CHAPTER I

General

Due to the large volume of the data, the BR International Frequency information Circular (BR IFIC) is published in two parts according to services, namely Terrestrial Services and Space Services. The BR IFIC (Terrestrial Services) represents a reference publication which contains the following information that is relevant for frequency management purposes. This part of the Preface describes the Terrestrial services part of the above Circular, currently in DVD-ROM format.

The BR IFIC (Terrestrial Services) contains:

– the international Frequency List (IFL) (including all the frequencies prescribed for common use);
– the complete and up-to-date versions of terrestrial frequency assignments/allotment Plans
– particulars of notices under treatment in accordance with Article 11 for updating of the Master Register;
– particulars of notices under treatment pursuant to regional Agreements for updating of the Plans;
– the Special Sections associated with the Regulatory procedures applicable to Terrestrial Services;
– the TerRaQ program for querying the published information;
– the TerRaNV program for checking electronic notices;
– the latest version of the Preface in Arabic, Chinese, English, French, Russian and Spanish in PDF format.

This Circular (BR IFIC) is published once every two weeks since 24 August 1999.

Disclaimer: The designations employed and the manner of presentation of data and/or maps in this Preface do not imply the expression of any opinion whatsoever on the part of the ITU or its secretariat concerning the legal status of the country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries.

CHAPTER II

Description and layout of the BR International Frequency Information Circular

SECTION 1

1. THE BR INTERNATIONAL FREQUENCY INFORMATION CIRCULAR (BR IFIC)

1.1 The terrestrial part of the BR IFIC consists of the following:

1.1.1 The International Frequency List (IFL) including also:

– All the frequencies prescribed for common use as collective entries; and

– All the allotments in the Allotment Plans included in Appendices 25, 26 and 27

1.1.2 The Terrestrial Plans annexed to the Regional Agreements, namely:

ST61	The Regional Agreement for the European Broadcasting Area (Stockholm, 1961), as revised by RRC-06-Rev.ST61;
GE75	The Regional Agreement on LF/MF Broadcasting (Regions 1 and 3), Geneva, 1975;
RJ81	The Regional Agreement on MF Broadcasting, (Region 2), Rio de Janeiro, 1981;
GE84	The Regional Agreement concerning FM Sound Broadcasting Stations (Region 1 and part of Region 3), Geneva, 1984;
GE89	The Regional Agreement relating to the planning of VHF/UHF television broadcasting in the African Broadcasting Area and neighbouring countries (Geneva, 1989), as revised by RRC-06-Rev.GE89;
GE85-MM-R1	The Regional Agreement concerning the MF Maritime Mobile and Aeronautical Radionavigation Services (Region 1), Geneva, 1985; and
GE85-EMA	The Regional Agreement concerning the planning of the Maritime Radionavigation Service (Radiobeacons) in the European Maritime Area, Geneva, 1985.
GE06	The Regional Agreement (GE06) which governs the use of the frequency bands 174-230 MHz and 470-862 MHz by the broadcasting service and primary terrestrial services other than broadcasting in Region 1 (parts of Region 1 situated to the west of meridian 170º E and to the north of parallel 40º S, except the territory of Mongolia) and in the Islamic Republic of Iran (for Morocco, the analogue plan covers the band 170-230 MHz).

1.1.3 The List of assignments to primary terrestrial services other than broadcasting associated with the GE06 Agreement;

1.1.4 All the Special Sections associated with the above Plans, where applicable, and under the application of various procedures as appropriate (e.g., RR9.21/C, RR9.21/D);

1.1.5 All the notices received in application of Article 11 for updating of the Master Register and published at least once in the initial publication stage and under treatment till their publication in other Parts;

1.1.6 All the notices received in application of regional Agreements for updating of the Plans or the List associated with the GE06 agreement and published at least once in the initial publication stage and under treatment till their publication in other Parts;

1.1.7 The latest version of the ***TerRaQ*** program, which will be used for query, display, exporting and printing of the published information, and the TerRaNV program which enables the checking of the electronic notices before submission to the Bureau;

1.1.8 The latest version of the Preface in Arabic, Chinese, English, French, Russian and Spanish in PDF format.

1.2 The Circular is a snap shot of the ITU databases on a particular day containing all of the above components. It can be viewed either by its latest publication (Circular) number or as a general query of the whole database. General-purpose query is based on three major components, namely LF/MF, FM/TV and all other services (FXM) and the selection of each will comprise of assignments pertaining to both Plans and Article 11. By choosing any or all, the database can be selected further by various other parameters such as administrative, site, assignment Identification numbers, date of receipt of notices, etc. The latest publication query mode offers selection by Plan fragments with their three Parts A, B and C and Article 11 notices, divided into three main Parts, numbered I to III.

