

Miguel Arranz

CTO Group

Miguel Arranz joined ZTE in April 2012, and since then has occupied different executive positions including CTO of North Europe, being now responsible for RAN Technologies within the CTO Group. His scope spans to the overall RAN infrastructure portfolio and refers to both the business and product development. Sponsor of several transformational programs aiming to leverage ZTE technology profile, profitability and performance.

Prior to his current role, Miguel has gained a wealth of technical and business experience since 1995 through a long series of positions both at local and at international level in Vodafone, including responsible for the launch UMTS in Vodafone Spain and Head of 2G/3G/LTE Radio Product at Group level. Miguel Arranz holds 15 international patents and his work was honored in the last MWC 2012 with the GSMA Best Technology Breakthrough Award.
