

# Why does e-waste matter? Setting the context

---

The importance of digitalization

Project partners:

# What is digitalization?

*Digitalization refers to spreading, leveraging and using digital and information and communication technologies, tools and processes, to enable, improve and transform a sector (e.g., business). Digitalization thus move beyond digitization which simply refers to converting analog information into digital information.*

Project partners:

# Global average number of selected appliances owned per capita, by country's income level

Setting the context

# Why does e-waste matter?

## The environmental issues of e-waste and the role of statistics

UNITAR – SCYCLE Programme

March 16th, 2022

# Table of contents

1. What is e-waste?
2. E-waste environmental issues and opportunities
3. E-waste key data
4. The role of statistics
5. SCYCLE and the GESP

# What is e-waste?

Temperature exchange equipment

Large equipment

Screens and monitors

Small equipment

Lamps

Small IT and Telecommunication equipment

*EEE: Electrical and electronic equipment (EEE) includes a wide range of products almost any household or business are with circuitry, or electrical components with power or battery supply (Step Initiative 2014).*

*E-waste: refers to all items of electrical and electronic equipment (EEE) and its parts that have been discarded by its owner as waste without the intent of re-use”*

# E-waste environmental issues and opportunities

# E-waste environmental issues

## 1. Hazardous materials in e-waste

*e.g. fridges, phones, laptops, washing machines, sensors, TVs, lamps*

- Heavy metals (such as mercury, lead, cadmium etc.)
- Chemicals (such as CFCs/chlorofluorocarbon or various flame retardants)

## 2. Impact on health

- Exposure to lead
  - Mental development of children, toxic to kidneys
- When burning PVC → dioxins
  - One of the most hazardous carcinogens (cancer)
- Hexavalent Chromium
  - Kidney, liver, DNA
- Brominated Flame retardants
  - Fetal damage
- Cadmium
  - Cancer, toxic to kidneys

# E-waste environmental issues

## Community exposure

- Exposure through food, water, air
- Home based workshops

## Environmental contamination

- Dumping acid used to remove gold into rivers
- Leaching of substances from landfills or stored electronics
- Particulate matter, dioxins, furans from dismantling electronics
- Contaminants entering the water system and food system through livestock, fish, and crops

## Occupational exposure

- Inhaling fumes from burning wires and cooking circuit boards
- Pregnant women working as recyclers – exposure of fetuses

## Children

- Ingesting contaminated dust on surfaces
- Playing with dismantled electronics
- Children and adolescents working in collection, dismantling, and recycling

# E-waste opportunities

## 3. Losses of valuable material

- Precious metals including gold, silver, copper, platinum and palladium
- Valuable bulky materials such as iron and aluminum, and plastics

**\$57 billion USD**  
(2019)

# E-waste opportunities:

- At least 60 elements:

- Base metals (Fe, Cu, Al, etc.)
- Precious metals (Ag, Au, Co, Pd, Pt, etc.)
- Rare earth metals (Dy, Er, Eu, Gd, Ho, La, etc.)
- Plastics (several polymers)
- Glass
- ....

- Hazardous materials

- Mercury
- CFCs
- Lead
- Flame retardants
- ....

# E-waste key data

# Global E-waste Monitor: e-waste quantities

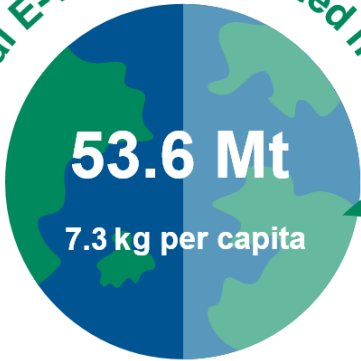

# Global E-waste Monitor: e-waste quantities

-  **0.05 kt**  
amount of mercury from unaccounted flows of e-waste
-  **71 kt**  
amount of Brominated Flame Retardants (BFR) from unaccounted flows of e-waste
-  **+ 98 Mt of CO<sub>2</sub> equivalents**  
potentially released from the inferior recycling of undocumented fridges and air-conditioners

