2015 Costa Rica

- On site and participation with simultaneous translation English Spanish
- Remote participation with two audio channels English and Spanish and video streaming
- Social and networking activities
- High involvement of all stakeholders including governments

Student testimonials

"Excellent initiative. The SSIG must be maintained, to follow up on the issues and finally, what is important, you land them countries, as discussed, governance begins at home !! Must be an axis, to provide information, events, scholarships, seminars, not only in one direction but in many directions involving all"
Nancy Quirós, ISOC Costa Rica.

"Unbelievable. I have returned to my country, from which I consider one of the best academic activities that embarks the new digital environment. Not only about cybersecurity, but also in legal and technical aspects. In other words, a complete and recommendable program for any professional related with technologies or other areas dedicated to the care of society "
David Santibáñez, Perú.

"It was very useful because the program gave us a clear sense about the Governance of the Internet today, the activities integrate all aspects that must be taken into account".
Héctor Lizarraga, Honduras.

"I do not think there is a similar opportunity in the world, from a Southern perspective, neither to meet people involved in IG, nor in exchanging experiences with them. It could not be more useful"
Claudio Lucena, Universidad Estadual de Paraíba, Brasil.
