

Mr. Vadim Poskakukhin

Mr. Poskakukhin is the head of laboratory in the Radio Research and Development Institute (NIIR), one of the main organizations responsible for spectrum management in Russia. He has a Master degree in Telecommunications. For more than 10 years in NIIR he is working on mobile communications development in Russia, as well as participating in the activities related to short range devices, PMR and fixed service.

Besides national policies development he is also an active participant in the international activities in ITU-R and regional organizations related to terrestrial services. In particular, he is currently the RCC coordinator on Issue 9.1.8 of WRC-19 agenda item 9.1.