**82.6% of e-waste flows is not documented**

**Global E-waste Generated in 2019**

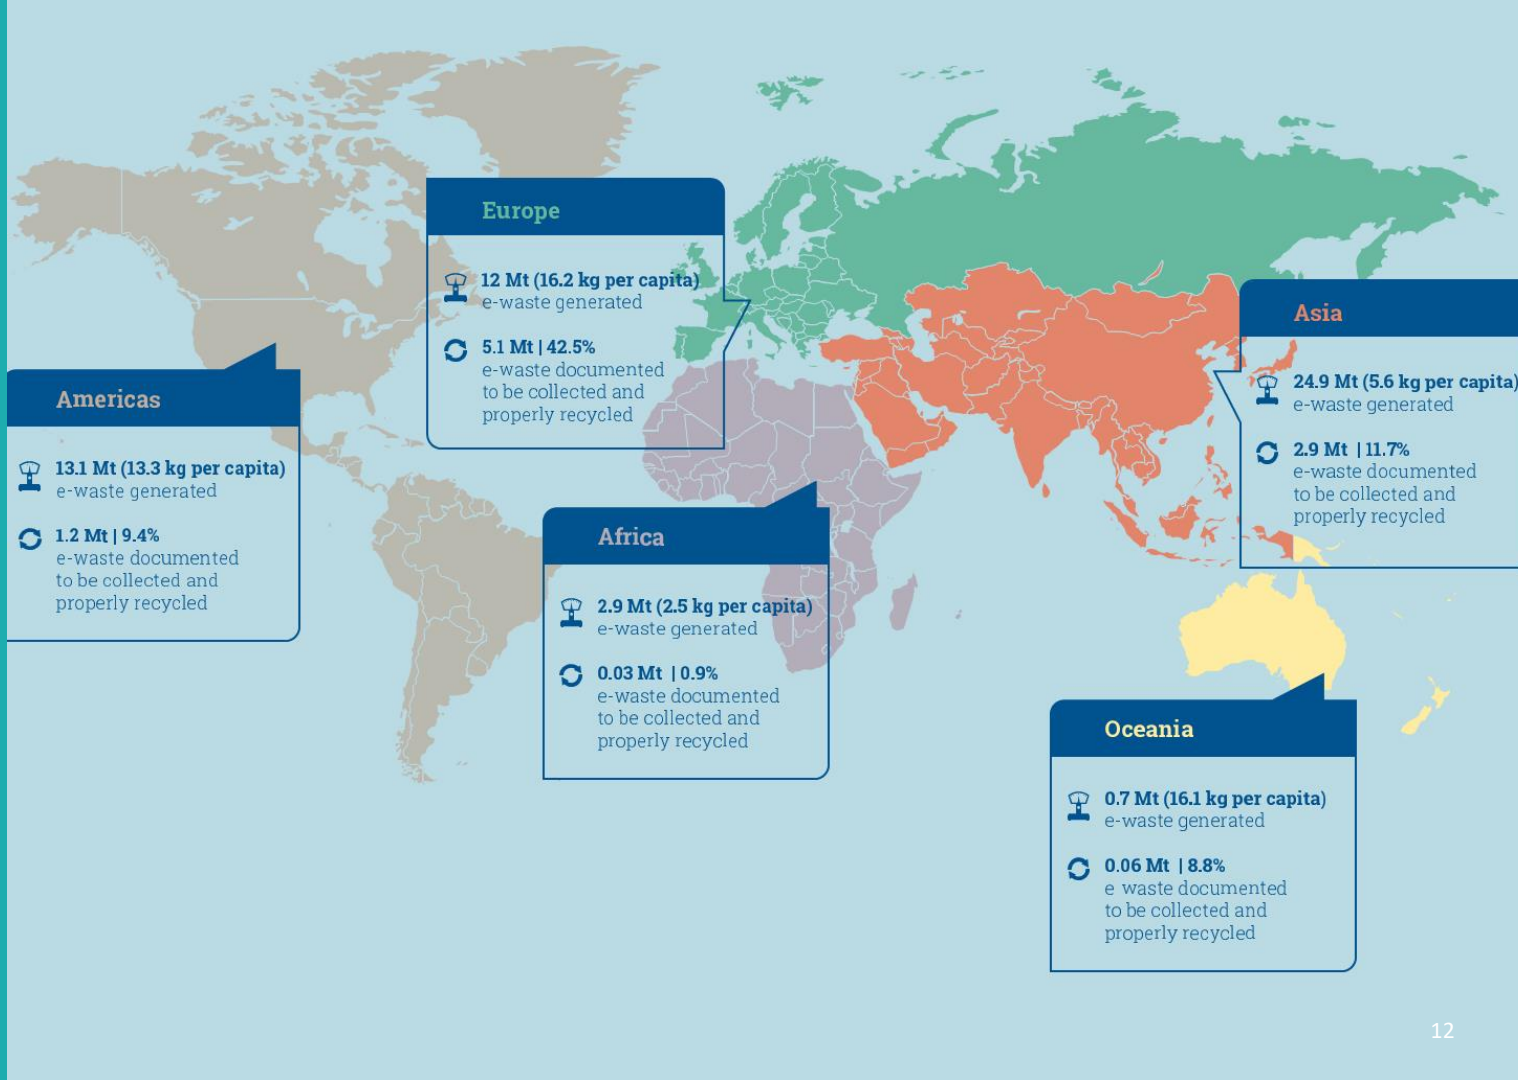

-  **\$10 billion USD**  
potential value that could be recovered
-  **4 Mt**  
estimated amount of raw materials that could be available for recycling
-  **-15 Mt of CO<sub>2</sub> equivalents**  
their reuse as secondary products has helped save up to 15 Mt of CO<sub>2</sub> equivalents emissions

