Child Online Protection

2020 Child Online Protection Guidelines

<https://www.itu-cop-guidelines.com/>

Parents, Educators:

The new guidelines aim to sensitize families to the potential risks and threats and help cultivate a healthy and empowering online environment at home and in the classroom. The Guidelines emphasize the importance of open communication and ongoing dialogue with children, creating a safe space where young Internet users feel empowered to raise concerns. Such as:

Guidelines for parents, carers and guardians

- Have a discussion with your children – try and do some online activities with them.
- Identify the technology, devices and services across your family / household.
- Consider whether filtering and blocking or monitoring programmes can help and support your family.
- Agree expectations as a family about using the Internet and personal devices.
- Be aware of the online and mobile services used by your children.

Guidelines for educators

- Ensure that all devices are secure and password protected.
- Install anti-virus software and firewalls.
- Ensure that there is a policy which details how technology can be used.
- Consider how to manage taking and storing images of pupils.
- Ensure that Internet feed provided by the school is filtered and monitored.

Example Key Recommendations

Guidelines for Parents, Educators and Carers: The role they can play

consider the exact nature of the different sites, and **their child's understanding of the dangers** and the likelihood that they can reduce risks, before deciding which environment is right for their child.

ensure that the child knows **when and where to get help**. This could be their parent or carer, a teacher or another trusted adult.

Make sure you and your children are **capable tool users**. There are numerous **tools that can assist parents** with the 'management' of connected technology both in and out of the home.
