

Development of the ITU-R documents database search facility

JUNKO KOIZUMI

STUDY GROUPS DEPARTMENT

RADIOCOMMUNICATION BUREAU, ITU

Overview

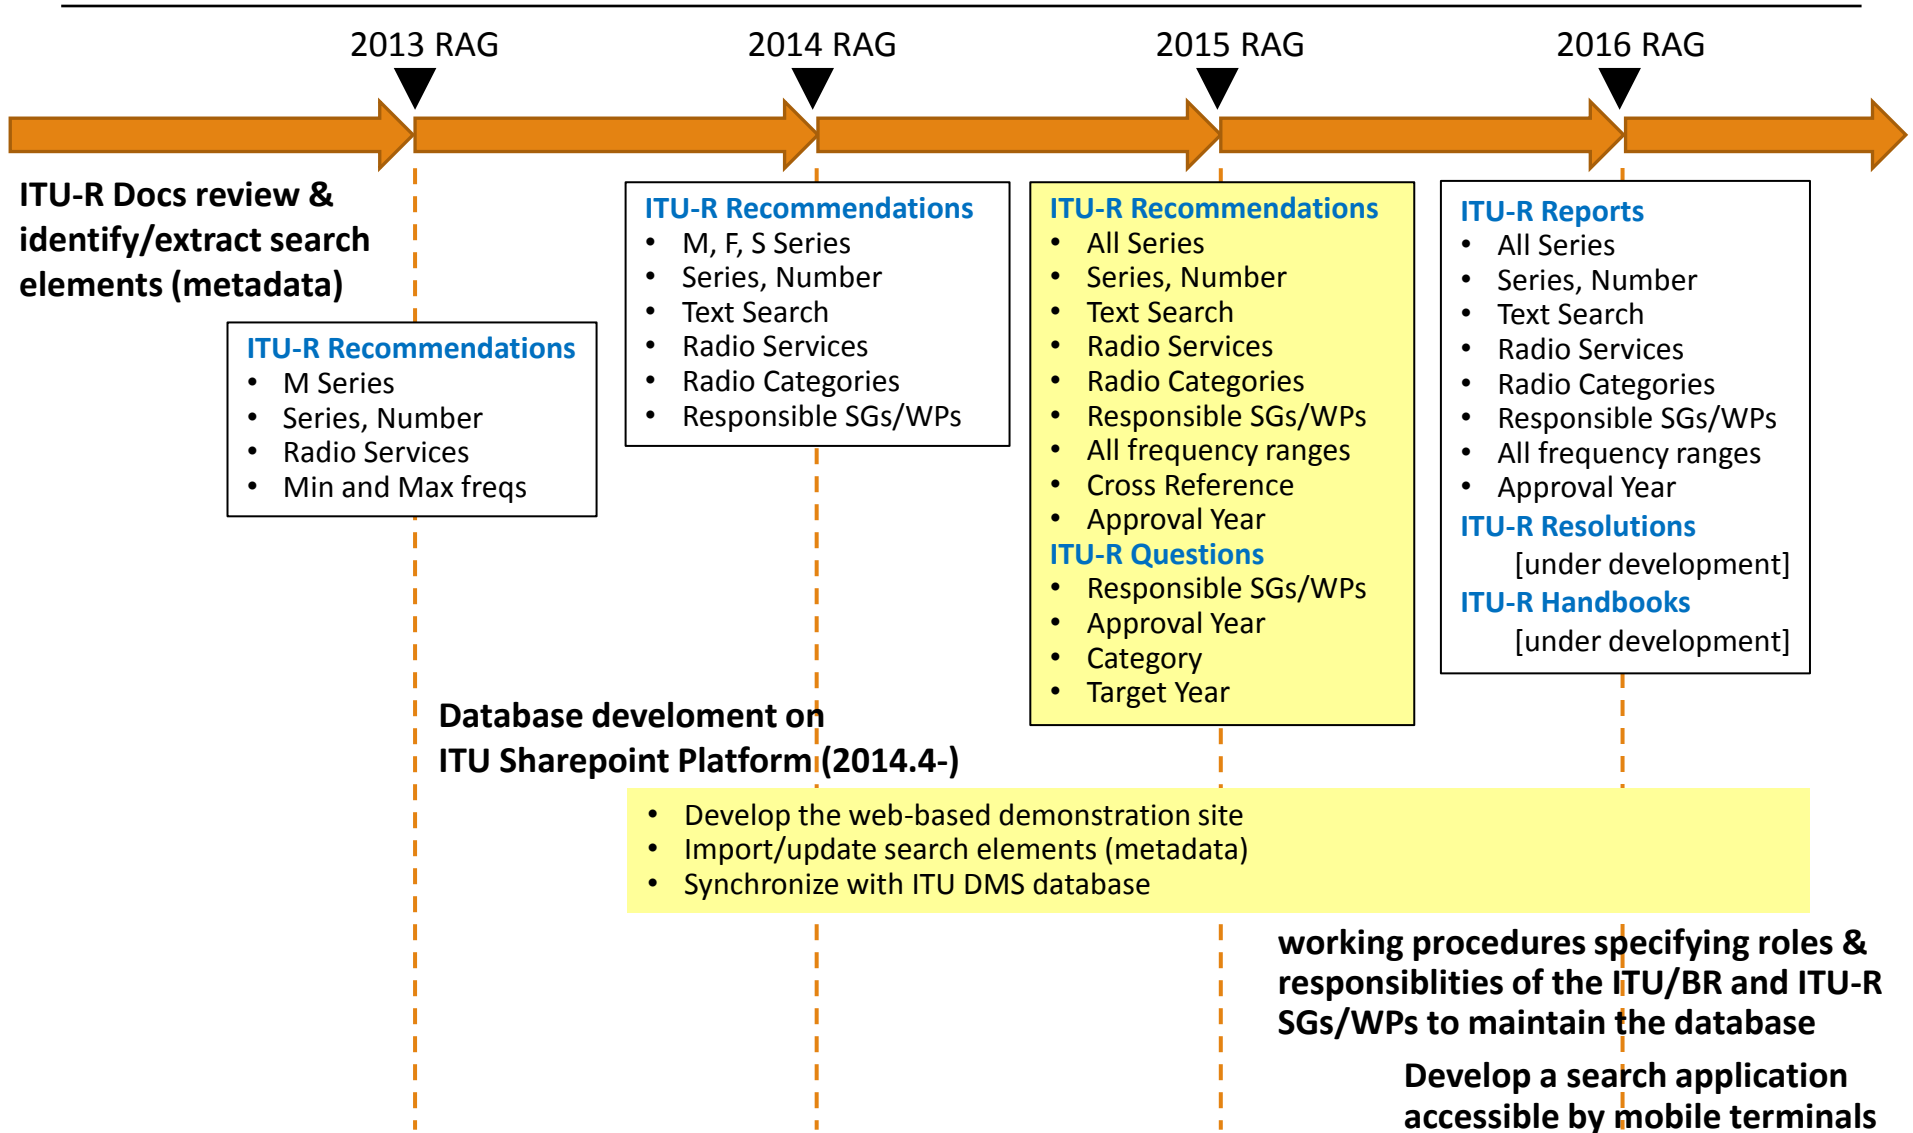

- RAG (2012) invited the Director to develop a search database facility for ITU-R Recommendations for assisting membership to identify ITU-R Recommendations.
- Voluntary Contribution USD 290,000 kindly provided by the Ministry of Internal Affairs and Communications (MIC), Japan in April 2014
 - Expedite the database development
 - Expand this search function to ITU-R Questions, Reports, Handbooks, Resolutions
 - Make it more accessible for ITU members, including developing countries
 - Consider the equipment of functions to make it more effective and useful

Main Activities

1. ITU-R Documents review & identify/extract search elements
2. Database development on ITU Sharepoint Platform
3. Document the working procedures specifying roles & responsibilities of the ITU/BR and ITU-R SGs/WPs to maintain the database
4. Develop a search application accessible by mobile terminals

Current Progress

❑ ITU-R Documents Search Database Facility Web Site URL

<https://extranet.itu.int/brdocsearch/>

❑ Link to the Search Database Facility is placed to the following pages:

- ✓ ITU-R Study Groups, Working Parties and CCV pages
- ✓ RAG page
- ✓ RA-15 page

(“ITU-R Documents Search Tool” in **Documentation** part)

ITU-R Documents Database Search Facility Top Page

<https://extranet.itu.int/brdocsearch>

Link to ITU-R Recommendations search page

Link to ITU-R Questions search page

Link to ITU-R Reports search page

The screenshot shows the header of the BR Document Search page. It features the ITU logo on the left, followed by the text 'BR Document Search'. Below this, there are three navigation links: 'Home', 'ITU-R Recommendations', 'ITU-R Questions', and 'ITU-R Reports (demo)'. The 'ITU-R Recommendations', 'ITU-R Questions', and 'ITU-R Reports (demo)' links are circled in red. To the right of these links is an 'EDIT LINKS' button and a search box containing the text 'Search Recommendations' and a magnifying glass icon.

ITU-R Documents Database Search Facility Page

The ITU-R documents database search facility is being developed to make ITU-R documents (ITU-R Recommendations, ITU-R Questions, ITU-R Reports, ITU-R Resolutions and ITU-R Handbooks) more accessible. This database search facility assists to identify ITU-R documents by providing search functions which enable ITU-R documents to be filtered by search criteria such as number, radio category, radio services, frequency ranges and approval year.