**17.4% documented: collected/properly recycled**

-  **aluminium**
-  **copper**
-  **iron**

# Global E-waste generation

*E-waste status by continent*

## Americas

 **13.1 Mt (13.3 kg per capita)**  
e-waste generated

 **1.2 Mt | 9.4%**  
e-waste documented to be collected and properly recycled

## Europe

 **12 Mt (16.2 kg per capita)**  
e-waste generated

 **5.1 Mt | 42.5%**  
e-waste documented to be collected and properly recycled

## Africa

 **2.9 Mt (2.5 kg per capita)**  
e-waste generated

 **0.03 Mt | 0.9%**  
e-waste documented to be collected and properly recycled

## Asia

 **24.9 Mt (5.6 kg per capita)**  
e-waste generated

 **2.9 Mt | 11.7%**  
e-waste documented to be collected and properly recycled

## Oceania

 **0.7 Mt (16.1 kg per capita)**  
e-waste generated

 **0.06 Mt | 8.8%**  
e-waste documented to be collected and properly recycled

Global E-waste Statistics

# Raw materials, BFR and CO2 eq. in e-waste: regional quantities

## Arab States

IN 2019, E-WASTE GENERATED IN THE REGION CONTAINED:

## CIS + Georgia

THE REGIONAL GENERATED E-WASTE CONTAINS:

## Latin America

THE REGIONAL GENERATED E-WASTE CONTAINS:

# E-waste quantities and recycling rate

## Arab States

**0.1%**

e-waste  
collection rate

## CIS + Georgia

**3.2%**

e-waste  
collection rate

## Latin America

**2.7%**

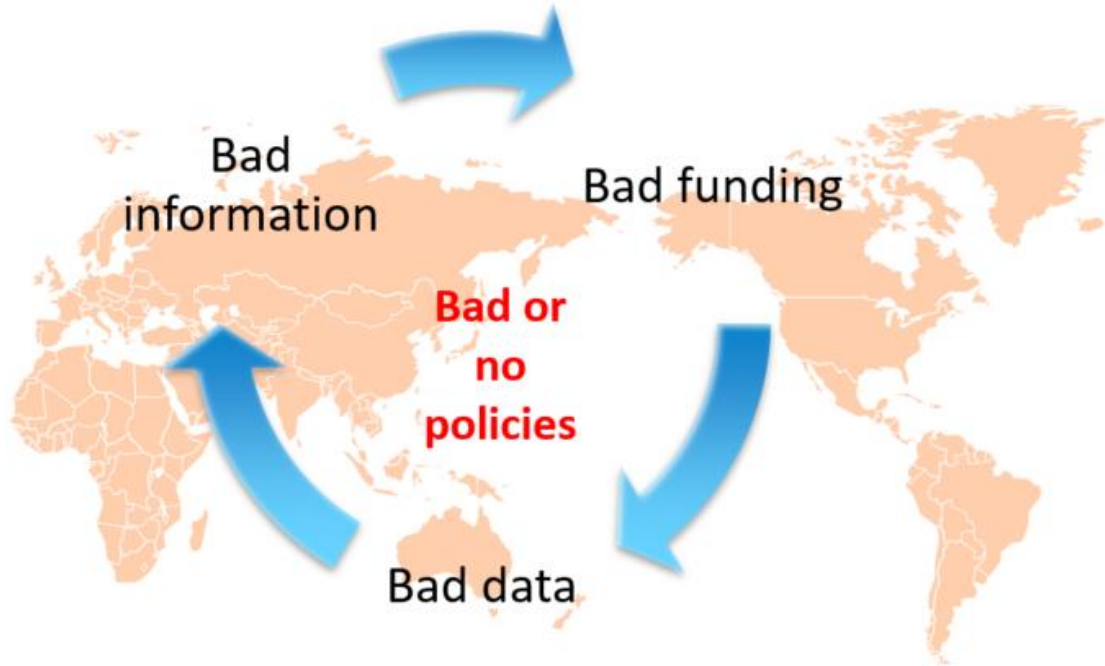

e-waste  
collection rate

# The role of statistics

# Why data are important

- Fast growing problem
- Little data
- Link to existing statistics and e-waste related data
- Needed to capture e-waste most essential features

# Why data are important

- To start addressing the e-waste challenge.
- Evaluate developments over time.
- Set and access targets.
- Identify best practices in policies.
- To improve comparability between countries.
- To serve as the basis for e-waste statistics, e-waste indicators and contribute to the SDGs.

