

**REPUBLIC OF ALBANIA**  
**NATIONAL AUTHORITY ON ELECTRONIC CERTIFICATION AND**  
**CYBER SECURITY**

---

# Organization Introduction & Current Situation of Cyber Security in Albania

**Vilma Tomço**

**AKCESK**

AUTORITETI KOMBËTAR PËR  
CERTIFIKIMIN ELEKTRONIK  
DHE SIGURINË KIBERNETIKE

# Introduction

---

- National Authority on Electronic Certification and Cyber Security (NAECCS) is the responsible authority for implementation and supervision of legislation on electronic signature (Law No. 9880/2008), on electronic identification (Law No.107/2015) and the legislation on Cyber Security (Law no.2/2017)
- NAECCS is composed in two directorates:
  1. Electronic Certification Directorate
  2. Cyber Security Directorate
- The aim of the Authority is to increase liability and trust for users of electronic signatures, trusted services and to increase security in the networks / systems of CII in the Republic of Albania, through the adoption of international technical standards. (Transposal of **NIS** Directive, **EIDAS** Regulation etc.)

# Objectives of NAECCS

---

## ❖ Electronic Certification Directorate:

- Register/ accredits Qualified Trusted Service Provider and oversees their activity.
- Determines the rules on electronic identification schemes, electronic seals, transfer of trusted service tasks to third party, electronic broadcasting service, website authentication.
- Perform periodical inspection for the implementation of standards and procedures to Qualified Trust Service Provider, issuing qualified electronic certificates.

## ❖ Cyber Security Directorate

- Determines minimum security Standards which should be implemented from all CII (defined by the Methodology approved from NAECCS adopted from ENISA)
- Perform periodical audits CII to ensure they comply with the security standards, ISO 27001
- Administers the *unique online portal* for the publication of illegal content websites
- Leads the working group for drafting the National Cybersecurity Strategy
- Focal point contact on national level for the responsible operators in the field of cyber security and coordinates the work for technical solution on cyber security incidents
- Awareness campaigns for a secure electronic environment with CII, private sector, citizens and Academia

# I. Electronic certification

- AKCESK is the Authority responsible for supervision and implementation of the legislation in the field of Electronic Certification and Trusted Services.
- Two (2) Accredited Qualified Trust Services Providers (QTSP)
  - NAIS (National Agency for Information Society), Since 2012 – Gov Entity
  - ALEAT – Private Entity, Since 2013

# QTSP(s) in Albania

- NAIS – issues qualified certificates in USB Token Devices for both Public Administration and Private Business(es). It is in improvement process through remote identification procedures.

- ALEAT – issues qualified certificates Cards for Albanian Citizens.

# QTSP(s) in Albania

- Primary identification is done by physical identification for both QTSPs
- Approx 10K Qualified Certificates issued for Public Administration & Private Business Entities.
- 1.1 Mil. Qualified Certificates issued for Albanian Citizens.

# e-Public Services

- 64 services offered by Albanian Gov which involve e-signature and e-seal.
- Many bank and financial services (Private Sector) are using e-identification and e-signature.

Model nr. 1 (elektronik)

REPUBLIKA E SHQIPËRIE  
BASHKËSI - KËRSHI ADMINISTRATIV

CERTIFIKATË PERSONALE

Në bazë të Regjistrimit Kombëtar të Gjendjes Civile të vitit 2010, vërtetohet të dhënat e mëposhtme:

Përshkrimi të Gjendjes Civile	
Emri	
Mbiemri	
Niveli personal	
Emri i bashkëshortit	
Emri i fëmijës	
Datëlindja	
Vendndëshja	
Vendndëshja	
Gjendja	
Gjendja Civile	
Shënime

# CAB

## (Confirmation Accreditation Body)

- Not yet any CAB registration by the authority.
- In the meantime NAECCS is doing the CAB functionalities (partly)
  - Documentation verification
  - Possible documentation changes
  - Identification process
  - Product delivery
  - Tech capacities (logs, security measures)

# Cross Border

- End of 2016 – Amended both Laws (No 9880/2008 & 107/2015) to recognize trust services issued in EU.