Recent Updates

- **ITU-R Recommendations** and **ITU-R Questions** searches are **OPERATIONAL** since 19 October 2015
- **ITU-R Reports** search is available as a **demonstration version** since 10 November 2015
- **ITU-R Resolutions** and **ITU-R Handbooks** will be available in early 2016
- Search function is available only for "in force" documents
- Reference material for ITU-R Documents Database Search Facility is available [here](#)
- Any comment and question: junko.koizumi@itu.int (BR/SGD)

Target documents and main search elements

❑ ITU-R Recommendations

- ❖ Metadata Search (Search Criteria)
 - "ITU-R Recommendation Series", "Radio Category", "Radio Services", "Cross Reference", "Responsible SGs/WPs" and "Approval Year"
- ❖ Frequency Search
 - Search by frequency range (min and max frequencies)

❑ ITU-R Questions

- ❖ Metadata Search (Search Criteria)
 - "Responsible SGs/WPs", "Approval Year", "Target Year" and "Category" (Resolution ITU-R 5)

❑ ITU-R Reports [demo version, data verification is required]

- ❖ Metadata Search (Search Criteria)
 - "ITU-R Recommendation Series", "Radio Category", "Radio Services", "Responsible SGs/WPs" and "Approval Year"
- ❖ Frequency Search
 - Search by frequency range (min and max frequencies)

❑ ITU-R Resolutions and ITU Handbooks [under development]

newly introduced search criteria

❑ Radio Category (for ITU-R Recommendations and ITU-R Reports)

Classified into the following 8 categories according to subject.

1. Technical/operational characteristics or parameters
2. Sharing/compatibility issues
3. Frequency arrangements
4. Error performance/availability objectives
5. High Frequency (HF) systems
6. Antenna reference patterns
7. Vocabulary
8. IMT

(Each ITU-R Recommendation can have multiple categories, or without category.)

❑ Cross Reference (for ITU-R Recommendations)

The location where the Recommendations are referred to in the RR is searchable.

"IBR" : «incorporated by reference» (IBR) in the Radio Regulations

"Ref." : referred to in the Radio Regulations, but not IBR

blank : not referred to in the Radio Regulations

❑ Frequency Search (for ITU-R Recommendations and ITU-R Reports)

Frequency Search by frequency range (with min and max frequencies) is available.

(This function is provided in the separate page from main search page.)

ITU-R Recommendation Profile Page

ITU-R Recommendations Search

(4) Explanation of search criteria

Main search criteria

Metadata Search

Metadata Search of ITU-R Recommendations / Reports is available by Series, Radio Category, Services, Cross reference, Responsible WPs, Approval year.

- **Series (ITU-R Recommendations Series / ITU-R Reports Series)**

BO	Satellite delivery	P	Radiowave propagation	SM	Spectrum management
BR	Recording for production, archival and play-out; film for television	RA	Radio astronomy	SNG	Satellite news gathering (ITU-R Recommendations only)
BS	Broadcasting service (sound)	RS	Remote sensing systems	TF	Time signals and frequency standards emissions (ITU-R Recommendations only)
BT	Broadcasting service (television)	S	Fixed-satellite service	V	Vocabulary and related subjects (ITU-R Recommendations only)
F	Fixed service	SA	Space applications and meteorology		
M	Mobile, radiodetermination, amateur and related satellite services	SF	Frequency sharing and coordination between fixed-satellite and fixed service systems		

- **Radio Category**

The ITU-R Recommendations / Reports are classified into the following 8 Radio Categories. (One ITU-R Recommendation / Reports can have multiple or without categories.)

1. Technical/operational characteristics or parameters
2. Sharing/compatibility issues
3. Frequency arrangements
4. Error performance/availability objectives
5. High Frequency (HF) systems
6. Antenna reference patterns
7. Vocabulary
8. IMT

- **Services (Radio Services)**

Radio Services are defined in the [Radio Regulations](#) ARTICLE 1 Section III (Radio services).

"(all)" = no specific radio service is indicated.

"(others)" = ISM, SRD, UWB, etc.

- **Cross ref. (Please refer to the [Radio Regulations](#) Volume IV for IBR (ITU-R Recommendations incorporated by reference) (ITU-R Recommendations only)**

There are 2 cross reference status on this search: "IBR" and "ref."

"IBR" = "incorporated by reference in the Radio Regulations"

Future work

- Further development of ITU-R Documents Database Search Facility (Data preparation and search tool development for ITU-R Resolutions and ITU Handboks)**
- Continuous reviews and updates of ITU-R Documents Database Search Facility data (at the timing of new document approval, revision, suppression of document)**
- Establishment of working procedures specifying roles & responsibilities of the ITU/BR and ITU-R SGs/WPs to maintain the database**
- Development of mobile application to make it accessible by mobile terminals**

Thank you!
