

# IMPLEMENTATION OF CoE ACTIVITIES IN 2020

NRD Cyber Security

*is an*

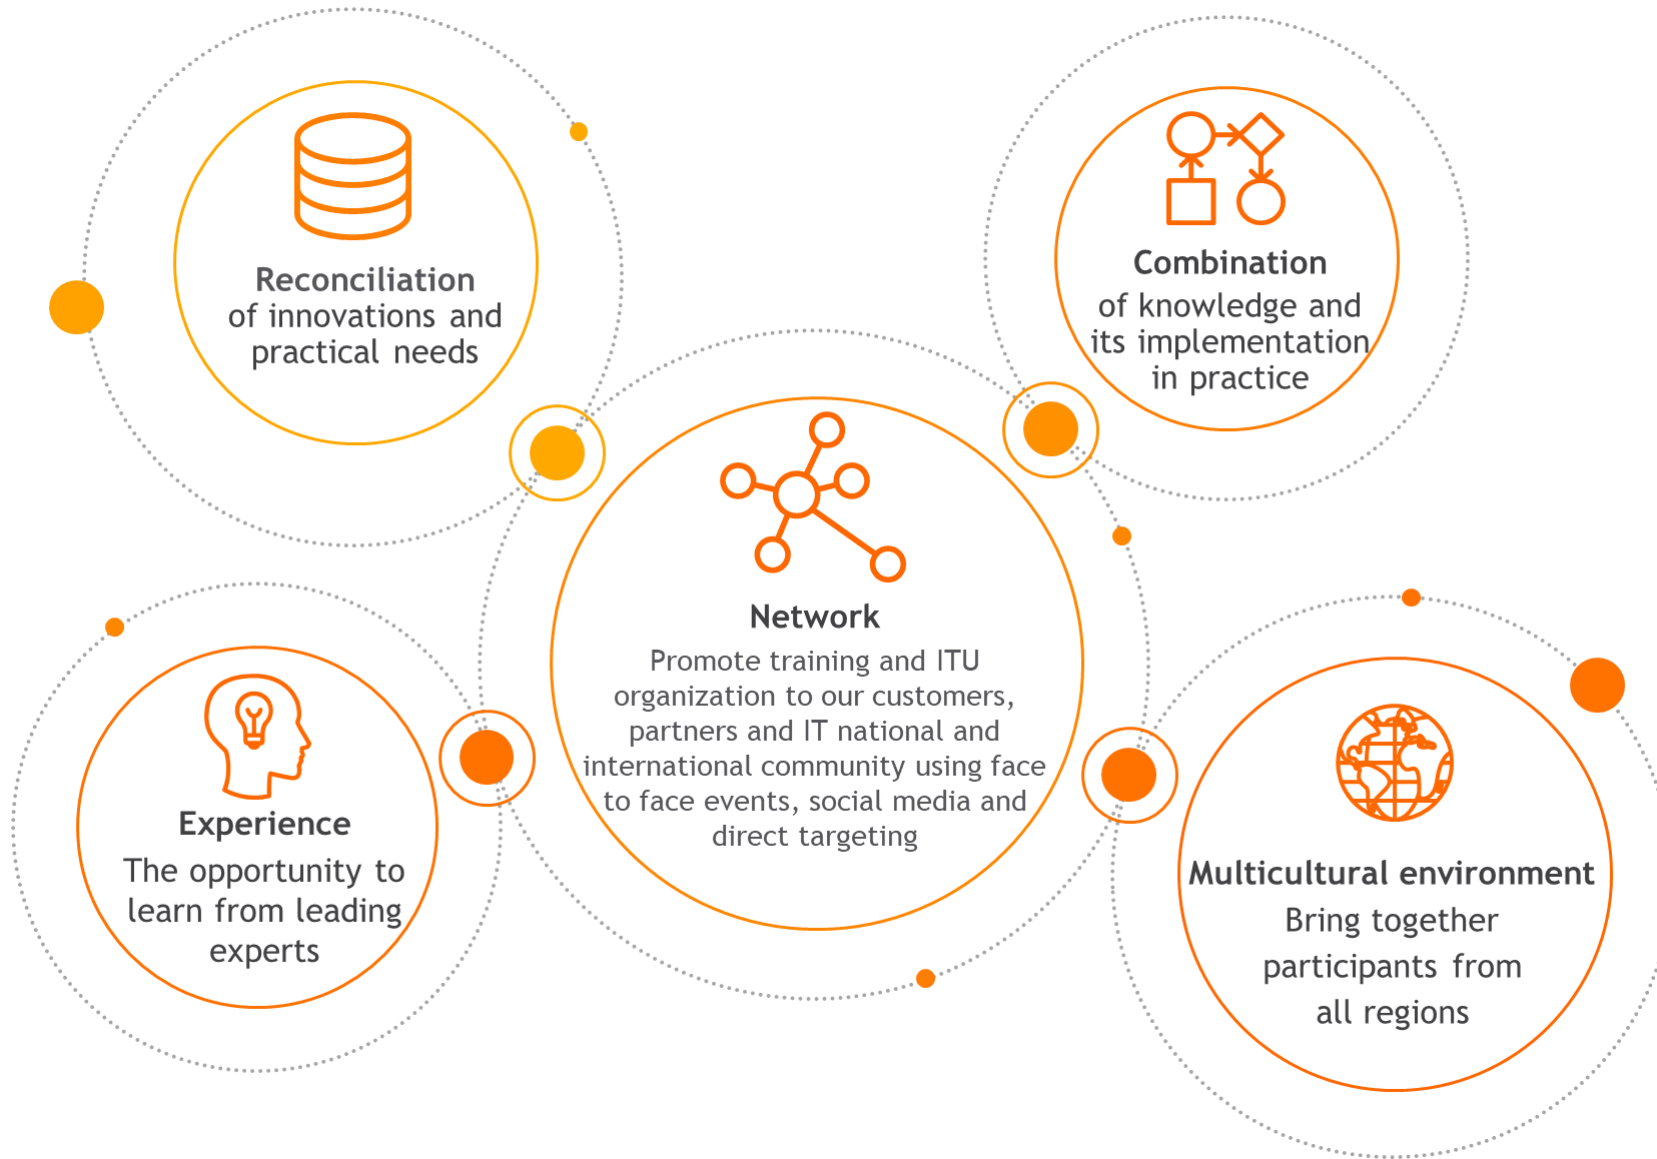

**ITU Centre of Excellence**

2019-2022

International Telecommunication Union

# OUR VISION (AS ITU CoE) **DIDN'T CHANGE**

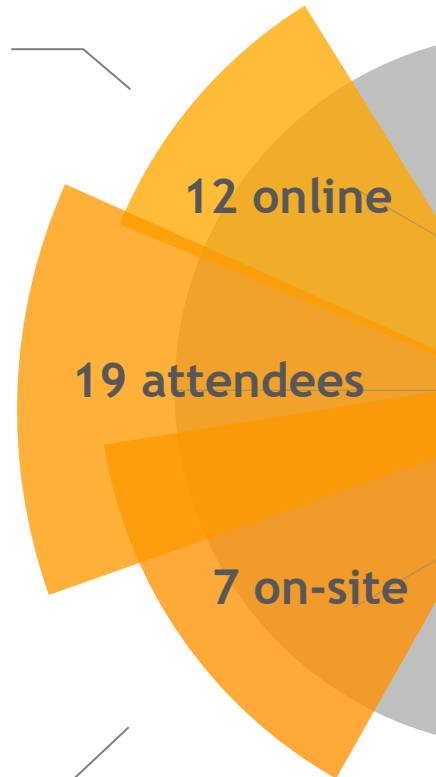

# TIMETABLE

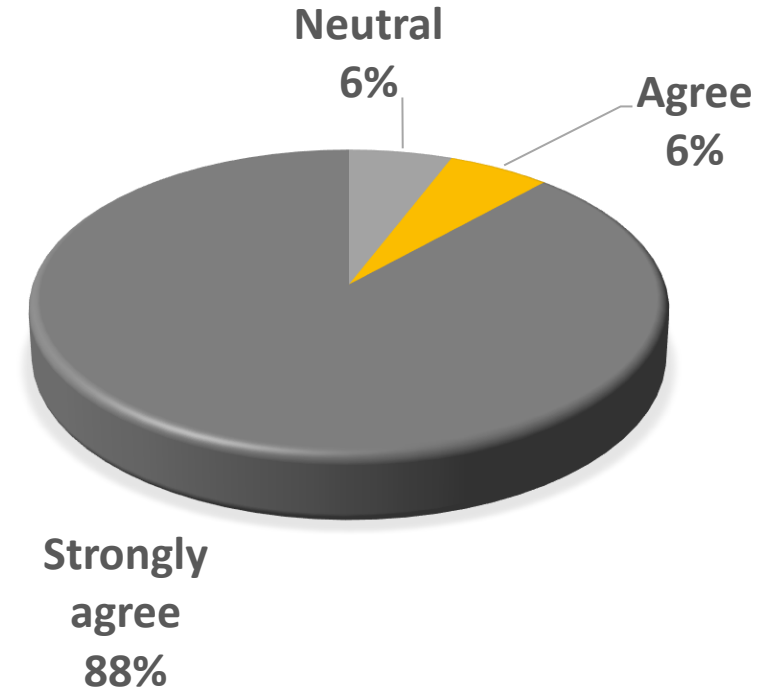