# Harmonized framework to measure e-waste

Quantify the magnitude of the e-waste challenges

Set appropriate collection and recycling targets

National

Establish priorities for policy makers, influencing regulations, and setting policy targets

Allocate adequate financial resources

Reduce e-waste generation

Promote recycling

Global

Prevent dumping and emissions, as well as the improper treatment of e-waste

Create green jobs in the refurbishment and recycling sectors

# Potential achievements

## Some examples

- ❖ Improve the reporting under the Basel Convention
- ❖ Introduce more regulatory tools (e.g. E-waste collection categories, targets, etc.)
- ❖ Create a national baseline for monitoring e-waste over time
- ❖ Comply with the requirements of the EU Directive 2012/19/EU
- ❖ Progressing towards the SDGs indicators

More details later...

# Thank you for your attention!

# SDG Indicator 12.5.1

“National recycling rate, tons of material recycled”

---

Relevance of E-waste data for SDGs

---

- By 2050, the world's population is expected to rise from 7 to nearly 10 billion people, resulting in a significant increase in waste generation, especially in cities.
- However, many countries and cities do not yet have the capacity to properly collect, transport, treat, and dispose of their waste, which can lead to:
  - Spread of disease
  - Flooding from blocked drainage
  - Environmental pollution
  - Emission of Greenhouse Gases
  - Unwanted sights and odours

- The main lifecycle of EEE into e-waste, and the waste management that generally occurs, can be summarized into 4 distinct phases:

Phase 1: Market Entry

Phase 2: Stock

Phase 3: E-waste Generated

Phase 4: E-waste Management

- “E-waste is a growing global challenge that poses a serious threat to the environment and human health worldwide”, said Stephan Sicars, Director of the Department of Environment at the UN Industrial Development Organization.
- The world produces as much as 50 million tonnes of electronic and electrical waste (e-waste) a year, weighing more than all of the commercial airliners ever made. Only 20% of this is formally recycled.

The production of the E-waste data using global agreed methodology will:

- Enhance visibility of the waste management policy at national, regional and global levels
- Support Policy Makers at national level to build sustainable waste management focusing on reducing waste generation through prevention, reduction, recycling and reuse
- Reduce the data gap by enabling countries to report to Multilateral Environmental Agreements (MEAs) and to the 2030 Agenda for Sustainable Development
- Provide comparable analysis about the status of E-waste at regional and global levels

# Regional E-waste Monitor for the Western Balkans

## Project Overview

Project partners:

# The Global E-waste Statistics Partnership

## Global E-waste Database

Collecting country data and building a global e-waste database to track changes over time.

## Creating Awareness

Enhancing understanding, interpretation of global e-waste data.

## Capacity Building

Building national and regional capacity to help countries produce reliable and comparable e-waste statistics.

## Monitor E-waste Streams

Monitoring e-waste streams to inform the SDGs 11.6 and 12.5 and track the ITU Connect 2030 target 3.2.

# Project background

- Provide technical assistance to 5 Western Balkan countries to assess e-waste statistics, e-waste management practices and the e-waste legislation landscape to produce a Regional E-waste Monitor report.
  - [Albania, Bosnia and Herzegovina, North Macedonia, Montenegro and Serbia.](#)
- Internationally comparable e-waste statistics and information on e-waste management in the Western Balkans is limited.
- Within the framework of data and statistics support provided by the Global E-waste Statistics Partnership.
- Builds foundations for making digitization and digitalization processes green and sustainable.

Project partners:

# Project aims and objectives

Project **aims** to collect statistics, map the situation of e-waste management and legislation in the beneficiary countries as well as build subregional capacities in the field of e-waste monitoring and reporting.

The project has the following **objectives**:

- Train National Focal Points to produce e-waste data for monitoring of SDG 12.5.1.
- Access recycling opportunities from e-waste, pollutants and e-waste related health effects to help identify and share best practices in the region.
- Contribute to the development of internationally comparable e-waste statistics.
- The Regional E-waste Monitor will:
  - Analyse trends in transboundary movement of e-waste.
  - Inform policy makers, industries, and business about regional e-waste data.
  - Support the development of national and regional counter-measures through policies, regulations, awareness raising and industrial response.

