

## **Mr. John Shaw**

Regulatory and Spectrum Management Consultant

Mr John Shaw graduated from Queen Mary College, London University, after following studies in Physics, Telecommunications, Computer Science and Nuclear Engineering.

He worked first at Marconi Space and Defence Systems and then spent a long period in the Kingdom of Bahrain (1976-1985) working in the broadcast engineering and development section of the Ministry of Information.

Following his return from Bahrain he worked for the United Kingdom's Radiocommunications Agency(RA) until 2005, when the RA was absorbed into the new independent telecommunications regulator Ofcom.

During his time with the RA, he worked first in the broadcasting section (1985-1992) and then transferred to the International Policy Unit where his main area of work was on regulatory matters and the international spectrum management framework.

Since 2005 he has worked as a consultant on regulatory and spectrum matters for Ofcom the Maritime and Coastguard Agency, the DRM Consortium and the BBC.

He has gained extensive experience in international organisations and in preparing for, participating in and conducting meetings related to various aspects of their work. His experience has covered a wide range of activities in the International Telecommunications Union (ITU), the International Maritime Organization (IMO) and the European Conference of Posts & Telecommunications administrations (CEPT).