1.3 Each Circular is identified by a unique serial number, and by the date of publication. Special Sections are identified by a symbol referring to the purpose of the publication, as indicated in paragraph 2 below, and by a composite serial number containing a consecutive numbering and the number of the Circular with which it is issued.

1.4 Parts I to III of the Circular

Part I

This Part contains notifications received concerning new frequency assignments or modifications or cancellations of recorded assignments.

The nature of the information published in Part I is indicated by the following symbols in the Administrative data part under Notification intended for:

ADD	=	for a new assignment
MODIFY	=	for an assignment which is being modified
SUPPRESS	=	for an assignment which is being deleted by the notifying administration
WITHDRAWN	=	for a notice which is withdrawn by an administration after its publication in Part I and before its publication in Part II or III

Part II

This Part contains notifications and associated findings adopted concerning new frequency assignments or modifications to existing frequency assignments resulting in their recording in the Master Register.

The findings are formulated with respect to:

– their conformity with the Table of Frequency Allocations and the other provisions of the Radio Regulations;

– their conformity with a world or regional frequency assignment or allotment plan and associated provisions, where applicable or with the List associated with the GE06 agreement;

– the conformity with the procedures relating to coordination with other administrations as applicable; and

– the probability of harmful interference as applicable.

Part III

This Part contains notifications and associated findings adopted concerning new frequency assignments or modifications to existing frequency assignments resulting in the notice being returned to the notifying administration.

Part IIB

This Part contains frequency assignments already recorded in the Master Register, the findings in respect of which have been reviewed by the Bureau pursuant to Nos. 11.50 and/or 14.1 of the Radio Regulations

1.5 Layout of the Circular

The details of the data of the recorded assignments and those contained in the notices under treatment and other data are structured as follows:

Administrative Data; Emission Characteristics, Station Information, Finding Information, Publication Information, Coordination Information, Main Antenna Characteristics, Receiving station information, Reference Data, Table of Attenuations, Table of Effective antenna Heights and Remarks as these appear using TerRaQ query software.

An Index of the notices published in Parts I, II and III as well as those in Parts A, B and C of the Special Sections of the Terrestrial Plans can be viewed in the Circular (DVD-ROM) using TerRaQ software and sorted by fragment, assigned frequency, etc. with other minimum essential details to identify the assignments. This list of index for notification under Article 11 and the complete information in respect of Special Sections are also posted at the following ITU website and distributed on paper to those administrations requesting it:

http://www.itu.int/ITU-R/go/terrestrial-brific

Part A contains particulars of proposed additions and/or changes to the characteristics of recorded assignments;

Part B contains particulars of additions and/or changes to the characteristics of recorded assignments on which agreement has been reached and

Part C contains particulars of recorded assignments in the Plan which are cancelled.

Note: *The contents of the coordination data and an explanation of the symbols used exclusively in Remarks of this Special Section appear in Chapter V of the present Preface.*

SECTION 2

2. THE SPECIAL SECTIONS ANNEXED TO THE CIRCULAR

The following Special Sections, separately identified, are included in the Circular as and when these are required to be published. Special Sections concerning Terrestrial Services:

Special Sections concerning Terrestrial Services:

Special Section AP25/---

Contains information used in the procedure for bringing up to date the Frequency Allotment Plan for coast radiotelephone stations operating in the exclusive maritime mobile bands between 4 000 and 27 500 kHz (Appendix 25). It is divided into three parts:

Part A contains information supplied by an administration applying the Appendix 25 procedure and incompatibilities identified by the Bureau, published under paragraph 1.2 of AP25;

Part B contains particulars of the results of the Appendix 25 procedure, published under paragraph 1.22 of AP25; and

Part C contains particulars of any allotment deleted from the Plan.

Special Section GE85M/---

Contains information published in application of Article 4 of the Regional Agreement on the MF Maritime Mobile and Aeronautical Radionavigation Services (Region 1), Geneva, 1985. It is divided into three parts:

Part A contains particulars of proposed additions and/or modifications published in accordance with paragraph 4.7 and/or paragraph 4.22 of Article 4 of the Regional Agreement;

Part B contains particulars of additions and/or modifications on which agreement has been reached, published in accordance with paragraph 4.14 and/or paragraph 4.29 of Article 4 of the Regional Agreement; and

Part C contains particulars of assignments in the Plan which are cancelled, published in accordance with paragraph 4.32 of Article 4 of the Regional Agreement.

Special Section ST61/---

Contains information published in application of Article 4 of the Regional Agreement for the European Broadcasting Area (Stockholm, 1961), as amended by the Regional Radiocommunication Conference for the revision of the Stockholm 1961 Agreement (RRC-06-Rev.ST61). It is divided into three parts:

Part A contains particulars of proposed additions and/or changes to the characteristics of recorded assignments published in accordance with provision No. 30;

Part B contains particulars of additions and/or changes to the characteristics of recorded assignments on which agreement has been reached, published in accordance with provision No. 28 or 32 and

Part C contains particulars of recorded assignments in the Plan which are cancelled.

