GLOBAL ACCESSIBILITY
REPORTING INITIATIVE

The Global Accessibility Reporting Initiative

April 2017

**Mobile & Wireless
Forum**

Welcome to the Mobile & Wireless Forum

We are an international association of companies with an interest in mobile and wireless communications including the evolution to 5G and the Internet of Things.

[More About Us](#)

In January 2017, the Mobile Manufacturers Forum (MMF) changed its name to the Mobile & Wireless Forum (MWF)

ISSUES THAT WE WORK ON

Accessibility

Search for mobile devices and assistive apps that best fit your needs.

GARI: Global Accessibility Reporting Initiative

The screenshot shows the GARI website interface. At the top, there is a language selection bar with options: EN, AR, DA, DE, ES, FI, FR, IT, 한국어, NL, NO, PL, PT, RO, SV, 日本語. Below this is the GARI logo (a hand icon) and the text "GLOBAL ACCESSIBILITY REPORTING INITIATIVE". To the right of the logo are navigation links: "For Government", "For Manufacturers", "For Developers", "Blog", and "Contact".

Below the navigation is a dark banner with two main buttons: "Find Accessible Devices & Apps" and "Learn about Mobile Accessibility". Underneath this banner is the text: "We help consumers to find a device with the accessibility features that work best for them".

The main content area features a white box with the heading "What do you want to find?". Below this heading are five vertical cards, each representing a device category with an icon, a title, and a description:

- Phones**: Narrow down and compare options from different manufacturers.
- Tablets**: Compare the accessibility features you need.
- Mobile Apps**: Which devices support the accessibility apps you love?
- Connected Wearables**: Compare options from different manufacturers.
- Smart TV**: Compare the features from different manufacturers.

The GARI database

- GARI.... **G**lobal **A**ccessibility **R**eporting **I**nitiative
- a central source of information
- accessible devices available in all world regions
- 5 product groups
- 1,100+ accessible mobile phones
- 350+ accessibility related apps
- consumer information & reporting platform
- 17+ languages

More detailed information: GARI Annual Report 2016

Why do we need GARI?

- lack of information on existing accessibility features
- increasing recognition of the need for accessibility
 - 166 countries ratified UN Conv. on Rights of Persons with Disabilities
 - Article 9: ICT accessibility
 - Article 24: inclusive education
 - 1 Billion people affected by disabilities
 - 12.3% of the world population 60+ years
 - everyone in a disabling environment
- a global approach for global products

How does GARI work?

- GARI is freely accessible via the web: www.gari.info
- on the homepage, you find 5 "doors" through which to enter the database
- each "door" stands for one product group
 - accessible mobile phones, tablets, Smart TVs, Wearables, accessibility related apps
- enter through one of the doors and you arrive in the search interface
- there you can search for devices that have special features for
 - vision
 - hearing/speech
 - cognition
 - mobility
- the database will give you a list of devices that have the requested features

[Find Accessible Devices & Apps](#)

[Learn about Mobile Accessibility](#)

We help consumers to find a device with the accessibility features that work best for them

What do you want to find?

Phones

Narrow down and compare options from different manufacturers.

Tablets

HEARING/SPEECH FEATURES	Detail	Description
Hearing Aid or "HAC" Setting	Yes	The device has a user setting designed to reduce issues related to interference buzzing for hearing aid users in telecoil mode. Does not guarantee total clarity.
Adjustable Vibrating Alerts	No	Allows users to select different vibration settings for various notifications.
Supports Closed Captioning for Web Video or Streaming	Yes	Device is capable of displaying closed captioning that is included in a video or video stream.
Front Facing Camera	Yes	Allows the front facing camera to be used in signing or two-way video conferencing.
Adjustable Maximum Volume Control	No	Allows you to change the default volume control limit.
Two-way Video Communications – using wireless LAN networks	Yes	Allows you to make video calls in which you can see the other person and they can see you using your wireless LAN network.
Two-way Video Communications – using mobile networks	Yes	Allows you to make video calls in which you can see the other person and they can see you using your mobile network.
Visual Alerts - Electronic Message	Yes	When a text, e-mail or IM comes in, it displays a visual alert to indicate it has been received.
Text phone/TTY compatibility	N/A	This product is compatible with the Textphone/TTY for the deaf.

Mobile Accessibility

Three dimensions:

- **hardware:** hearing-aid settings, front-facing camera for video communications....
- **software:** visual indicators, adjustable vibrating alerts....
- **third party applications:** captioning, visual alerts, communicating....

Devices in inclusive education

- a pan-European programme to improve the digital skills and employability of young people
- 3 groups of people with “reduced access” to education benefited especially:
 - autistic school children: they often find it easier to interact with devices than with people, and teachers commented on the improved educational and social outcomes;
 - children who are long term in hospital: they risk becoming “forgotten” by their friends and teachers after several weeks in hospital; a range of different solutions enabled these children to feel more connected to family, friends and teachers;
 - migrants: devices (with standard language apps like Google Translate) were a real accelerator for education and inclusion of these children;

Mobile Enabling Solutions: Deaf and Hard-of-hearing

- 32 features for hearing/speech
- most searched for features on GARI:
 - Hearing Aid Compatibility
 - Improved Call Quality
 - Ringer Volume Adjustable
 - Adjustable Maximum Volume Control
 - Vibrating alerts

Mobile Enabling Solutions: Blind and Low Vision

- 34 features for blind and/or low vision users
- popular features:
 - screen-reader
 - screen magnifier / touch zoom
 - high contrast
 - color adjustments
 - voice recognition
 - voiced menus
 - audible cues
 - adjustable font size
 - voice notes

Mobile Enabling Solutions: Mobility and Dexterity

- 18 features for dexterity/mobility
- popular features:
 - voice recognition for accessing features
 - predictive text input
 - easy to press keys
 - external switch/pointer support
 - gesture based navigation

Mobile Enabling Solutions: Cognition and Learning

- 9 features for cognition
- popular features:
 - no screen timeout
 - simplified display
 - simple instructions
 - photo-associated address book
 - simple reminders

GARI benefits

- **Consumers:** a comprehensive searchable database of phones and features in multiple languages
- **Government:** a feature set that is far more extensive than any countries' existing requirements
- **Operators:** demonstrate commitment to an important market segment and provide an easy retail tool
- **Manufacturers:** report it once – have it accepted everywhere

FIND A DEVICE THAT SUITS YOUR PARTICULAR NEEDS

Finding the right phone for you is important – especially for those of us with sensory or physical limitations.

As technologies advance and improve, accessibility features are becoming more prevalent, and many phones and tablets increasingly include features for accessibility.

Let us help you find the mobile device that's right for you.

Ranking phone accessibility for you

Use the filters below to identify the best mobile device to suit your needs.

The Global Accessibility Reporting Initiative (GARI) is a project designed to help consumers identify devices with features that may assist them with their particular needs. Telstra is proud to be part of this initiative.

For more detailed accessibility features information please refer to the specifications tab for each of the mobiles below.

Long-term objectives

- one global database for accessibility requirements in all markets
- centralized platform on mobile accessibility
 - promotion of mobile accessibility
 - reporting tool & consumer guidance
 - platform for exchange of information between stakeholders

GARI participants

Companies participating in GARI:

- Alcatel Mobile Phones
- Apple
- BlackBerry
- Cisco
- Coolpad Americas
- HP Inc.
- HTC
- Huawei
- Kyocera
- LG
- Microsoft (Nokia)
- MobiWire
- Motorola Mobility
- Samsung
- Sony
- Telstra
- ZTE
