

# **5G for PSM**

## **Incentives and Pitfalls**

**Roland Beutler, SWR**

# **My Claims:**

- 1. All-IP along the entire media value chain**
- 2. User behaviour is changing**
- 3. Bi-directional communication is key**
- 4. Mixture of different broadband networks (fibre, sat, FWA, ...)**
- 5. Radio links will be based on 3GPP supplemented by WiFi**

## **xG Incentives:**

- 1. Global technology**
- 2. Modular (5GBC, NPN, NTN, ...) and interoperable (Wifi, CDN, Cloud...)**
- 3. Mass market**

## **xG Pitfalls:**

- 1. Global technology**
- 2. Big Tech dominance**
- 3. Mass market**

**But without active engagement in 3GPP,  
no benefits!**
