3) Changes in the BR terrestrial database and associated software

WRC-15 reviewed the description of data items 1EO (1.5.10.1 – the frequency offset), 7A (7.1 – the class of emission) and 7AB (7.2 – the necessary bandwidth) contained in Table 1 (Characteristics for terrestrial services) of Appendix 4.

These data items, which were previously required for notification only in the GE06 planning area and bands, become mandatory for notifications under provisions Nos. 11.2 and 9.21 of the Radio regulations also in the countries and bands outside the GE06 Agreement.

The BR has implemented the above WRC-15 decision with regards to the data validation and processing of VHF/UHF digital television broadcasting assignment notices.

Please note that the corresponding updated software will be available as of BR IFIC 2850 of 25 July 2017
