

Dr. Eberhardt Heidrich received his Ph.D. in Electrical Engineering from the University of Karlsruhe in 1992. After working as a research assistant at the Institute for High Frequency Technology (IHE), he joined LS telcom AG in 1994. Initially, he led the Broadcast Department where he was responsible for the development of broadcast planning and coordination software tools. In his current position, he is heading the customer Service and Quality Management Division of LS telcom AG. Dr. Heidrich has held numerous lectures and training courses on analog and digital broadcast technologies, as well as RF spectrum planning and international coordination. Besides broadcasting, his special interest is in radio wave propagation, antennas, and RF measurement techniques. He is member of the IEEE AP and BTS societies, as well as ITU ties member. He has participated in various ITU workshops, seminars and international radio communication conferences.
