PRESENTED BY: ANNIE BALDEO

13<sup>TH</sup> JUNE, 2016

## **COUNTRY DIGITAL PROFILE**

# The National free Wi-Fi Initiative

Telecommunications Act-Section 28 mandates the provision of Universal Service:

The Authority shall determine the public telecommunications services in respect of which the requirement of universal service shall apply.

Universal Service Framework for Trinidad and Tobago

#### &

Telecommunications (Universal Service ) Regulations Approved

Basic Services Include: - affordable fixed and

mobile voice services;

affordable broadband
Internet services

access to directory assistance;

- free 24-hour access to emergency call service

- free itemised billing upon request

National Free Wifi Initiative

Government of Trinidad and Tobago (GoRTT) initiative to deploy an nationwide public WiFi broadband network:

- Platform for enhanced productivity.

- Increase uptake of ICTs and citizen engagement.

- Improve Universal access.

- Will not compete with broadband Internet access subscription services currently provided by ISPs, but rather to augment WiFi service, particularly in areas currently not served

### Free Public Wi-Fi Initiative- Scope & Technical Requirements

Phase 1: Outfitting 13 PTSC Buses (Led by iGovTT)

#### Phase 2:

Creating hotspots at select transport hubs, including Water Taxi and Water Ferry terminals/docking areas;

hospital waiting rooms, health centres;

public libraries

### Phase 3:

FREE WIFI Creating Hotspots at other selected locations

### Technical requirements:

- The user's landing page would be to a webpage defined by the government/TATT.
- The user's session for free access shall be no less than 2 one-hour sessions/day from any access point.
- Best effort throughputs to the public should be provided with user access speeds up to maximum of 2 Mbps download speed.
- The Wifi Hotspot should meet the consumer quality of service requirement as specified in the Authority's guidelines and regulations.