Note: The contents of the coordination data and an explanation of the symbols used exclusively in Remarks of this Special Section appear in Chapter V of the present Preface.

Special Section GE75/---

Contains information published in application of Article 4 of the Regional Agreement on LF/MF Broadcasting (Regions 1 and 3), Geneva, 1975. It is divided into three parts:

Part A contains particulars of proposed additions and/or changes to the characteristics of recorded assignments published in accordance with paragraph 3.2.2 of Article 4 of the Regional Agreement;

Part B contains particulars of additions and/or changes to the characteristics of recorded assignments on which agreement has been reached, published in accordance with paragraphs 3.2.14 and 3.3.3 of Article 4 of the Regional Agreement and

Part C contains particulars of recorded assignments in the Plan which are cancelled, in accordance with paragraph 4 of Article 4 of the Regional Agreement.

Special Section RJ81/---

Contains information published in application of Article 4 of the Regional Agreement on MF Broadcasting, (Region 2), Rio de Janeiro, 1981. It is divided into three parts:

Part A contains particulars of proposed additions and/or changes to the characteristics of recorded assignments published in accordance with paragraph 4.2.5 of Article 4 of the Regional Agreement;

Part B contains particulars of additions and/or changes to the characteristics of recorded assignments on which agreement has been reached, published in accordance with paragraph 4.2.19 of Article 4 of the Regional Agreement and

Part C contains particulars of recorded assignments in the Plan which are cancelled, in accordance with paragraphs 4.5 and 4.6.1 of Article 4 of the Regional Agreement, or particulars of assignments which are disregarded in the treatment of future modifications to the Plan in accordance with paragraph 4.6.3 of Article 4 of the Regional Agreement.

Special Section GE84/---

Contains information published in application of Article 4 of the Regional Agreement concerning FM Sound Broadcasting Stations (Region 1 and part of Region 3), Geneva, 1984. It is divided into three parts:

Part A contains particulars of proposed additions and/or changes to the characteristics of recorded assignments published in accordance with paragraph 4.2.7 of Article 4 of the Regional Agreement;

Part B contains particulars of additions and/or changes to the characteristics of recorded assignments on which agreement has been reached, published in accordance with paragraph 4.6.2 of Article 4 of the Regional Agreement and

Part C contains particulars of recorded assignments in the Plan which are cancelled, in accordance with paragraph 4.5 of Article 4 of the Regional Agreement.

Special Section GE89/---

Contains information published in application of Article 4 of the Regional Agreement relating to the planning of VHF/UHF television broadcasting in the African Broadcasting Area and neighbouring countries (Geneva, 1989), as revised by RRC-06-Rev.GE89. It is divided into three parts:

Part A contains particulars of proposed additions and/or changes to the characteristics of recorded assignments published in accordance with paragraph 4.2.8 of Article 4 of the Regional Agreement;

Part B contains particulars of additions and/or changes to the characteristics of recorded assignments on which agreement has been reached, published in accordance with paragraph 4.6.2 of Article 4 of the Regional Agreement and

Part C contains particulars of recorded assignments in the Plan which are cancelled, in accordance with paragraph 4.5 of Article 4 of the Regional Agreement.

Special Section RR9.21/C/---

Contains information provided by an administration seeking agreement in accordance with the procedure of Article 9, published under RR9.38.

Special Section RR9.21/D/---

Contains information on the status of coordination at the expiry of the prescribed time limit (RR9.52C).

Special Section GE06/---

Contains information published in application of Article 4, section 4.1 of the Geneva 2006 Regional Agreement (GE06). It is divided into six parts:

Part A1 contains particulars of new assignments/allotments or changes to the characteristics of an allotment or an assignment to a broadcasting station for updating of the digital broadcasting plan (GE06D) and the information on the administrations potentially affected by these assignments/allotments, published in accordance with paragraph 4.1.2.8b) of Article 4 of the GE06 Agreement;

Part B1 contains particulars of new assignments/allotments or changes to the characteristics of an allotment or an assignment to a broadcasting station in the digital broadcasting plan for which the procedure has been successfully completed and which are recorded in the digital broadcasting plan (GE06D), published in accordance with paragraph 4.1.5.3 of Article 4 of the GE06 Agreement and

Part C1 contains particulars of assignments and allotments in the digital broadcasting plan (GE06D) that are cancelled published in accordance with paragraph 4.1.6 of Article 4 of the GE06 Agreement.