# Project activities

# Project activities and expected roles

## Objectives

- Produce the regional e-waste data set for the Western Balkans;
- Enhance the understanding and interpretation of regional e-waste data for policymakers, industries, and businesses which in turn will allow relevant stakeholders and the general public to be better informed about the e-waste challenge in the region;
- Train national focal points of each of the five beneficiary countries to produce e-waste data for the SDG 12.5.1 monitoring.

## Expected roles

- Take part in the online training;
- Engage additional relevant stakeholders in the training;
- Circulate key information among the team members;
- Support the elaboration of data set through data collection and estimation, including by contacting relevant national institutions;
- Anchor data collection practices in the institutional setting.

# Project activities and expected roles

## Objectives

Assessment of the status of e-waste legislation, statistics and e-waste management.

## Expected roles

- Identify relevant stakeholders to take part in the questionnaire/ interview;
- Take part in the questionnaire and/or liaise with necessary stakeholders to provide the information;
- Take part in interview and/or facilitate contact with relevant national focal points and setting of interview.

# Project activities and expected roles

## Objectives

Receive approval on the inclusion and interpretation of the data in the country profiles.

## Expected roles

- Validate the data, including through liaising with relevant national stakeholders;
- Take part in the remote one-to-one virtual validation meeting.

# Project activities and expected roles

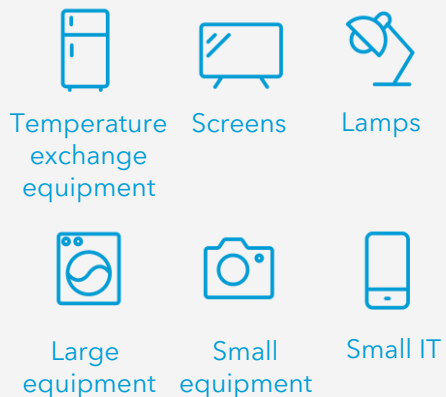

## Objectives

- Drafting, final review, publication and launch of the Regional E-waste Monitor: Western Balkans report;
- Make the data available on the website of the Global E-waste Statistics Partnership;
- Raise awareness of stakeholders on e-waste, related challenges and opportunities.

## Expected roles

- Take part in the different meetings;
- Final validation of the Report;
- Inform national stakeholders of the report's launch and related materials (i.e., publication on website, relaying of information through social media channel or newsletter etc.);
- Identify relevant stakeholders to be invited to the launching events.

# Project impact

The 6 categories of EEE commonly referred to in regulation that end as e-waste.

- Help to improve data availability and quality.
- Produce internationally comparable e-waste statistics.
- Assist the beneficiary countries in making digitalization policies and strategies green and sustainable as well as based on evidence.
- Increase regional capacities on e-waste statistics for government officials, statisticians and other stakeholders such as industry essential for the sound environmental management of e-waste.
- Alignment with EU standards within the framework of the pathway towards EU accession.

# Overview of the project, main milestones and roles and responsibilities

UNITAR – SCYCLE Programme

March 16th, 2022

# Table of contents

1. Training workshop on e-waste statistics and data collection;
2. Elaboration of the country profiles and example from previous monitors;
3. Elaboration of the Regional E-Waste Monitor report;

What's next?

# *... Training workshop on e-waste statistics and data collection*

Worldwide  
data  
harmonization  
by the GESP

*Regions that participated in e-waste statistics workshops between 2017 and 2020:*

# Information on the training workshop

- 3 days workshop
- April
- Remote setting
- Platform: Zoom
- What to bring: laptop with a recent version of MS Excel, PowerPoint and Word

# Topics covered

- E-waste and its challenges
- General principles of e-waste statistics
- How to quantify EEE put on the market and E-waste generated
- E-waste Toolkit: what it is, how to use it
- How to quantify the e-waste flows
- National roadmap to produce e-waste statistics

# Preliminary draft agenda

Draft version

## Day 1

Time	Presentation	Speaker
9.00-9.20	Welcome remarks and platform instructions	UNITAR, ITU, UNEP
9.20-9.30	Roundtable introduction	All
9.30-9.45	Agenda of the online workshop and workshop objectives	UNITAR
<b>Session 1: General principles on e-waste statistics</b>		
9.45-10.15	General introduction to e-waste	UNITAR
10.15-11.00	Initial assessment of the e-waste situation and data in the countries	Delegates
<b>Break</b>		
11.15-11.45	General principles of e-waste statistics	UNITAR
11.45-12.15	How to determine EEE Put on Market and E-waste generated	UNITAR
12.15-13.10	Activity 1: availability of country EEE POM and E-waste generated data - trade statistics (import, export), sales, stocks, lifetimes & how to get data	Delegates
13.10-13.20	Open discussion	All

