SOCIAL MEDIA, ICT GOVERNANCE AND PUBLIC POLICY

An Initial Study on Social Media Policy & Practice in ASEAN

I. Context & Rationale

II. General Objectives:

- to survey the existing policy and practice within the ASEAN on social media utilization in government, and analyze the various issues and challenges being faced;
- evolve a possible policy framework in social media utilization by public administrations, informed by international good practice

III. Initial Research Questions

IV. Research/Data Gathering Methods

RESEARCH QUESTIONS (1)

■ What is the current status of social media adoption and use in ASEAN countries?

- What are the most utilized platforms, channels, and applications?
- What is the profile of social media use/user/usage?

■ What is the current status of social media utilization in governments/public administrations, especially in ASEAN countries?

What are the preferred use cases of social media in government in ASEAN countries, if any?

■ What are the main governance objectives in specific use cases? (*e.g., efficient delivery of public services, transparency and accountability, citizen's engagement, people's participation, etc.*)

RESEARCH QUESTIONS (2)

- What current policy frameworks exist, if any, in the utilization of social media within governments, especially in ASEAN countries?
 - Are current use cases mandated/driven/enabled by a formal national policy, i.e., national legislation, executive order, national plan?
 - Are they simply initiatives from specific ministries/departments/units?
 - Are there specific guidelines that exist either in national or local administrations that govern the use of social media within government units?
- How are any of these policy instruments on social media utilization related to existing internet/ICT-related policies and regulations?
 - *telecom policy/regulation,*
 - *broadcasting policy/regulation,*
 - *cloud computing policy,*
 - *data protection policy,*
 - *cybercrime policy*

RESEARCH QUESTIONS (3)

- What institutional arrangements govern the use of social media in government?
 - Is there a special unit that governs government social media utilization, or is the function spread over different government units?
 - Are there existing or special regulatory/oversight functions, and where do they reside?
- What issues and challenges in the utilization of social media have been identified by administrations either before they utilize social media, or in their initial use, if any? *How would these issues and challenges be classified, e.g., technical, capacity, legal/regulatory, (cyber)security?*
- What have been (or what are being contemplated as) the costs & benefits of the use of social media in government? What are the positive and negative impacts envisioned/experienced?
- What policy/regulatory frameworks and guidelines could be considered by public administrations in the utilization of social media?

Icelanders 'like' their crowdsourced constitution

A year after Iceland asked its citizens to help write its new constitution by making suggestions via Facebook, voters decide this new draft should be the basis for the upcoming constitution.

by [Dara Kerr](#) | October 22, 2012 9:04 PM PDT

Follow

Iceland's government tried a social networking experiment a year ago.

In the wake of a crushing recession and raging protests, the government decided to rewrite its constitution and [asked its citizens for help](#). Rather than requesting petitions, letters, or phone calls, the government asked people to help draft the new constitution through Facebook, Twitter, YouTube, and Flickr.

Over the course of the year, Iceland's citizens offered roughly 3,600 comments and 370

Finland is about to start using crowdsourcing to create new laws

BY David Meyer

3 Comments    +1 

The Finnish government has approved the technology behind a new 'Open Ministry' platform, which will act as a hub for citizens who want new laws voted on in the country's parliament. But could that work elsewhere?

WHAT ARE THE FINNS UP TO?

This week Democracy One Day is discussing e-participation in Finland. I'm interviewing Joonas Pekkanen – founder and president of the Open Ministry (Avoin ministeriö) and a Member of the Board at Open Knowledge Finland (which was recently accepted into the international Open Knowledge network as a local partner). Joonas is also one of the organizers of the Open Knowledge Festival which has seen [some wonderful contributions](#) to the discussion of e-participation and open data

E-petitions and open data

Throughout last year I've heard a lot about Finland in the context of open data and e-petitions to parliament. Would you say that those two are the most interesting democratic innovations in your country?

CROWDSOURCING ACT OF 2012

TRANSPARENCY

All pending bills and committee reports must be made available online within three days after it is filed. A public invitation to committee hearings must also be published online three days before its scheduled date.

PEOPLE PARTICIPATION

This act seeks to establish official online mechanisms that will enable and empower every Filipino citizen to participate in the legislative process. We believe participative governance goes beyond physical borders.

ACCOUNTABILITY

By giving the public online access to the entire lawmaking process, each of the senators and members of the House are now fully accountable to the people when they vote for or against any piece of legislation.

This bill is not perfect: YOU can help improve it.

Let's work together to ensure that we craft the best possible version of this law. You may read and download the entire bill at <http://bit.ly/crowdsourcingact>. For your comments, suggestions and position papers, you may e-mail us at TGcrowdsource@gmail.com, with the subject: Crowdsourcing Act of 2012. You may also tweet us @TGguingona and use the hashtag #CrowdsourcingAct, or leave a comment on our Facebook page: www.facebook.com/TGguingona. It's time for Democracy 2.0!

INDONESIA: SOCIAL MEDIA USE

Indonesia is **#3** Twitter country in the world

More tweets come from **Jakarta** than
from Tokyo, London **and** New York!

Top 20 cities by number of posted tweets

(among 10.6B public tweets posted in June 2012)

Share of public tweets geolocalized at the city level

Source: Semiocast (Jul 2012)

Indonesia also has the **4th largest**

Facebook population in the world

Almost 20 million more users than the UK!

III.

Social.Media@ASEAN.Gov
(Policy Challenges & Choices)

Challenges to governance

QUESTIONS TO PONDER

- Social media/SNS: public or private space?
- Role of third party providers?
 - Appropriate oversight for (big) intl players with global footprints?
 - Protections vs. datamining/behavioral adv/
- Rights viz regulation? How to balance:
 - national security viz business development? privacy & human rights?
 - Net neutrality viz. effort to create enclosures to protect (ACTA, SOPA, PIPA)?
 - open internet vs cybercrime, cyberterrorism, cyberwar?

III.

Towards a Balanced Policy Framework for Social Media Use by Governments

Thank you.
Terima Kasih.