Part A2 contains particulars of new assignments or changes to the characteristics of an assignment to a broadcasting station for updating of the analogue television broadcasting plan (GE06A)) and the information on the administrations potentially affected by these assignments, published in accordance with paragraph 4.1.2.8b) of Article 4 of the GE06 Agreement;

Part B2 contains particulars of new assignments or changes to the characteristics of an assignment to a broadcasting station in the analogue television broadcasting plan for which the procedure has been successfully completed and which are recorded in the analogue television broadcasting plan (GE06A), published in accordance with paragraph 4.1.5.3 of Article 4 of the GE06 Agreement and

Part C2 contains particulars of assignments in the analogue television broadcasting plan (GE06A) that are cancelled published in accordance with paragraph 4.1.6 of Article 4 of the GE06 Agreement.

Special Section GE06L

Contains information published in application of Article 4 , section 4.2 of the Geneva 2006 Regional Agreement (GE06). It is divided into three parts:

Part A contains particulars of modifications or new assignments submitted for updating the List of assignments to primary terrestrial services other than broadcasting (GE06L) and the information on the administrations potentially affected by these assignments, published in accordance with paragraph 4.2.2.6b) of the GE06 Agreement;

Part B contains particulars of modifications or new assignments to primary terrestrial services other than broadcasting for which the procedure has been successfully completed and which are recorded in the List of assignments to primary terrestrial services other than broadcasting, published in accordance with paragraph 4.2.5.3 of Article 4 of the GE06 Agreement and

Part C contains particulars of assignments to primary terrestrial services other than broadcasting that are deleted or modifications that are withdrawn, which have either been the subject of a request for deletion or have reached the deadline set in paragraphs 4.2.5.1, 4.2.5.4 and 4.2.5.5 of Article 4 of the GE06 Agreement.

SECTION 3

3. THE INTERNATIONAL FREQUENCY LIST (IFL)

3.1 The International Frequency List (referred to hereafter as IFL) is a service document published by the International Telecommunication Union pursuant to the provisions of Article 20 of the Radio Regulations. It contains information extracted from the Master International Frequency Register (referred to hereafter as the Master Register) with respect to all frequency assignments recorded therein.

3.2 It contains the full characteristics of all the assignments to stations in the Terrestrial Services, which are recorded in the Master Register, in accordance with Article 11 of the Radio Regulations.

3.3 It also includes frequencies (e.g. 2 182 kHz) prescribed by the Radio Regulations for common use by stations of a given service, which are recorded in the Master Register as collective entries (RR20.5) and need not be notified individually (RR11.13). These collective entries are presented as follows:

Assigned Frequency	Administration	Geographical or standard defined area	Class of station
Frequency (see Chapter VI)	XBR	XAA or XAX	Symbol for class of station of service concerned

The Table in Chapter VI contains a reference to the relevant provisions of the Radio Regulations as well as a detailed description of the common use prescribed in each of these provisions.

3.4 Allotments in the Allotment Plans included in Appendices 25, 26 and 27 also appear in IFL (see RR20.6). These allotments are presented as follows:

Assigned Frequency	Administration	Geographical or standard defined area	Class of station	Allotment Plan
Frequency (kHz)	Symbol of the notifying administration (Section 1 of Chapter IV)	Symbol for geographical or standard defined area relevant to the allotment	Symbol for class of station of service concerned	Appendix 25
Frequency (kHz)	XBR	Symbol for geographical or standard defined area relevant to the allotment	Symbol for class of station of service concerned	Appendices 26, 27

SECTION 4

4. TERRESTRIAL PLANS

4.1 The Radiocommunication Bureau in accordance with RR13.11 maintains the Terrestrial Plans. They contain information relating to frequency assignment and allotment Plans established at Regional Administrative Conferences and subsequently updated through the application of the prescribed procedures. These Plans are annexed to the following Regional Agreements:

4.2 The Regional Agreement for the European Broadcasting Area (Stockholm, 1961), as amended by the Regional Radiocommunication Conference for the revision of the Stockholm 1961 Agreement (RRC-06-Rev.ST61);

4.3 The Regional Agreement on LF/MF Broadcasting (Regions 1 and 3), Geneva, 1975 (GE75);

4.4 The Regional Agreement on MF Broadcasting, (Region 2), Rio de Janeiro, 1981 (RJ81);

4.5 The Regional Agreement concerning FM Sound Broadcasting Stations (Region 1 and part of Region 3), Geneva, 1984 (GE84);

4.6 The Regional Agreement relating to the planning of VHF/UHF television broadcasting in the African Broadcasting Area and neighbouring countries (Geneva, 1989), as revised by RRC-06-Rev.GE89.;

4.7 The Regional Agreement for MF Maritime Mobile and Aeronautical Radionavigation Services (Region 1), Geneva, 1985. (GE85-M-1);

4.8 The Regional Agreement concerning the planning of the Maritime Radionavigation Service (Radiobeacons) in the European Maritime Area, Geneva, 1985 (GE85-EMA) ; and

4.9 The Regional Agreement which governs the use of the frequency bands 174-230 MHz and 470-862 MHz by the broadcasting service and primary terrestrial services other than broadcasting in Region 1 (parts of Region 1 situated to the west of meridian 170º E and to the north of parallel 40º S, except the territory of Mongolia) and in the Islamic Republic of Iran (for Morocco, the analogue plan covers the band 170-30 Hz), Geneva, 2006 (GE06).

