

Guido is SAT Corporation, a Kratos company, Sales and Marketing Director for EMEA and a board member of the satellite Interference Reduction Group (IRG).

Guido experience in the satellite communication business spans over more than 25 years, mostly dedicated to Payload Operations and Customer Support. During the

last 5 years, Guido has devoted his knowledge and capabilities to develop Sales and Marketing of SAT Corporation products in Europe and the Middle East.

Former Head of Eutelsat Payload Operations Centre (CSC), Guido has become one of the world leading experts in the field of Carrier Monitoring and Interference Geolocation, providing expert support to troubleshooting communication anomalies and interferences.

Guido participates, as a SME lecturer on satellite monitoring and interference geolocation, in workshops and seminars around the world.
