Taylor Roberts, Global Cyber Security Capacity Centre at the University of Oxford

 Taylor Roberts is a James Martin Research Fellow at the Global Cyber Security Capacity Centre at the University of Oxford, focusing on researching and developing maturity metrics for measuring cyber strategy, defence and resilience. Taylor also serves as a research lead when applying the Cybersecurity Capacity Maturity Model in several in-country consultations across the world. Previously, Taylor worked for the Center for Strategic and International Studies in Washington D.C. researching technology policy, and UCSD's Institute on Global Conflict and Cooperation, working on a chapter in "China and Cybersecurity" (OUP).