The format of the information contained in these Plans is the same as that for the IFL.

SECTION 5

5. LIST OF ASSIGNMENTS TO PRIMARY TERRESTRIAL SERVICES OTHER THAN BROADCASTING ASSOCIATED WITH THE GE06 AGREEMENT

As referred to in paragraph 1.15 of Article 1 of the Agreement, the List of assignments to primary terrestrial services other than broadcasting contains:

"Existing assignments to other primary terrestrial services (other than broadcasting) (referred to in short as the “List”): Assignments to other primary terrestrial services (other than broadcasting) contained in Annex 5 to the Agreement, as established by the Conference, and assignments to other primary terrestrial services (other than broadcasting) for which the procedure of § 4.2 of Article 4 of this Agreement has been successfully applied".

SECTION 6

6. TERRESTRIAL SOFTWARE

Generally speaking, The Terrestrial software uses the following services grouping:

FM/TV – FM sound and TV broadcasting services in the VHF and UHF bands;

LF/MF – LF and MF sound broadcasting services; and

FXM – Fixed, mobile and other services (excepting the broadcasting service in the LF/MF and VHF/UHF bands).

6.1 TerRaQ

The Software package 'TerRaQ' associated with the query, display, printing and exporting of the data contained in the BR IFIC (Terrestrial services) is included in its latest updated version. This would permit identifying and extracting the particulars of assignments, which are, included in the latest publication (Parts I, II or III) and the Plan Special Sections (Parts A, B or C) by publication number and Parts.

6.2 TerRaNV

The software TerRaNV in its latest updated version, which will be used by the administrations to validate the electronic notices before their submission to the Bureau is also incorporated in the BR IFIC, except those related to GE06 Agreement .

6.3 TerRaNotices

For the creation and validation of terrestrial electronic notices (all services except notice types T16, T17 and LF/MF broadcasting service). This program can only be installed from the BR IFIC DVD.

2. LIST OF NOTICE FORMS FOR DIFFERENT PURPOSES

TYPE	FM/TV
T01	Notification of VHF Sound broadcasting station
T02	Notification of VHF/UHF Television broadcasting station
TB1	Notification of a modification to the Administration unique identifier
TB2	Notification under Article 11 of an assignment with all technical characteristics as in the Plan
TB3	Requesting publication of a modification in Part B of the corresponding Special Section
TB4	Updating of the coordination information of a notice under treatment
TB5	Suppressing an assignment or Notification of withdrawing a notice under treatment
G02	Notification of an analogue television broadcasting assignment
GA1	Notification of an allotment sub-area for digital broadcasting (DVB-T or T-DAB)
GB1	Notification of a digital assignment with characteristics different from those appearing in the Plan for transmission in the broadcasting service
GS1	Notification of a digital sound broadcasting (T-DAB) assignment
GS2	Notification of a digital sound broadcasting (T-DAB) allotment
GT1	Notification of a digital television broadcasting (DVB-T) assignment
GT2	Notification of a digital television broadcasting (DVB-T) allotment

TYPE	LF/MF
T03	Notification of LF/MF Sound broadcasting station, Region 1 and 3
T04	Notification of MF Sound broadcasting station, Region 2
TB6	Notification of a modification to the Administration unique identifier
TB7	Notification under Article 11 of an assignment with all technical characteristics as in the Plan
TB8	Requesting publication of a modification in Part B of the corresponding Special Section
TB9	Suppressing an assignment or for withdrawing a notice under treatment

TYPE	FXM
G11	Notification of an assignment to a terrestrial transmitting station in the fixed service in the planning area and the bands governed by the GE06 Agreement
G12	Notification of an assignment to a terrestrial transmitting station in the planning area and the bands governed by the GE06 Agreement, except stations in the fixed service, broadcasting stations and typical stations
G13	Notification of an assignment to a terrestrial receiving land station in the planning area and the bands governed by the GE06 Agreement
G14	Notification of an assignment to a terrestrial typical transmitting station in the planning area and the bands governed by the GE06 Agreement
T11	Terrestrial transmitting station (TX) in the fixed service
T12	Terrestrial transmitting station (TX) (Except station in the fixed, or LF/MF/VHF/UHF broadcasting services, or typical station)
T13	Terrestrial receiving land station (RX)
T14	Terrestrial typical transmitting station (TP)
T15	Frequency allotment in the maritime mobile service (Appendix 25)
T16	Terrestrial transmitting station (TX) (Plan update Regional Agreement Geneva, 1985) (Art. 4 of the agreement)
T17	Terrestrial transmitting station (TX) using adaptive systems