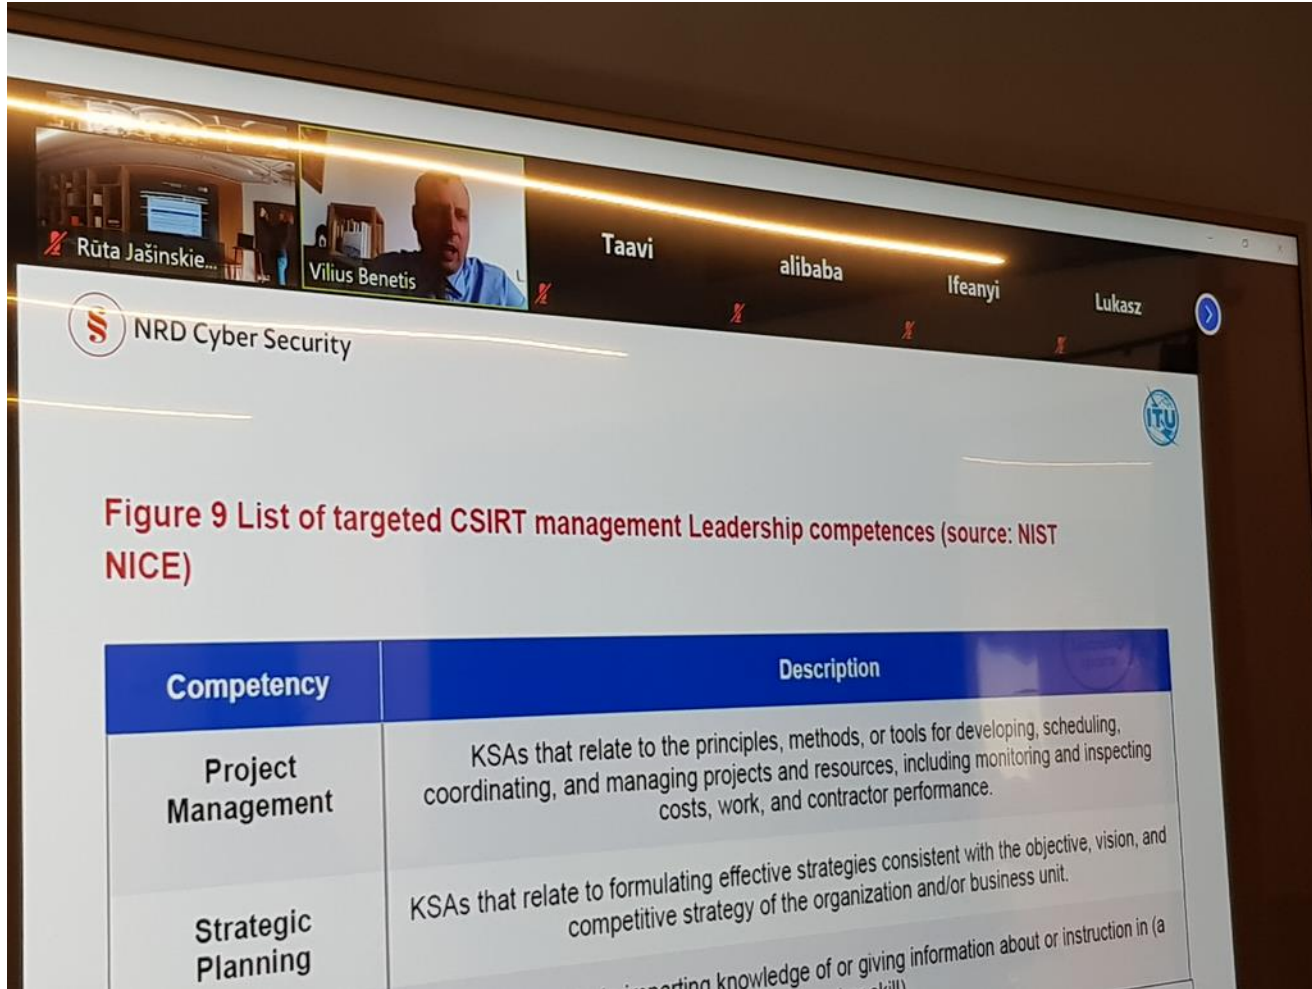

# BUILDING AN EFFECTIVE CYBERSECURITY TEAM

- LITHUANIA
- ESTONIA
- POLAND
- CROATIA
- ROMANIA
- NIGERIA

# BUILDING AN EFFECTIVE CYBERSECURITY TEAM

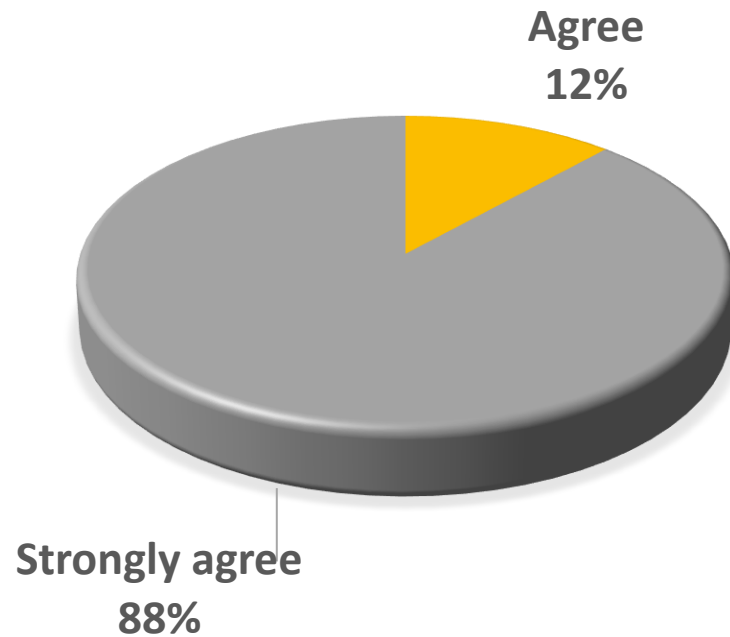

I am satisfied with how this training met my expectations:

# BUILDING AN EFFECTIVE CYBERSECURITY TEAM

I am satisfied with the overall delivery and content of the training:

# TRAINING FEEDBACK

## What did you like best about the training?

- The **trainer**- he was awesome.
- The **depth of the topics** and the presenter.
- The **quality and quantity** of information provided.
- Systematical approach on the subject. A lot of **extra material (multiple sources)** that is of good quality.
- **Explanations through the practice.** Well elaborated examples.
- **Networking**, work in groups, the group exercises were very enlightening. Opportunity to **share experience** among each other.