## Day 2

Time	Presentation	Speaker
9.00-9.15	Recap from Day 1	UNITAR
<b>Session 2: E-waste Toolkit</b>		
9.15-9.45	E-waste Toolkit: EEE Put on Market Tool	UNITAR
9.45-10.15	Activity 2: on how to use the EEE Put on Market Tool	Delegates
10.15-10.45	E-waste Toolkit: E-waste Generated Tool	UNITAR
<b>Break</b>		
11.00-11.45	Activity 3: on how to use the E-waste Generated Tool	Delegates
11.45-12.15	Overarching questions and tips on how to use the E-waste Toolkit	UNITAR
<b>Session 3: E-waste flows</b>		
12.15-12.40	E-waste collected and recycled	UNITAR
12.40-13.20	E-waste imports and exports	UNITAR
13.20-13.30	Wrap-up	UNITAR

## Day 3

Time	Presentation	Speaker
9.00-9.15	Recap from Day 2	UNITAR
9.15-10.00	Activity 4: availability of country data & how to get data (from formal and informal sector)	Delegates
10.00-10.15	Open discussion	All
<b>Break</b>		
<b>Session 4: E-waste Roadmap</b>		
10.30-11.30	Development of a roadmap to produce e-waste statistics	Delegates
11.30-12.30	Presentation on the roadmap developed	Delegates
12.30-13.00	Recommendations and next steps	UNITAR, ITU, UNEP
13.00-13.15	Closure	UNITAR, ITU, UNEP

# Training material

- *E-waste Toolkit*

- 1) *EEE Put on the Market Tool (Excel file)*
- 2) *E-waste generated Tool (Excel file)*
- 3) *Manuals on the use of the tools*
- 4) *[E-waste statistics guidelines](#)*

- *PowerPoint presentations*

## Objectives of the training

- Build **national capacity** and skills in **e-waste statistics principles** and core indicators,
- Improve the quality, understanding, collection and interpretation of **e-waste data**,
- Support the independent production of **internationally comparable e-waste statistics** in the region,
- Contribute to the achievement of the **SDGs**,
- Bringing together different stakeholders to **enhance national and international cooperation** and collaboration,
- Make a **roadmap** for compiling e-waste statistics in the region.

## Questionnaire

### Questionnaire on e-waste statistics, legislation, management and transboundary movement

Country:	
Respondent:	
Contact:	
Institution:	
Current version:	February 2022
Responsible:	Giulia Iattoni (giulia.iattoni@unitar.org)

### Goal

The aim of this questionnaire is to communicate the current status of e-waste statistics, legislation and management in the country.

### Contents

Sheet name	Contents
Glossary	Definitions of e-waste terms
E-waste Statistics	Summary of e-waste statistics in the country
E-waste Legislation	Questions related to the country's legislation on e-waste in the country
E-waste Management	Questions related to current practices of e-waste management per country
E-waste TBM	Questions related to the status of transboundary movement of e-waste (and used EEE) in the country
General questions	More general questions on projects/initiatives/studies on e-waste in the country, personal views etc.
UNU-KEY Correlation	Correlation table between UNU-KEYs and the e-waste categories

Questionnaire developed by

In the framework of the *Regional E-waste Monitor for the Western Balkans* project

For more information on UNITAR SCYCLE's activities, please refer to:

[www.globalewaste.org](http://www.globalewaste.org)  
<https://www.scycle.info/>  
<https://ewastemonitor.info/>

## Content of the questionnaire

- 1) **Glossary:** univocal definitions of some essential concepts (EEE, POM, formal and informal sectors, etc.)
- 2) **E-waste Statistics:** generation, import, export and recovery of e-waste per year.
- 3) **E-waste Legislation:** presence, extent and scope of e-waste legislation in the country regarding management, import and export, and agencies in charge for it.
- 4) **E-waste Management:** current practices and recycling capacity of the country in the formal and informal sectors.
- 5) **Transboundary Movement:** status of transboundary movement of e-waste (and used EEE) in the country
- 6) **General questions:** projects/initiatives/studies on e-waste in the country, personal views etc.
- 7) **UNU-KEY Correlation:** description and link with the EEE categories under EU-6 and EU-10.

What's next?

