SPECTRUM MANAGEMENT AND HARMONIZED USE OF SPECTRUM RESOURCE

MR. ELVIN PRASAD

MINISTRY OF COMMUNICATIONS

FIJI

OVERVIEW OF FIJIS SPECTRUM PROJECTS

- FREQMAN (legacy system)
- ► Introduction to SMS4DC (2010)
- ► FM and TV Band Plan 2011
- ► LTE Spectrum Auction (700, 800 & 1800MHz)
- Analogue to Digital Television Migration Roadmap 2014
- Spectrum Master Plans (2015)
- ➤ Fiji Frequency Allocation Table 2016
- ▶ Microwave Band Planning 2017 (link licencing)

PROGRESSING TOWARDS 2020

- Fully Automated Spectrum Management System
- More investments in Spectrum Monitoring equipment analyzers, fixed monitoring systems, mobile solutions, etc.
- Efficient invoicing and maximizing revenue collection
- > 5G and IoT readiness
- Further changes to Spectrum Plans and charging practices
- Spectrum Re-use/Re-farming (complimenting 5G, M2M)
- Phasing out technologies (e.g. 2G, 3G, WiMAX)
- Reliance on satellite technology
- Standards and testing for QoE/service quality/coverage