*(They have the same legal validity as issued in Albania)*

- According to the legislation above recognition of Albanian trust services is done by bilateral agreement(s).
- Lastly, several bilateral agreement on trusted services are to be signed during WB6 Digital Summit 2020

# Incident Reporting

- According to Article 19, there has been NO incident (therefore no report) by both QTSPs in Albania

***ZERO***  
***NEVER FELT***  
***SO GOOD***

# Ongoing & Future Projects

- End of 2020 – Full transposal of eIDAS Regulation.
- 2020 - Remote Authentication – According to EU standards

---

## II. National Cyber Security Strategy (2019-2025)

---

- By Order no. 173, date 09.11.2018 of Prime Minister, determines NAECCS responsible for leading the inter-institutional working group for drafting the National Strategy on Cyber Security 2019-2025.
- Draft National Strategy on Cyber Security and Action Plan – in process, to be approved on December 2019
- The main objective of Strategy is to ensure safer cyber space within the country and better collaboration with other regional partners.

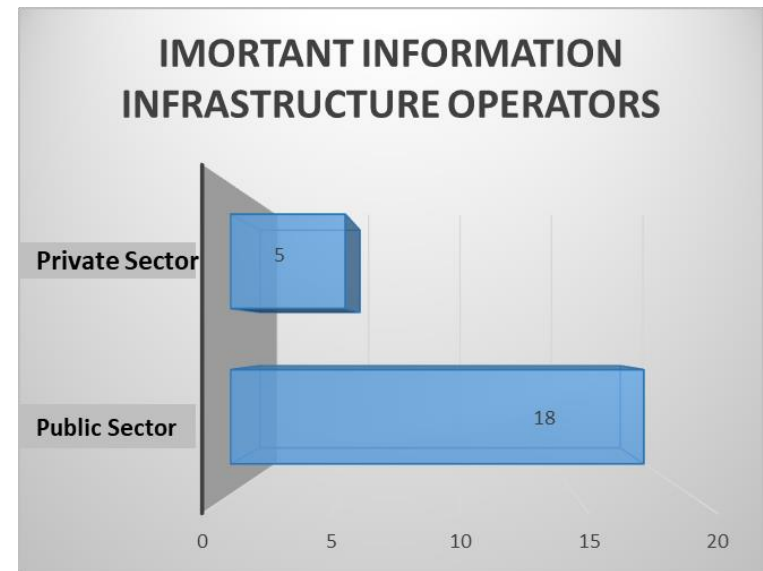

# Critical and Important Infrastructure

## Methodology and blockschema for CII identification

- ❑ Based on ENISA standards
- ❑ Based on DoCM 222,
  - ❑ NAECCS have identified critical & important infrastructure which are object of audit from NAECCS
  - ❑ On December 2019, the list of CII must be reviewed.

# Critical/ Important Information Infrastructures

- **DCoM No 222, Date 26.04.2018** “On approval of the list of critical/important information infrastructures

Critical and Important information infrastructure lists are updated at least **once in two years**, audited by Authority at least **twice a year** (*Information System Audit*)

## Actual projects :

- Assessment of Cyber security situation in Albania :
- ITU study and recommendation to establish National CSIRT
- Oxford University study – about the Maturity level of CS in Albania

## For the near future

- Incident reporting system for CII
  - Capacity Building :
    - Cyber Law International
    - Technical capacities in Cyber Security and Electronic Certification
  - Raising Awareness for population/ businesses/ government

## What NAECCS intend : Role of a National CIRT

- Provide a national mechanism for incident response, coordination, and resolution
- Identify and understand current threat landscape and ensure preparedness by adopting appropriate reactive and proactive measures
- Ensure and maintain the safety and societal wellbeing at all times, particularly in times of crisis
- Provide appropriate capacity building or training programs to ensure practitioners are able to handle and communicate incidents in a professional manner
- Protect essential services and ensure continuity of National CII
- Improve resistance to disruption, breach, damage and loss
- Implement damage control mechanisms for all national ICT assets
- Classify sensitive information based on widely adopted information classification system
- Implement backup, mitigation and recovery plans.