Note: *Notice types T01, T02 and TB1 to TB5 are to be used for FM sound and TV Broadcasting services in the VHF and UHF bands (T02, TB1 and TB4 only outside the planning area and the bands governed by GE06 Agreement). T03, T04 and TB6 to TB9 are to be used for LF and MF Broadcasting services. GS1, GS2, GT1, GT2, G02 and GB1 are to be used for sound and TV digital broadcasting services in the planning area and bands governed by GE06 Agreement. T11 to T17 are to be used for Fixed, Mobile and other services, as appropriate, outside the planning area and the primary bands governed by GE06 Agreement. G11 to G14 are to be used for primary Fixed, Mobile and other services in the planning area and bands governed by GE06 Agreement. Further details on the Notice types, electronic formats and descriptions, etc., are referred to in Circular letters CR/120, CR/125, CR/261 and CR/262. The instructions on preparation of the notice types can be found at URL address: http://www.itu.int/ITU-R/go/terrestrial-notice-forms*

SECTION 5

5. TABLE 'STANDARD DEFINED AREAS'

The following symbols are either defined in standard references (e.g. MWARA, RDARA in Appendix 27) or defined by the Bureau in consultation with the administration concerned when required. In accordance with the Radio Regulations, an area where a transmitting mobile or transportable station or a receiving station may be located has to be well defined and sufficiently small to make it easy to forecast the conditions of use of the frequency assignment from the propagation point of view.

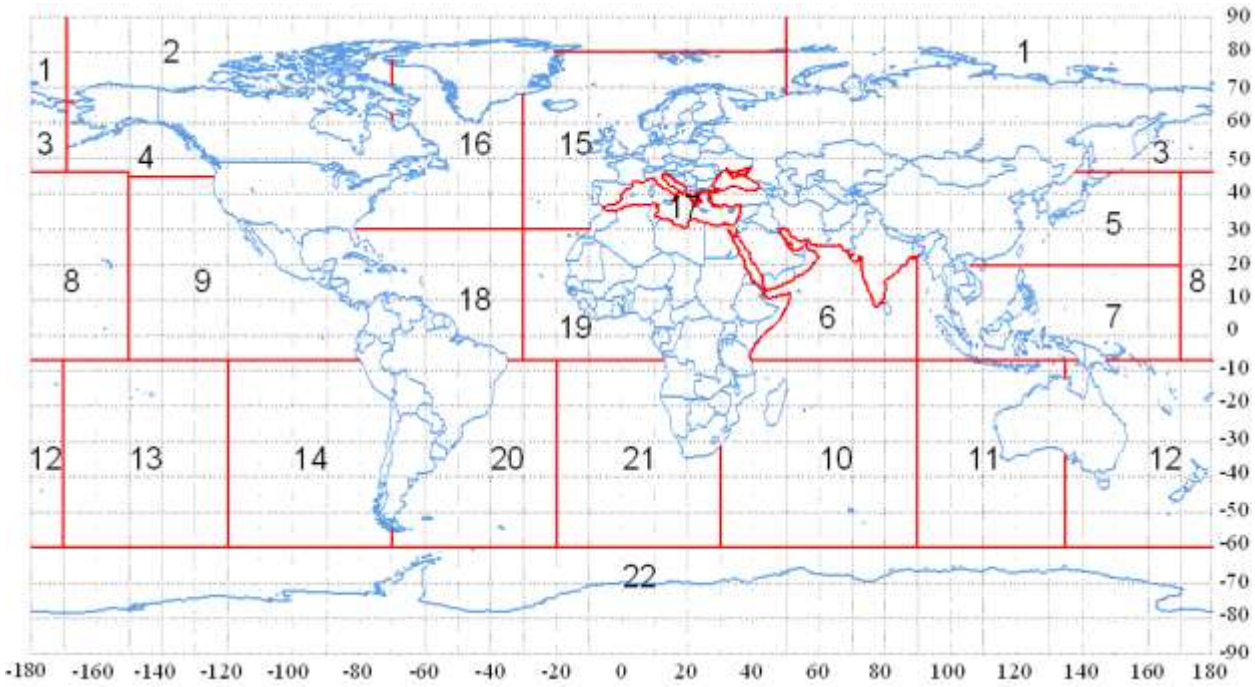
5.1 SYMBOLS DEFINNING GEOGRAPHICAL AREA

In addition to the symbols listed in Table "Areas", the following may be used:

XAA	Worldwide
XAX	Regional
XR1	Region 1
XR2	Region 2
XR3	Region 3

5.2 MARITIME ZONES

1. Maritime Zones are shown in the relevant map below. In the forms of notice, a symbol designating a Maritime Zone has to be preceded by the symbol MAR without an intervening space.