# ... *Five country profiles*

# Examples of country profiles

## Kazakhstan

**Country:** Kazakhstan

18.7 million inhabitants  
2,725,000 km<sup>2</sup>  
Borders: China, Kyrgyzstan, Russia, Turkmenistan, Uzbekistan  
GDP per capita PPP: \$24,904 USD  
Average household size: 3.5 members

**Legislation:**  
 ●●● Advanced  
 ●● Transition  
 ● Basic

**Legend:**  
 ●●● Advanced  
 ●● Transition  
 ● Basic

**National legislation on e-waste:**

Extended Producer Responsibility:  Introduced in January 2014  
 National e-waste standards:  On management safety requirements (draft)  
 E-waste collection target:  Min. 30% of the EEE POM in 2021  
 Legislation product coverage in UNU-KEYs: 35 of 54  
 Legislation product coverage in weight (%): 77% on total and per category

84% 100% 12% 82% 40% 100%

**International Conventions:**

	Signature	Ratification/Accession	Entry into force
Basel Convention	-	03/06/2003	01/09/2003
Rotterdam Convention	-	01/11/2007	30/01/2008
Stockholm Convention	23/05/2001	09/11/2007	07/02/2008
Minamata Convention	-	-	-

**EEE POM (2019):** 221.6 kt, 11.8 kg/inh.

**E-waste generated (2019):** 136.1 kt, 7.3 kg/inh.

**E-waste managed environmentally soundly (2019):** 11.9 kt, 0.6 kg/inh.

**Formal/environmentally sound e-waste management system in place:**

4 licensed organisations specialised in e-waste collection and 22 enterprises having e-waste collection points.  
 30 treatment/recycling enterprises for treating and recycling e-waste.  
 15 cities covered.

## Sudan

**Country:** Sudan

43 222 000 inhabitants  
1,886 million km<sup>2</sup>  
Borders: Egypt, Eritrea, Ethiopia, the Central African Republic, Chad, Libya, South Sudan and the Red Sea

**National legislation on e-waste:**

Extended producer responsibility:   
 National e-waste standards:   
 E-waste collection target:   
 Product coverage in UNU-KEYs: 0 of 54  
 Product coverage (% weight) of total and per category: 0%

**International Conventions:**

	Signature	Ratification/Accession	Entry into force
Basel Convention	-	9 January 2006	09 April 2006

## Peru

**Country:** Peru

32.5 million inhabitants [28]  
1,285,220 km<sup>2</sup>  
Borders: Ecuador, Colombia, Brazil, Bolivia (Plurinational State of), Chile, Pacific Ocean  
GDP per capita PPP: \$13,416 USD [29]  
Average household size: 3.8 members [30]

**Legislation:**  
 ●●●● Advanced  
 ●●● Transition  
 ●● Basic

**National legislation on e-waste and POPs:**

Extended Producer Responsibility:  Introduced in 2017  
 National e-waste standards:  Introduced in 2012, on the generation, collection, classification, storage, and treatment of screens  
 National standards for POPs contained in e-waste:  In development  
 E-waste collection target:  For some collection categories  
 Legislation product coverage in UNU-KEYs: 17 of 54  
 Legislation product coverage in weight (%): 6% on total and per category

0% 2% 0% 1% 1% 1%

**International Conventions:**

	Signature	Ratification	Entry into force
Basel Convention [31]	-	23/11/1993 (a)	21/02/1994
Rotterdam Convention [32]	11/09/1998	14/09/2005	13/12/2005

# Country profiles validation

**Your role is key!**

## VALIDATION PHASE

- ✓ Support in data collection (e.g. questionnaire, interviews, etc.)
- ✓ Experiment with UNITAR-SCYCLE harmonized e-waste methodology after the training
- ✓ Review the information reported in the country profiles

What's next?

Statistics

# Outline of the Monitor (draft)

## Monitor Features

---

### 1. What is E-waste?

Definition, product categories, disposal routes, key issues

### 2. Methodology

Statistics, Management Assessment, Sources

### 3. Regional Overview Legislation and Systems

Status, International Agreements, Stakeholders, Projects

### 4. Statistics

EEE POM and E-waste Generated, Categories, ESM

### 5. Transboundary Movement

Policies, Quantities, Issues and Impacts

### 6. Management Assessment

Comparative Performance Review

### 7. Common Issues

Five Driving Reasons

### 8. Recommendations

### 9. Country Profiles

## Purpose of the Monitor

- Allow relevant stakeholders and the general public to **be more informed** about e-waste challenges in the region;
- Provide an **updated overview of the key e-waste statistics** and indicators per country and at regional level;
- Evaluate the **transboundary movement** of e-waste by estimating quantities and providing an overview of import&export legislation and policies;
- Help to **map** the key **e-waste stakeholders**, the status of e-waste **legislation**, and **recycling opportunities** from e-waste in the region.

