

Vicky Wong

Senior Communications System Engineer

Asia Satellite Telecommunications Company Limited

Vicky WONG is AsiaSat's Senior Engineer. Vicky has extensive experience in frequency coordination and International Telecommunication Union (ITU) activities. She has engaged in many administrations and operators' coordination meetings, providing technical assessment on interference scenarios and expertise advices to resolve challenging interference issues.

Vicky has been actively participating in various ITU and APT (the Asia-Pacific Telecommunity) activities and has represented AsiaSat in technical expert groups such as ITU WP-4A, 4C, 1B, 5D, JTG 4-5-6-7, APG, AWG, CPM and WRC to promote and defend the interest of AsiaSat and the Fixed Satellite Service (FSS) satellite industry in general. Vicky has also chaired several groups in APT. Most lately, she has been chairing the APG group trying to identify new spectrum for satellite applications (WRC-15 Agenda Item 1.6) and was also appointed to be the APT coordinator on this issue during the 2015 ITU World Radiocommunication Conference (WRC-15).

Vicky holds a Bachelor in Electronic Engineering and a Master in Information Engineering from the Chinese University of Hong Kong. She is also a member of the Radio Spectrum and Technical Standards Advisory Committee (SSAC), which is an advisory committee of the Office of Communications Authority (OFCA), Hong Kong Special Administrative Region (HKSAR).
