

C&I Training for AFR
Regulatory framework and practical EMC tests
22-26 May 17

Case Study - Ethiopia

The MCIT has the responsibility to ensure the standards and quality of service and ICT equipment

The ICT standards and regulation directorate is composed of 3 teams

- Telecom team
- IT teams
- Post team

The telecom care team consists of

- Type approval care team
- Quality of service care team
- Frequency monitoring care team
- Licensing care team

The type approval care team conducts type approval based on individual applications submitted direct to their office specifying:

- Type
- Brand
- Model

And customs declaration with airway bill and bill of lading

If it is found the compliance with the technical standard an import letter is issued, if not, a report letter is given to the applicant

Challenges

- No any type of testing laboratory
- No any mechanism to verify the correctness of technical specifications
- Submitted by applicants
- Lack of trained personal
