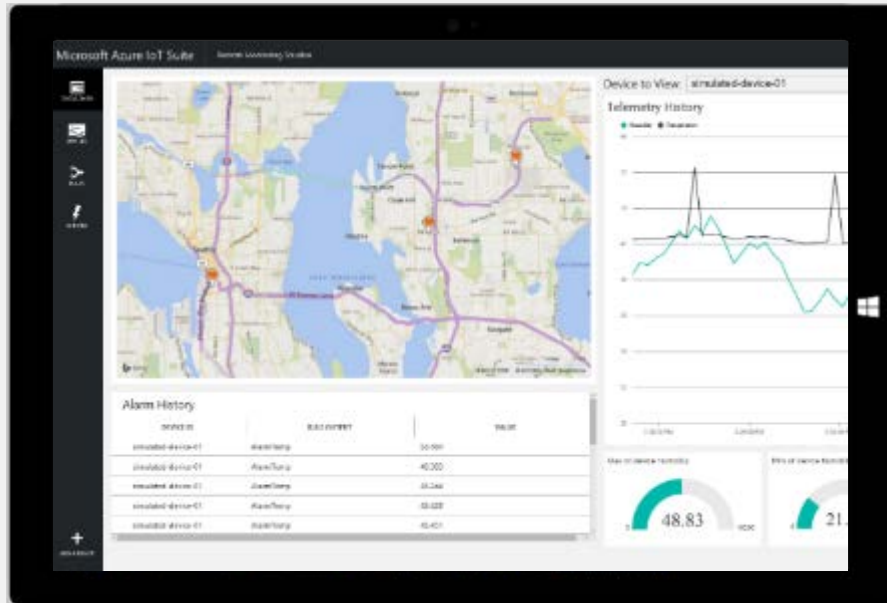

## Cloud Security

Azure Security Center  
Azure Active Directory  
Key Vault  
Policy-Based Access Control

# Accelerate time to value

Start quickly for  
common IoT scenarios

- Get started in minutes
- Modify existing rules and alerts
- Add your devices and begin tailor to your needs

