

Acoustic Accessibility

We create technology to make life easier for people with hearing loss, and to help public institutions and private companies comply with current accessibility legislation.

466 million
of people
with hearing
problems.

1.1 billion
at risk of
hearing loss.

All buildings open
to the public must
be accessible to
anyone.

- Subtitles.
- Audio.
- Sign language.

World Health
Organization

More than 900
million people in
2050

We work with all
types of deafness.

VISUALFY PLACES BOX

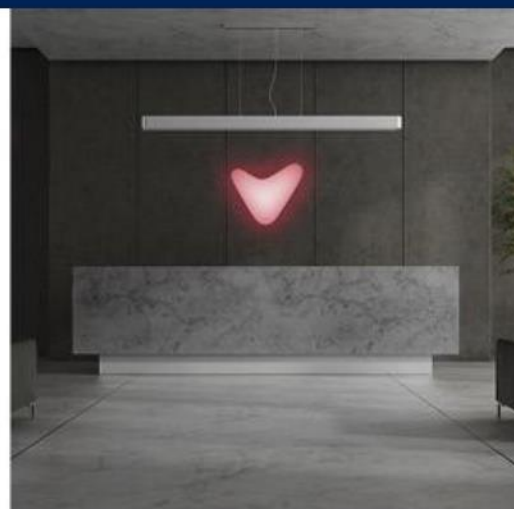

PATENTED

Direct access to Public tenders.

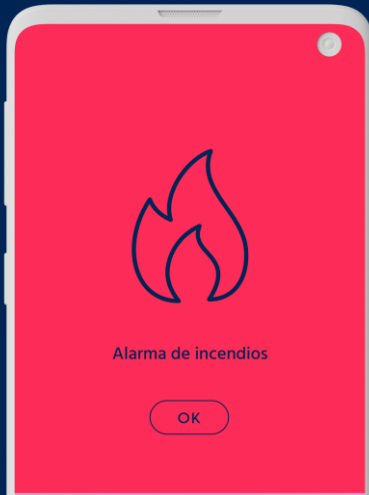

*Audio is processed in our hardware,
never in the cloud.*

SIGNALING LAMPS

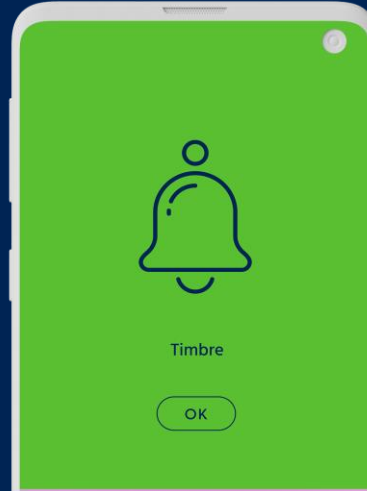

visualfyplaces

AVAILABLE ALERTS

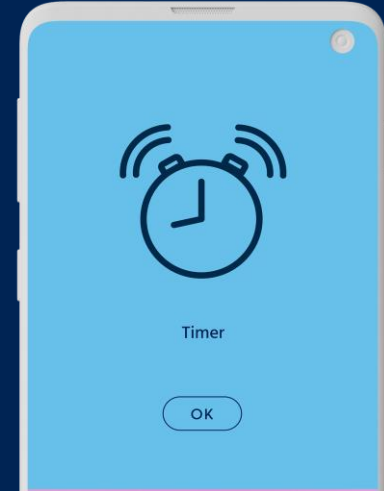

Fire alarm, gas, theft ...

Sound recognition through the AI system for any emergency that happens in the building.

Bells and Visiting Shifts

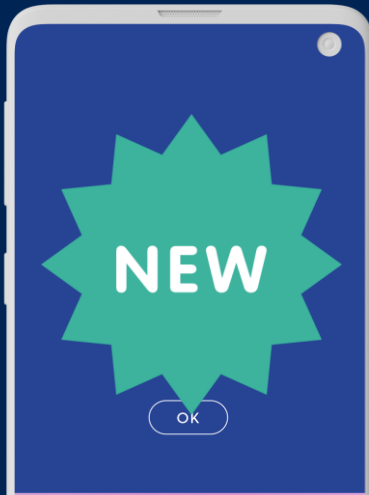

Integrations with the Shift Systems of Hospitals or the Shift Change in offices to guarantee their accessibility.

Reminders and Timer

Through the smartphone and with the Visualfy app installed. Each user can configure alerts for tasks reminders.

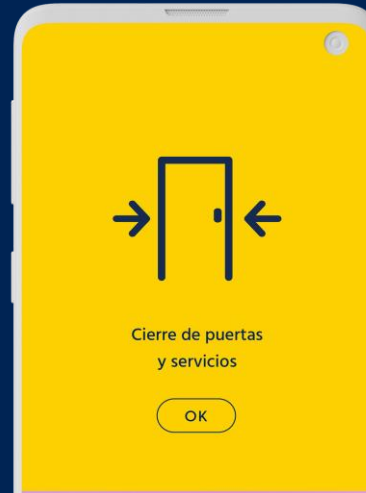

NEW FUNCTIONALITY

Visualfy Connect

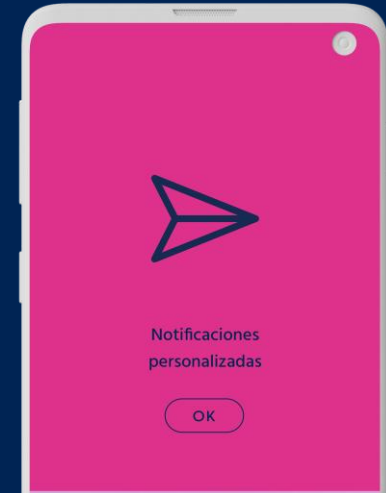

Speech-to-text recognition to break down the new barriers created by face masks that make lip reading impossible for people with hearing loss.

CUSTOM ALERTS

Closing doors or Services

In the web control panel, there is the possibility of configuring alerts for the closing of doors and services.

Custom notifications

In the web control panel, there is the possibility of creating personalized notifications, selecting time, day and periodicity.
