

KADRI KASKA

Kadri Kaska is a research fellow in the Law and Policy Branch of the NATO Cooperative Cyber Defence Centre of Excellence. Her area of research lies at the intersection of cyber law and policy, involving comparative domestic law applicable to state activities in cyberspace, national cyber security strategies, and organisational structures. She also upholds the NATO CCD COE online resources in this area ([Cyber Security Strategy Documents](#) and [National Cyber Security Organisation](#)).

Amongst other things, she has written on the legal issues raised by international cyber incidents since the 2007 cyber attacks against Estonia. Her recent publications have focused on the legal and strategic aspects related to developing and deploying military cyber defence capabilities.

Prior to joining the NATO CCD COE in 2008, she served as a legal adviser to the national Communications Regulatory Authority and the National Competition Authority, participating in the drafting of national telecommunications legislation and advising on communications resource management, standardisation, and competition issues. Kadri holds a master's degree in law from the University of Tartu, Estonia.
