Web Dialogue: ITU-D Study Groups Public Webinar on New E-health Solutions to Combat Pandemics with ICT

PRESENTATION ABSTRACT

Medical Image AI Trial in India

PRESENTATION ABSTRACT

NTT DATA Corporation is promoting AI solution for chest X-ray image to support radiologist and in this session we will introduce trial project to develop the use case of medical image AI technology in collaboration with hospital in India. This solution uses AI technology to analyze a patient's medical images in order to assist doctors with their diagnoses, while also enhancing the efficiency of triage and other management practices. The system builds on existing technology to provide support for coronavirus diagnoses using the same diagnostic process.