## Benefits of National CIRT

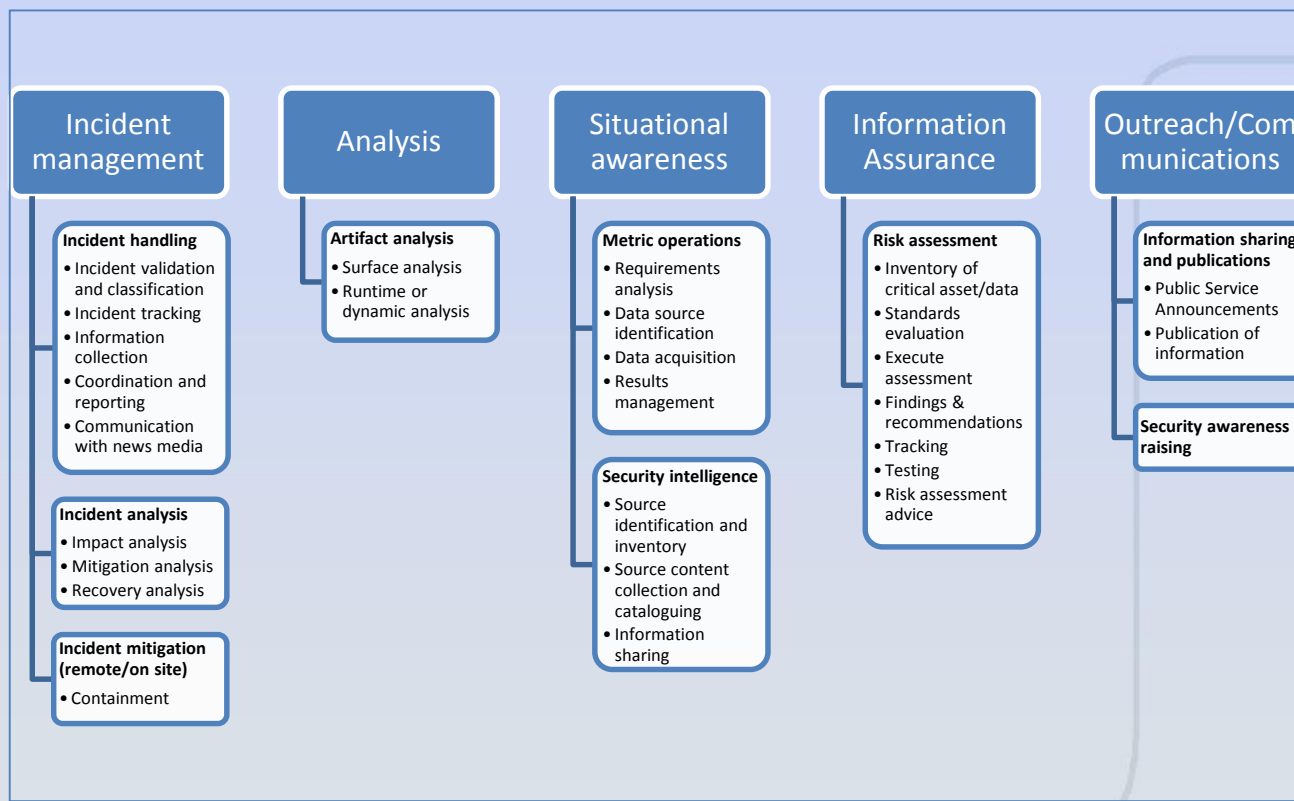

- Mechanism to identify and manage cyber threats that may have adverse effect on the Republic of Albania
- Mechanism to systematically respond to cybersecurity incidents and take appropriate mitigation actions
- Ability for the constituency to quickly and efficiently recover from security incidents and minimize loss or theft of information and disruption of services
- The utilization of information gained during an incident handling activity to better prepare for handling of future incidents and better protect systems and data critical to Albania

## **Benefits of National CIRT (ctd)**

- Mechanism to properly deal with legal issues that may arise during incidents.
- Encouraging knowledge exchange within the constituency and the publication of general security best practices and guidance through publications, websites, and other modes of communications
- The promotion of education, awareness and training appropriate for a variety of different audiences in Albania.
- Coordination of cybersecurity and CIRT focal points both within Albania and internationally.

# Service Model of the National CIRT

# Regional Cooperation – Memorandum of Understanding

---

NAECSC has signed Memorandum of Understanding for cooperation in the field of Cyber Security with:

*National insitution*

- Electronic and Postal Communications Authority (AKEP)
- Commissioner on Personal Data Protection (KMDP)
- State Police

*International relation*

- Kos-Cert
- UBT-CERT
- North Macedonia ( MKD-CIRT)
- Romania (CERT-RO)
- Cyprus CERT

In process: Serbia, Monte Negro, Bosnia & Herzegovina, etc

Being part of international organizations such as ITU, IPROCEED, DCAF, improves and promotes the best practices, gives the possibility for staff capacity building and set Albania as a stronger actor in a world against cyber incidents.

# Additional Activities

---

- NAECCS in partnership with UNICEF and the Ministry of Education Sports and Youth, are developing national campaign on awareness raising and education of children on the use of secure internet
  - 7 Regions - Tirana, Kukës, Dibër, Fier, Berat, Lezhë, Elbasan
  - Over 12 000 children are being trained by “Peer educators”
- Albanian Cyber Academy
- Secure Internet Day
- Needs of Cyber Security Professionals (Curricula, MoU, internships, etc.)
