

Information Note - BR IFIC 2910

1) Article 11 procedure

- Number of Notices per BR IFIC Part

Part I	Part II	Part III	Total
15623	12732	384	28739

2) Plan modification procedure

- Notices published in Special Section GE06/162

Part A	Part B	Part C	Total
84	219	9	312

- Notices published in Special Section GE06L/46

Part A	Part B	Part C	Total
6	0	0	6

- Notices published in Special Section GE75/181

Part A	Part B	Part C	Total
1	4	0	5

3) Article 9 procedure

BR IFIC No. **2910** contains Special Sections **RR9.21/C/981**, in PDF format which is accessible through “Latest Publication” section of the “BR IFIC Contents” in the startup screen of the BR IFIC DVD menu.

4) GE06 Agreement: Integration of processing according to Article 4 into ITU’s Terrestrial Radiocommunication System (TerRaSys)

After RRC-06 and the adoption of the GE06 Agreement, the BR implemented, on a temporary basis until its implementation in TerRaSys, a standalone system for treatment of proposed modifications to the List of assignments to other primary terrestrial services (GE06L) according to Article 4 of the Agreement.

The BR has now finalized the implementation of GE06 Article 4 processing related to the GE06L in TerRaSys and the migration from the standalone system has been implemented successfully.

Therefore, as from BR IFIC edition 2906 of 15 October 2019, and Special Section GE06L/43, attached to this BR IFIC all Article 4 GE06 Agreement procedures and examinations of modifications, notified to the GE06L will be executed through the TerRaSys.

The BR wishes to inform you that the transition from standalone to TerRaSys involves the following differences:

The new system type code 'ND' that was introduced for the application of the GE06 coordination procedure and notification of frequency assignments to stations of IMT-2000 and IMT-Advanced systems, e.g. LTE and LTE-Advanced, in the band 470 – 862 MHz. For more details, please see the Rule of Procedure contained in Appendix 1 to Section I of Part A10 (GE06). Based on this code 'ND' code and notified characteristics, the BR will calculate the relevant coordination trigger field-strength values necessary for establishing coordination contours and determining affected administrations in Section I of Annex 4 of the GE06 Agreement.

In case of further need of clarification and/or assistance concerning unexpected processing outcomes (including calculation results and/or identification of potentially affected administrations), please contact brfmd@itu.int.

In case of further need of clarification and/or assistance, please contact brtpr@itu.int.

BR/TSD/TPR – 29 November 2019