“I enjoyed the vastness of information (theoretical and practical point of view). Day three was the culmination which highlighted theoretical knowledge gained during day 1 and 2. The provided materials are more than sufficient for a Minimal SOC formation; .....The most and convincing part was in a good way passion of the tutor”.

## What did you like **LEAST** about the training?

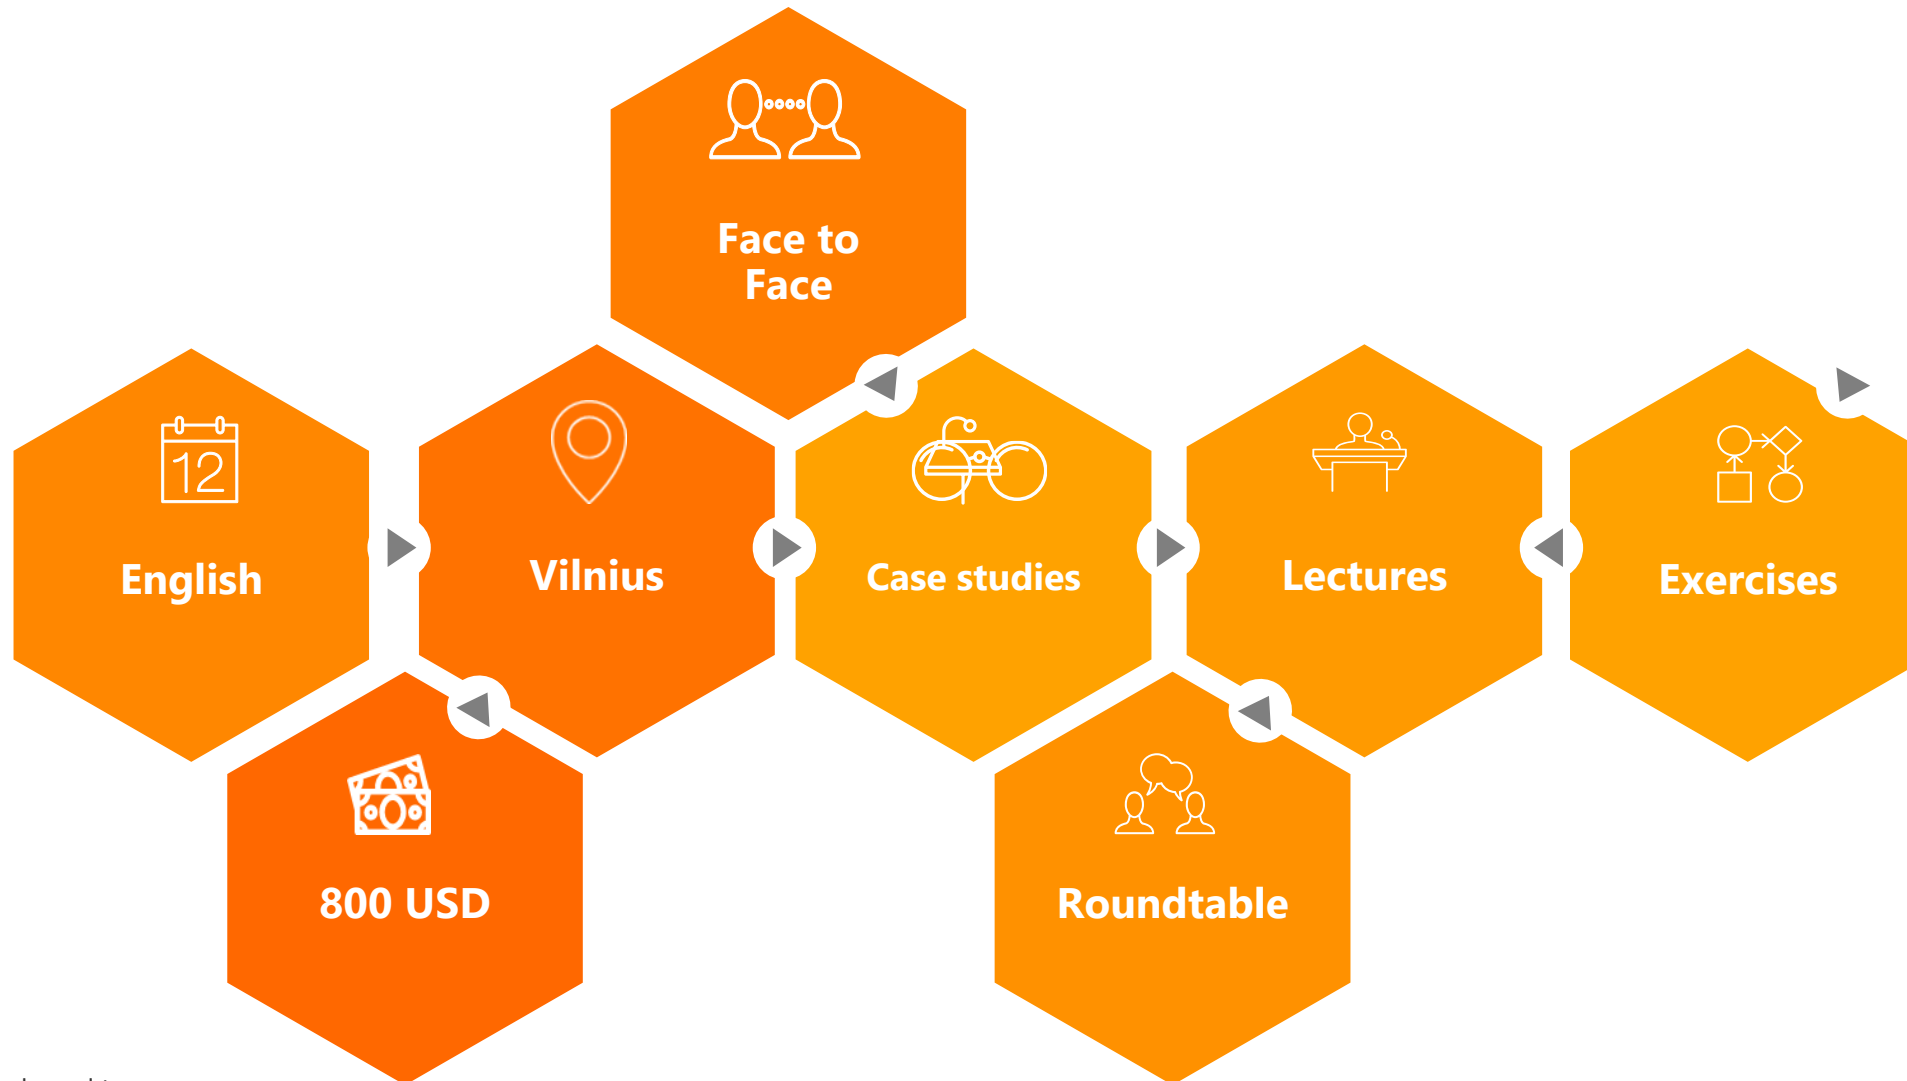

- That it was **online** and the timing
- **Not being physical** to interact with my other trainees
- The **time difference** meant I had to staff the course at 7am.
- **Remote environment** as whole (with so many different people it had to be a physical meeting) - but of course due to COVID we can not have it
- Sometimes it was also hard to follow the tutor due to **his enormous knowledge** base and his wish to present as much as possible
- 3 days seems to me to little for broad area that training was covering. **Too much information in small time window**
