## Information Note

Subject: Review of findings to BT assignments in the planning area and the bands governed by the GE06 Agreement

Part IIB of this BR IFIC contains 2367 frequency assignments to BT stations in the planning area and the bands governed by the GE06 Agreement whose findings were reviewed and amended so as to indicate the conformity of these frequency assignments with the GE06 analogue Plan, bearing in mind the Rule of Procedure on provision No. 5.1.2 of the GE06 Agreement. The review concerns the administrations of AUT, BEL, BIH, BUL, D, E, F, FIN, G, GRC, HNG, I, IRL, KGZ, MNE, NOR, OMA, POL, RUS, S, SRB, SUI, SVN, SYR and TUR.

The criteria for the conformity examination of BT analogue assignments in the planning area and the bands governed by GE06 Agreement were reviewed with respect to the treatment of frequency offset for those MIFR assignments that are associated with the analogue BT assignments coming from the original ST61 Plan, whereby the Plan assignment has no indication regarding the offset. Consequently, the associated MIFR assignment receives favourable plan-conformity finding, irrespective of the value of the notified offset, provided that all other criteria are fulfilled.
