# Policy adaptation – The Digital Child Protection Strategy of Hungary

Spotlight Series on Human-Centric Digital Transformation

**Borbála Timár**

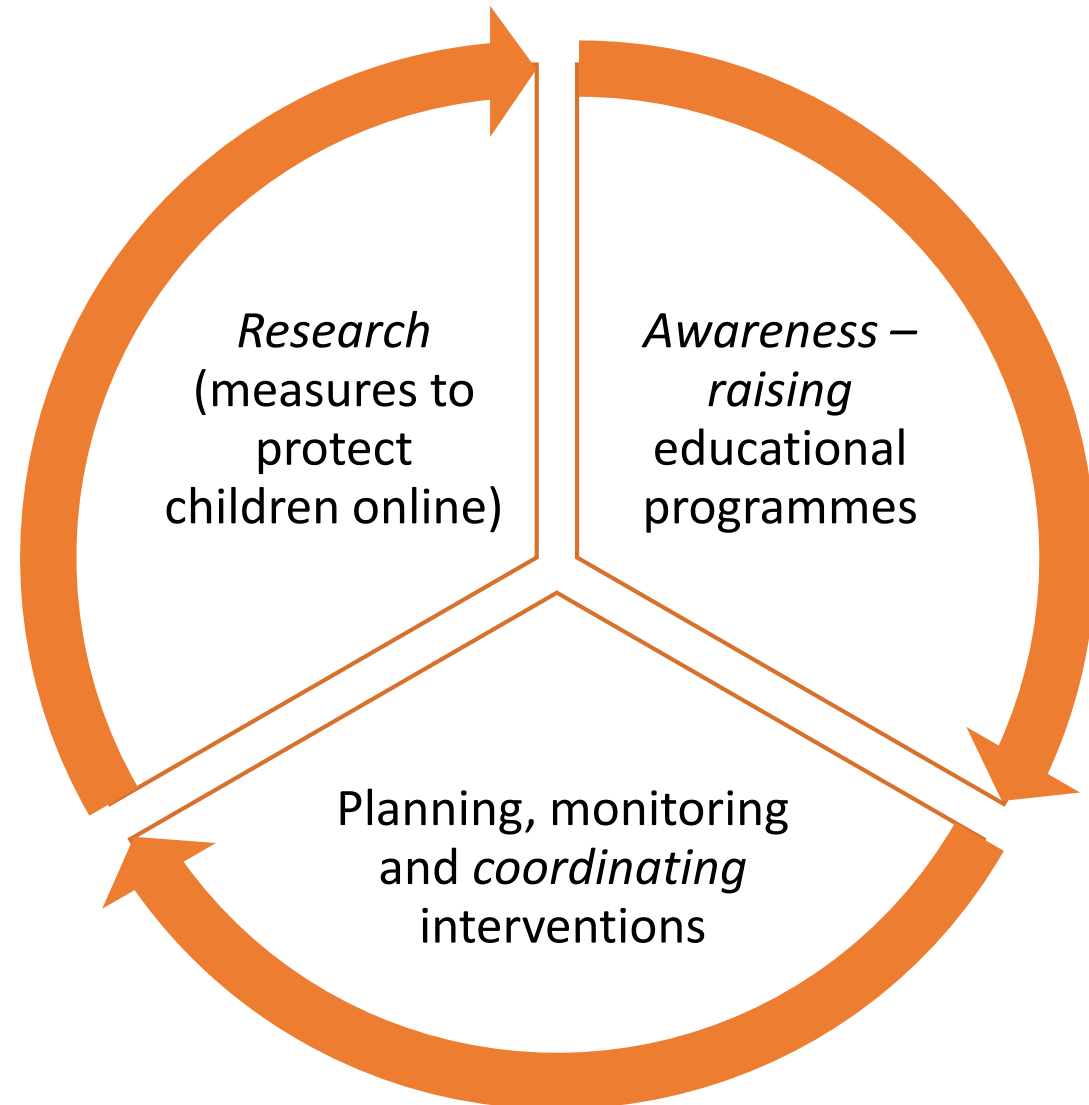

Expert, Digital Child Protection

Governmental Agency for IT Development

10. 09. 2023.

**DIGITÁLIS  
GYERMEKVÉDELEM**

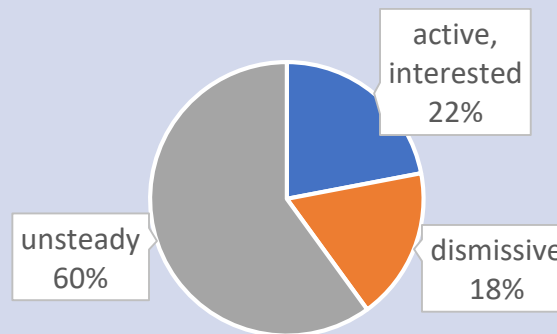

## Main results 1. (Young children and digitalization)

- daily digital media use: 80-90%
- „own” digital device: 30-35%
- lack of norms and digital parenting methods
- lack of educator's awareness and feeling of responsibility

## Main results 2. (Childcare institutions and digitalizations)

- Educator's attitude towards digitalization:

- Lack of technology, training, best practices and motivation
- Diagnostical tool on childcare institution's digital literacy level (devices, attitudes, competences)

## Intervention points

1. Establishment of a dedicated knowledge / research center
2. Revision of the national Kindergarten Education Basic Curriculum
3. Development of a criteria system for a model network and collecting good practices
4. Education / training on digital media literacy for child care institution workers

- **Smart Kindergarten Program**

- since 2018, 414 active webpages
- WSIS Prize nominated, 2022.

Access to information and knowledge, development of digital literacy

- **Digital media literacy for Parents workshops**

- since 2019., over 9.000 participants from the whole country
- „Online with children”
- MOOC course in Hungarian

Digital parenting education

- **Child Online Protection Guidelines in Hungarian**

- „Online with Sango” materials and workshops in Hungarian

ITU – COP principles
