# Tentative Programme : Day 1 (30 August 2016)

## **Session 1: Digital Transformation, Economies and Societies**

This session will look at where countries' digital strategies are going and how best they can get there.

---

## **Session 2: Effective and Accountable Institutions for the Advancement of 2030 Agenda Sustainable Development**

This session will provide an overview of the new development framework and address the issue on building effective, accountable and inclusive public institutions at all levels for implementing SDGs, reaffirming the key role of public administration in the implementation of the 2030 Agenda.

---

## **Session 3: Smart Sustainable City Framework and Standardization**

This session will showcase pioneering smart city projects initiated by local governments to achieve sustainable urban growth. Speakers from local governments will share their best ICT practices that effectively address the targets of SDG 11.

---

**(Welcome) Gala Dinner**

## Tentative Programme : Day 2 (31 August 2016)

### **Session 4: Smart City Policy Framework and City-to-City Cooperation for Smart Sustainable City Development**

The aim of the session will be to guide cities on how to achieve results-oriented smart sustainable city development and to promote mutually beneficial peer learning and solidarity amongst cities through city-to-city collaboration.

---

### **Session 5: Partnering with Smart Citizens for The City We Need**

This session will share stories: How are local governments receiving citizen feedback and reflecting them in policy development?; How have cities concretely benefited from introducing systems that encourage inclusive policy making and civic engagement?; How are local governments ensuring that citizens, especially the least represented/marginalized, are aware of, have the capacity, and actually use civic participation systems?, etc.

---

### **Session 6: IoTs and Data Revolution for the Smart Sustainable City**

In this session, speakers from local governments will share their unique experiences in solving complex urban problems and serving the public good through data-based innovations. Through these case studies and with the help of Open Data/ Big Data experts, this session will examine ways to improve how data is generated/ used and various implications of data for cities, in particular

---

### **Session 7: Panel Discussion**

## Tentative Programme : Day 3 (1 September 2016)

### **Session 8: Citizen Engagement and Participation**

This session will explore policies, strategies and innovative practices that allow citizens to hold governments accountable and participate in decision-making processes and service delivery.

---

### **Session 9: New Role for Governments in the Era of ICT Startups**

This session will focus on the role that governments and public administrations should play in fostering the entrepreneurial ecosystem in which information and communication technology (ICT) growth can thrive?

---

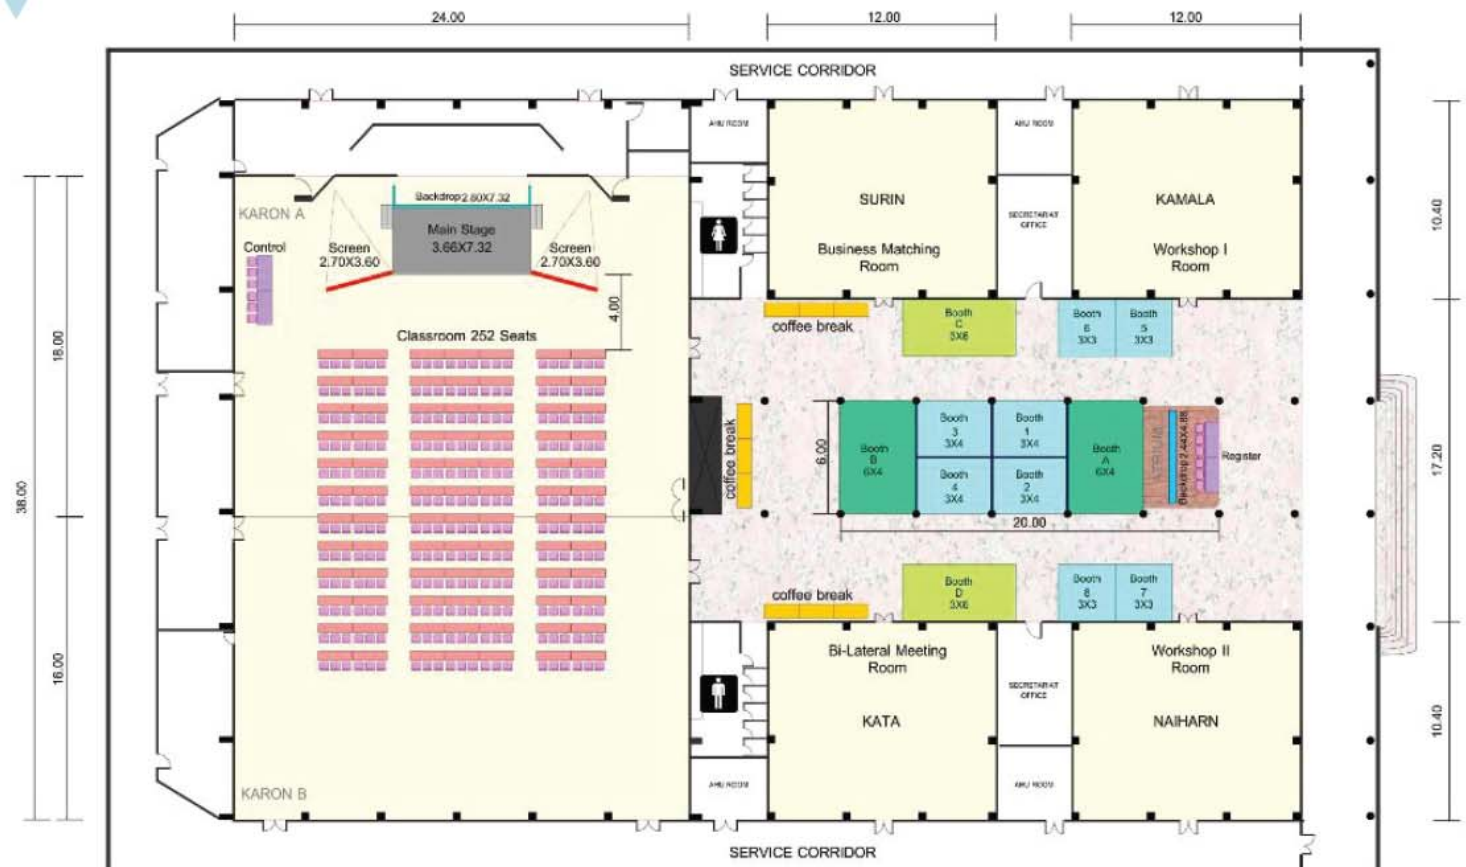

### **Session 10: Cybersecurity & Public Safety**

This session will focus on principles, frameworks, technology options, and good practices on safeguarding security and privacy in the cyber world especially in digital public services whereby drawing experiences and lessons learned from various countries.

---

### **Session 11: Panel Discussion**
