THE RISE OF LINEAR TV AMID COVID-19 OUTBREAK IN LEBANON (IPSOS)

- Linear TV has gained its momentum back in the quarantine period, with more viewers in Lebanon.
- The average time of viewing TV has increased by 21% across local TV and satellite TV.

Pre-Quarantine Period: 8 to 14 of March
Quarantine Period: 15 - 21 of March
How are broadcasters responding to the situation?

1. Keeping us up to date with what’s happening

- Daily updates and special reports
- Live-streamed reporting
- Breaking news coverage
- Daily interviews with elected officials and public-health experts
- Regular announcements to educate citizens to stay healthy
How are broadcasters responding to the situation?

- Launching new shows
- Concerts to raise funds
- Celebrations of the health care professionals on the front lines
- New more family-friendly content

Keeping us entertained and distracted
How are broadcasters responding to the situation?

3

Rapidly adjusting their calendars and adapting operations and programming

- Shows recorded without its studio audience
- Changes to their operations to abide by social distancing
- Educational programming
- New programs to support faith communities
Educational TV in the time of COVID-19

COVID-19 Impact on Education

Global monitoring of school closures caused by COVID-19

Visualization of evolution over time.

25/04/2020

1,568,452,265 affected learners
89.6% of total enrolled learners
185 country-wide closures

Source: UNESCO
Various appropriate tools for online and distance learning used in many countries

- Smartphones, tablets, computers
- A fast internet connectivity

Given the digital divide, access to technologies for remote learning varies widely both between and within countries

Students aged 5-17 years with internet access at home

Educational TV in the time of COVID-19

Percentage of countries using remote learning delivery channels

Educational TV in the time of COVID-19

https://en.unesco.org/covid19/educationresponse/nationalresponses

Regional responses
Dedicated pages present responses proposed at regional level:
- Arab States
  - Alternative solutions to school closures in Arab countries to ensure that learning never stops
  - Motivating and supporting children during remote learning: tips for teachers and parents
- Asia-Pacific
- Latin America and the Caribbean

Malawi, Rwanda, Syria, Timor-Leste, Côte d’Ivoire, Vietnam, North Macedonia, …
Since the lockdown was imposed, The central government started online lessons through social media and other online platforms (Diksha, Swayam,...). Large number of parents in rural areas do not have smartphones and those with smartphones are facing net connectivity issues. The State of Punjab decided to telecast lessons through free to air television channels by adding ETV content to Doordarshan in response to the crisis.
Education programs on DTH platform in Punjab, India (2/2)

- Each lecture: a mix of videos, images, quizzes, games, exercise and feedback.
- The free-to-air channel available on DD Direct DTH and all the leading DTH service providers.
- With this facility, over 1M students of Classes III to V and over 600000 students of Classes IX and X studying in government or aided schools get education.

More accessible

- About two-thirds of all Indian households and a little less than one-third of the poorest households own a TV (According to the latest NFHS and IHDS surveys)

Easier to produce

- A large amount of high-quality content already exists

Easier to share

- 37% of households without a TV report that their children watch TV at a neighbour's house
Why Radio during COVID-19?

Radio broadcasts are a useful means to share public information especially to the most remote populations. In rural Africa, people depend on it as their primary source of information.

Radio: An essential service during COVID-19
And it really WORKS!!
How Radio in Burkina Faso is responding to COVID-19?

- Adapting their programming and station policies
- Dedicating five minutes at the beginning of each program to COVID-19
- Short bulletins talk about preventing transmission, symptoms, and other basic information about COVID-19
- Broadcasting “COVID info” for 30 minutes every Saturday in French, then during the week in Mooré, Dioula, and Buamu
- During “COVID info,” listeners can call a WhatsApp number to ask their questions to an expert on-air

Burkina Faso: one of the champions of sub-Saharan Africa when it comes to listening to radio
More than 154 active radio stations, 51 of which are community stations, 40 commercial
Important medium to reach populations – often with low levels of literacy – living in remote areas, far from towns and cities

Coverage of the main Community Radios

Since the announcement of the CORONAVIRUS in our country, RADIOS are now selling like hotcakes because there is a need for information. The people of the villages have only the RADIO to inform themselves.

Head of programs at radio Loudon Sapouy, Burkina Faso
Lessons Learned During the COVID-19 Pandemic

- Vital role of FM and TV broadcasting: source of information to increase our chances of survival
- Broadcasters Struggling to Survive the COVID-19 Crisis: Actions needed to support them
- Educational TV Experience
  - No Success without COLLABORATION
  - Distance Education has to be a “MUST HAVE”
  - Accelerating CONNECTIVITY is a priority
Thank You for your attention!