Map of Maritime Zones

Disclaimer: see Chapter I

5.3 MARITIME ALLOTMENT AREAS

The Frequency Allotment Plan in Appendix 25 to the Radio Regulations contains zones comprising only a part of certain geographical areas; in the entries appearing in List I as representing these allotments (see Section 3, Chapter II, paragraph 3.4), these zones are represented by the following symbols in the field 'geographical or standard defined areas' of the IFL and are defined below:

ARG NO	for ARG	–	North		IND E	for IND	–	East
ARG CL	for ARG	–	Central		IND W	for IND	–	West
ARG SO	for ARG	–	South		MEX E	for MEX	–	East
AUS E	for AUS	–	East		MEX W	for MEX	–	West
AUS W	for AUS	–	West		RUS AN	for RUS	–	Northern Asia
CAN CL	for CAN	–	Central		RUS AS	for RUS	–	Southern Asia
CAN E	for CAN	–	East		RUS EO	for RUS	–	Far East
CAN NO	for CAN	–	North		RUS NW	for RUS	–	North West
CAN W	for CAN	–	West		RUS SW	for RUS	–	South West
CHL CL	for CHL	–	Central		RUS W	for RUS	–	West
CHL NO	for CHL	–	North		USA CL	for USA	–	Central
CHL SO	for CHL	–	South		USA E	for USA	–	East
D1	For D	–	West		USA W	for USA	–	West
D2	For D	–	East		USA SO	for USA	–	South

DEFINITION OF ALLOTMENT AREAS APPEARING IN APPENDIX 25 TO THE RADIO REGULATIONS

All lines subdividing the countries into allotment zones as defined below may have a tolerance of +/- 1 degree.

Symbol (Item 4E)	Definition
ARG NO	includes that part of the territory of ARG limited on the south by a line that extends from the western border along parallel 34 South to the coastline including all coast stations of ARG lying to the north of this parallel.
ARG CL	includes that part of the territory of ARG limited on the south by a line that extends from the western border along parallel 46 South to the coastline and on the north by a line that extends from the western border along parallel 34 South to the coastline including all coast stations of ARG lying between these parallels.
ARG SO	includes that part of the territory of ARG limited on the north by a line that extends from the western border along parallel 46 South to the coastline including all coast stations of ARG lying to the south of this parallel.
AUS E	includes that part of the territory of AUS limited on the west by a line that extends from the northern coastline along meridian 135 East of Greenwich to the southern coastline including all coast stations of AUS lying to the east of this meridian.
AUS W	includes that part of the territory of AUS limited on the east by a line that extends from the northern coastline along meridian 135 East of Greenwich to the southern coastline including all coast stations of AUS lying to the west of this meridian.
CAN CL	includes that part of the territory of CAN limited on the west by a line that extends from parallel 65 North along meridian 120 West of Greenwich to the southern border, on the east by a line that extends from parallel 65 North along meridian 75 West to the southern border, and on the north by a line that extends from meridian 120 West along parallel 65 North to meridian 75 West including all coast stations of CAN lying to the south of these lines.
CAN E	includes that part of the territory of CAN limited on the west by a line that extends from parallel 63 North along meridian 75 West to the southern border and on the north by a line that extends from meridian 75 West along parallel 63 North to the eastern coastline including all coast stations of CAN lying to the south east of these lines.
CAN NO	includes that part of the territory of CAN limited on the south by a line that extends from the western border along parallel 65 North to its intersection with meridian 75 West, thence along meridian 75 West to its intersection with parallel 63 North, thence along parallel 63 North to the eastern coastline including all coast stations of CAN lying to the north of these lines.
CAN W	includes that part of the territory of CAN limited on the north by a line that extends from the western border along parallel 65 North to its intersection with meridian 120 West and on the east by a line that extends from the parallel 65 North along meridian 120 West of Greenwich to the southern border including all coast stations of CAN lying to the west of meridian 120 West and to the south of parallel 65 North.
CHL NO	includes that part of the territory of CHL limited on the south by a line that extends from the eastern border along parallel 30 South to the coastline including all coast stations of CHL lying to the north of this parallel.
CHL CL	includes that part of the territory of CHL limited on the south by a line that extends from the eastern border along parallel 40 South to the coastline and on the north by a line that extends from the eastern border along parallel 30 South to the coastline including all coast stations of CHL lying between these parallels.