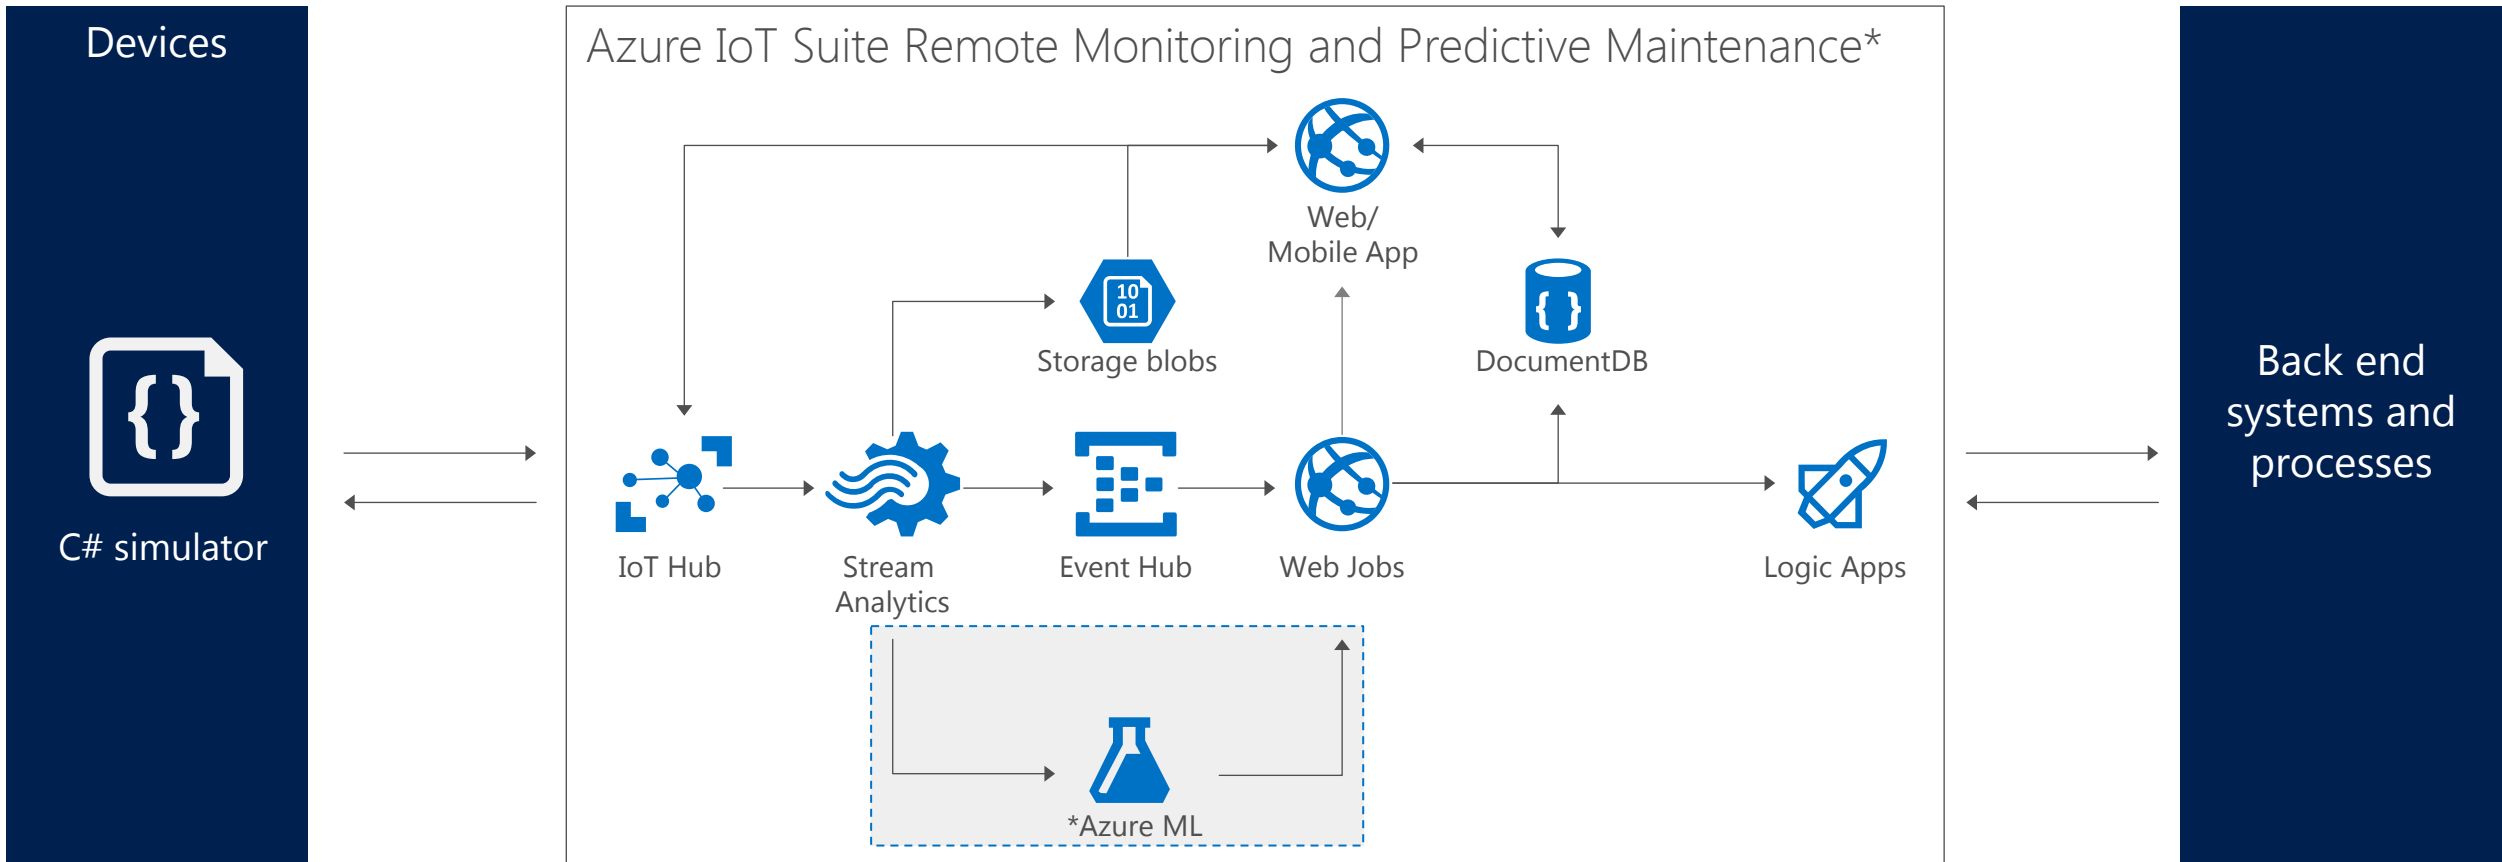

Finish with your Internet of  
Things application

- Fine-tuned to specific assets and processes
- Highly visual for your real-time operational data
- Integrate with back-end systems

# What you get with a preconfigured solution

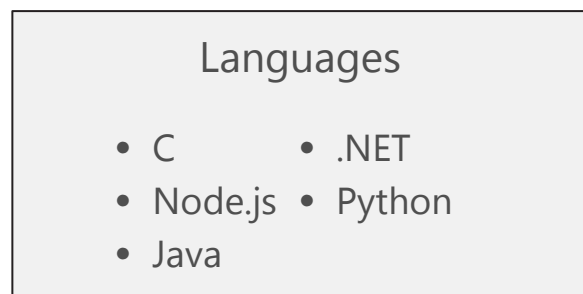

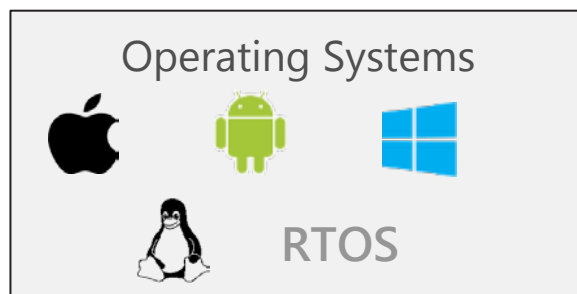

\*Machine Learning is available with Predictive Maintenance

# Obtain flexibility with an open approach

## Work with any device

## Using...

## Work with business processes

## Using...

# Benefit from a hyper-scale footprint
