Update 2020: Basic

- How do I search for information on the Internet?
- Question: Is it safe to post your photos on the Internet?

- What does your interlocutor see?
- Viruses are always bad and unpleasant
- News on the Internet
- Dependence
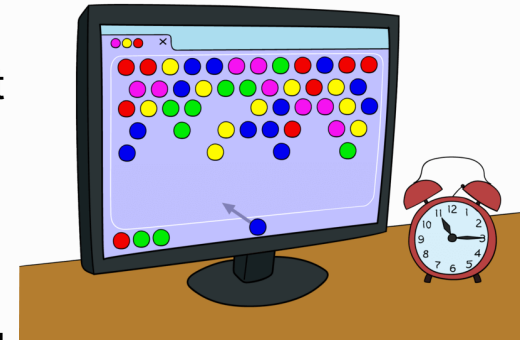

- You've been playing an interesting educational game for an hour now ...
- Do not post personal information about yourself and your family on the Internet
- It is not always possible to delete what we post on the network
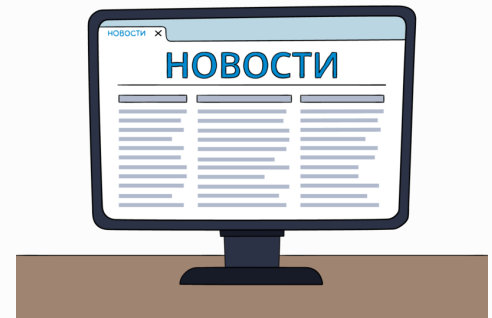

Update 2020: Middle

- Search on the Internet
- How do you know for yourself - a useful game or not?
- Game "Balls"
- Take your time to use all the tips from the Internet
- You are offered to shoot a video of you crossing the road in front of the cars ...
- You've been playing an interesting game for an hour now ..
- Virtual reality has become very accessible today ...
- To create augmented reality, it is enough to have a smartphone ...
- Don't send SPAM
- Social media is not the place to send emergency messages
- Never post someone else's photos
- Social networks are always interesting
- Can you trust the information obtained on a specific site?
- Do you think it is possible to use other people's abstracts downloaded from the Internet?
- Always reply to a letter with a greeting
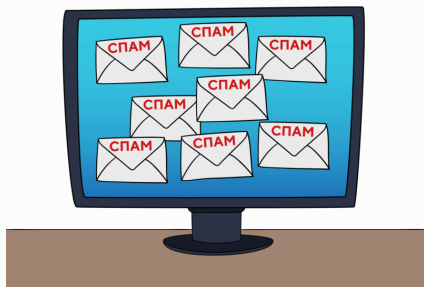

Update 2020: Advanced

- Media creativity and video blogging

- Digital footprint

- Test: Internet Addiction

- Family contract and breakfast / dinner without gadgets

- Critical thinking and media literacy

- Suicidal groups

- Sexting, sextortion
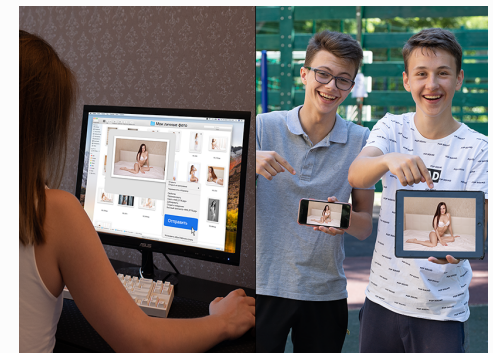

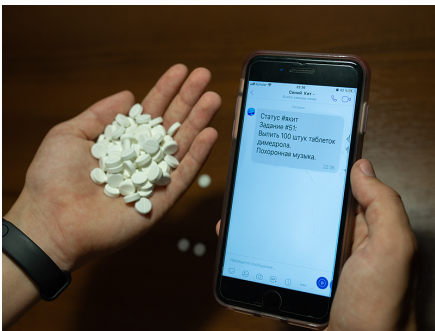

Next steps

- *Development of scenarios and training materials for various target groups and age categories*

- *Events using course materials (months of safe Internet, seminars for teachers, performances) with the support of local partners (universities, schools)*

- *Translation into other official ITU languages and into the national languages*

- *Expansion of the coverage of the course materials due to the support of the Communications Administrations*

- *Integration with new ITU COP Guidelines*

Thank you!
