

Proposal for Regional Digital Inclusion Week

Name of Organization:	Ministry of Communications and Information Technology of Egypt
Event Title:	AI for Everyone: Applying AI in developmental sectors to benefit the underserved
Event Description:	The use of Artificial intelligence technologies has found its way to almost all aspects of our lives, yet the contribution of different parts of the world to the creation, use, and consequently, benefits extracted out of AI continues to see significant disparities, therefore threatening to increase the developmental gap even more. The discussion will include experts in education, investment, development, among other sectors, to debate this issue then open the floor to questions and contributions from the audience. The session will wrap up with some concrete ideas to be considered by policymakers and organizations throughout the Arab world to help address this issue.