# Successful stories

Surveys system of the country was updated and the results validated through the data obtained by the project – *Environment Statistics Division*

The outcome of the project contributed to the development of the National E-Waste Statistics Report (2019), the first-ever analytical report on e-waste in Tanzania – *National Bureau of Statistics*

Uses the results from the project for Basel Convention and Stockholm Convention (POPs) reporting, and OECD surveys.

Successfully calculated national e-waste data in accordance with the requirements of Directive 2012/19/EU and the Council of July 4<sup>th</sup> 2012 on Waste Electrical and Electronic Equipment – *Agency of Statistics*

E-waste study was published on the government website, and a law was developed to include guidelines on e-waste management, and introducing the EPR and the concept of circular economy.

As a result of the project, e-waste recyclers and collection points in the country were mapped to develop a user platform.

# Some of the project key results

RESULT 1: **FIVE COUNTRY PROFILES ELABORATED**, WHICH INCLUDES AN ASSESSMENT OF THE STATUS OF E-WASTE LEGISLATION AND E-WASTE MANAGEMENT USING DESKTOP RESEARCH, QUESTIONNAIRES AND FOLLOW-UP INTERVIEWS

RESULT 2: **FIVE NATIONAL STATISTICAL OFFICES (NSO) TRAINED** TO PRODUCE A REGIONAL E-WASTE DATA SET FOR THE WESTERN BALKANS, INCLUDING ESTIMATES WHERE DATA MAY NOT BE AVAILABLE.

RESULT 3: **VALIDATED PROFILES FOR THE FIVE COUNTRIES** BY NSO THROUGH ONLINE ONE-TO-ONE FOLLOW-UP WITH EACH OF THE FIVE COUNTRIES.

RESULT 4: **REGIONAL E-WASTE MONITOR FOR THE WESTERN BALKANS REPORT** FEATURING COLLECTED DATA AND PUBLISHED ON THE WEBSITE OF THE GLOBAL E-WASTE STATISTICS PARTNERSHIP.

**Let's create  
together a  
better picture of  
the e-waste  
situation in the  
Western  
Balkans to  
tackle the issue!**

# Regional E-waste Monitor for the Western Balkans

---

Promotional and awareness  
campaign & launching event

Project partners:

# Promotional and awareness campaign & launching event

Project overview

**Date:** October 2022 - July 2023

## Promotional campaign:

- Make the data available on the website of the Global E-waste Statistics Partnership;
- Elaboration of a Story Map which constitutes an online interactive tool;
- Promotion on relevant webpages and social media channel.

## Regional launching event of the Report:

- Regional briefing
- **Objectives:**
  - Present to the regional community the outcomes of this study and to generate concrete impact at the country level by pinpointing key gaps, stimulating the discussion on country level needs;
  - Showcase the importance of addressing e-waste and the role of statistics in that sense;
  - Illustrate the way forward for acting at the country level.
- **Audience:** Open event targeting partners at the national and regional levels, relevant EU structures, the Donors community as well as all interested stakeholders.

Project partners:

# Promotional and awareness campaign & launching event

Project overview

## National Awareness raising workshops (April-July 2023)

**Focus:** Providing a deep dive into the country's situation by showcasing the findings of the Report.

### Objectives:

- Lay the basis for concrete follow-up at the country level;
- Create momentum in the ICT sector and space for pursuing impact-generation initiatives at the national level;
- Specific objectives include:
  1. Presentation of the key national and sub-regional trends as well as potential initiatives to be leveraged related to e-waste;
  2. Discussion on the outstanding challenges to identify priority areas to be addressed;
  3. Identification of the type of support needed and expertise to be leveraged for potential future assistance or initiatives.

**Audience:** National stakeholders relevant to the e-waste sector: Ministry of ICTs, Ministry of Environment; National Statistical Office; the private sector, including recyclers and operators; the national donors community; EU Delegation; UN Country Teams; Customs; others.

# Next steps

---

Questionnaire and online trainings

Project partners:

# Next steps

## Questionnaire

- The questionnaire to collect information on the status of e-waste and collect e-waste related data;
- Identify relevant stakeholders to take part in the questionnaire;
- Take part in the questionnaire and/or liaise with necessary stakeholders to provide the information;
- Take part in one-to-one discussion and/or facilitate contact with relevant national focal points.

## Online training

- Information on the training will be sent by UNITAR (save the date – Online training expected by the end of April);
- Take part in the online training;
- Engage additional relevant stakeholders in the training;
- Circulate key information among the team members;
- Support the elaboration of data set through data collection and estimation, including by contacting relevant national institutions.

**Thank you!**
