

Dr. Natthakrit Sanguandikul, BD Manager, Truecorp – IoT/M2M Department

After received his Ph.D. in Distributed Computing from Chulalongkorn University and has been involved in several research projects with Japanese and Korean Universities, Dr. Natthakrit Sanguandikul joined Truecorp in 2012 as Senior System Analyst for Cloud Infrastructure and Corporate Video Conference Solution where he has successfully deployed and managed several projects for internal and external customers including financial institutes in Thailand.

Later in 2015 he joined another department in Truecorp called “True Innovation” as Business Development Manager. His role is to use experience and expertise in deploying mission critical infrastructure to drive centralized platform implementation, business strategy, innovative solutions across various segments and also applications for promoting social contribution and business sustainability.

Recently this year, he joins IoT/M2M department to be in charge of Truecorp IoT/M2M products and platforms in order to capture the growing demands in new market and transform company towards digital service provider.
