

WORLD BANK AND INTERNATIONAL TELECOMMUNICATION UNION (ITU) Moving the Regulatory Cursor for Digital Regulation

Konstantinos Masselos

President

**Hellenic Telecommunications & Post Commission
(EETT)**

Greece

Professor Konstantinos Masselos has been appointed as the President of the Hellenic Telecommunications & Post Commission (EETT) in February 2018.

In 2006 he joined University of Peloponnese, where he is currently a Professor in the Department of Informatics and Telecommunications and the leader of the computer systems research team. He served as Rector of the above university the period 2012-2017. He was also Head of the Department of Computer Science (2009-2011), Vice Rector (2010-2012) and Head of the Research Committee (2010-2013).

During the period 2010-2016, he served as Honorary Lecturer in the Department of Electrical and Electronic Engineering, at the Imperial College London. Also, from 2005 to 2008, he was Lecturer in digital systems at the same university. From 2001 to 2004, he joined Intracom Telecom SA, Greece, where he was involved in research and development projects regarding wireless communication systems.

He has been involved in several research and development projects and has consulting experience in various industries, start-up companies and public organizations. Since 2005 he is also regularly involved as an expert in different European Commission units. He was member of the Scientific Committee of European Cooperation in Science and Technology (COST) organization from 2015 to 2017.

His main research interests include compilers, High Level Synthesis (HLS), FPGAs, high performance computing and computing systems for space. He has authored more than 120 papers in international journals and conferences.

Professor Konstantinos Masselos received his first degree in Electrical Engineering from the University of Patras, Greece (1994) and an MSc in VLSI Systems Engineering from the University of Manchester Institute of Science and Technology, United Kingdom (1996). In April 2000 he received a PhD in Electrical and Computer Engineering from University of Patras, Greece in cooperation with the Inter-university Micro Electronics Centre (IMEC) in Belgium, where he was a researcher from 1997 to 1999.
