

**Building hyper-connected society demand mutual collaboration
for realizing benefits, irrespective of boarder**

eco-system for expansion and realizing benefits

collaborative approach to build a conducive and sustainable connected society framework

Why?

(1) one single entity cannot provide all components of the solutions

(2) multiple possible technical combinations and implementations, co-development reduces risk of failures and sub optimal solutions

collaborative approach

- 1 Need to build an **IoT open eco system**
- 2 Bridging the **interoperability gap**
- 3 Overcome the **fragmentation of vertically-oriented closed systems, architectures and application areas**
- 4 Move towards **open systems and platforms** that support multiple applications
- 5 Enable **services, business, healthcare services** irrespective borders
- 6 Break down **existing barriers to create global single market**

Framework

- 1 Need **few basic framework-** build the trust by
 - Data Protection package**, consider adjusting the e-Privacy Directives
 - Intensify research and innovation projects on cyber security, may be PPP
 - create a stable and balanced regulatory system that **protects users and incentivizes investment**
 - National governments to **advance policies and legislative initiatives** to tackle cybercrime to the safety and security of **APAC's digital economy**
- 2
 - **Policies must protect** the citizens' right to safety, security and privacy;
 - Support **businesses in innovation**;
 - Enable law enforcement to **use digital resources to protect public security**
- 3 **Regulatory frameworks** should fit for the **digital age, and open and technologically neutral** enough to accommodate future developments
- 4 Eliminate retail **roaming charges and review wholesale charges**
- 5 Disruptive thinking to ensure **digital is rooted in our education systems**

creating single digital market :

IoT needs to be developed as an integral part of the Digital Single Market

ensure faster roll out of IoT

create a regulatory framework for IoT among APAC countries

economies of scale will have positive impact on national economic growth

Hyper connected societies should work together to create a single digital market

THANK YOU