Symbol (Item 4E)	Definition
CHL SO	includes that part of the territory of CHL limited on the north by a line that extends from the eastern border along parallel 40 South to the coastline including all coast stations of CHL lying to the south of this parallel.
D1	includes that part of the territory of Germany limited on the north east by a line that extends from the northern coastline along meridian 10°55 of east longitude to the parallel 50°19N and a line that extends from 10°55 of east longitude along parallel 50°19 of north latitude to the eastern border including all coast stations of D lying to the south-west of these lines.
D2	includes that part of the territory of Germany limited on the west by a line that extends from the northern coastline along meridian 10°55 of east longitude to the parallel 50°19N and on the south by a line that extends from 10°55 of east longitude along parallel 50°19 of north latitude to the eastern border including all coast stations of D lying to the north-east of these lines.
IND E	includes that part of the territory of IND limited on the west by a line that extends from the northern border along 77 degrees 30 minutes of east longitude to the southern coastline including all coast stations of IND lying to the east of this longitude.
IND W	includes that part of the territory of IND limited on the east by a line that extends from the northern border along 77 degrees 30 minutes of east longitude to the southern coastline including all coast stations of IND lying to the west of this longitude.
MEX E	includes that part of the territory of MEX limited on the west by a line joining the points intersection of the northern border with meridian 110 West; 100 West / 20 North; and intersection of the southern border with meridian 92 West including all coast stations of MEX lying to the east of this line.
MEX W	includes that part of the territory of MEX limited on the east by a line joining the points intersection of the northern border with meridian 110 West; 100 West / 20 North; and intersection of the southern border with meridian 92 West including all coast stations of MEX lying to the west of this line.
RUS AN	includes that part of the territory of RUS limited on the west by a line that extends from the northern coastline along meridian 50 East of Greenwich to the parallel 60 North, thence along parallel 60 North to its intersection with meridian 130 East, thence along a line joining the points 130 East / 60 North and 165 East / northern coastline including all coast stations of RUS lying to the north of these lines.
RUS AS	includes that part of the territory of RUS limited on the north by a line that extends from meridian 50 East along parallel 60 North to its intersection with meridian 130 East; on the west by a line joining the points 50 East / 60 North and 45 East / 50 North, thence along meridian 45 East to the southern border; and on the east by a line that extends from parallel 60 North along meridian 130 East to its intersection with the southern border including all coast stations of RUS lying to the south of these lines.
RUS EO	includes that part of the territory of RUS limited on the west by a line that extends from the northern coastline along a line joining the points 165 East / northern coastline and 130 East / 60 North, thence along meridian 130 East to the southern border including all coast stations of RUS lying to the east of these lines.
RUS NW	includes that part of the territory of RUS limited on the east by a line that extends from the northern coastline along meridian 50 East of Greenwich to the parallel 60 North and on the south by a line that extends from the western coastline along parallel 60 North to its intersection with meridian 50 East including all coast stations of RUS lying to the north of these lines.
RUS SW	includes that part of the territory of RUS limited on the north by a line that extends from the western coastline along parallel 60 North to its intersection with meridian 50 East and on the east by a line that extends from parallel 60 North joining the points 50 East / 60 North and 45 East / 50 North, thence along meridian 45 East to the southern border including all coast stations of RUS lying to the south west of these lines, but excluding the stations situated in RUS W.
RUS W	includes that part of the territory of RUS which is the geographical area representing the "Kaliningrad Region".
USA CL	includes that part of the territory of USA limited on the west by a line that extends from the northern border along meridian 110 West of Greenwich to the parallel 35 North, thence along parallel 35 North to its intersection with meridian 85 West, thence along the line joining the points 85 West / 35 North and 75 West / 42 North, thence along meridian 75 West to the northern border including all coast stations of USA lying to the north of these lines.
USA E	includes that part of the territory of USA limited on the west by a line that extends from the eastern coastline along parallel 31 North to its intersection with meridian 85 West of Greenwich, thence along meridian 85 West to the parallel 35 North, thence along the line joining the points 85 West / 35 North and 75 West / 42 North, thence along meridian 75 West to the northern border including all coast stations of USA lying to the east of these lines.
USA W	includes that part of the territory of USA limited on the east by a line that extends from the northern border along meridian 110 West of Greenwich to the southern border including all coast stations of USA lying to the west of this meridian.
USA SO	includes that part of the territory of USA limited on the west by a line that extends from the southern border along meridian 110 West of Greenwich to the parallel 35 North, thence along parallel 35 North to its intersection with meridian 85 West, thence along meridian 85 West to its intersection with parallel 31 North, thence along parallel 31 North to the eastern coastline including all coast stations of USA lying to the south of these lines.

5.4 AERONAUTICAL ZONES DEFINED IN PART II, SECTION 1, ARTICLES 1 TO 4 OF APPENDIX 27 TO THE RADIO REGULATIONS

Part II, Section 1, Articles 1 to 4 of Appendix 27 to the Radio Regulations defines the Aeronautical Zones for the purposes of the Frequency Allotment Plan for the Aeronautical Mobile (R) Service in the exclusive bands between 2 850 kHz and 22 000 kHz. When notifying these Zones, administrations should precede an MWARA, an RDARA or RDARA Sub-Area, a VOLMET Area or a Worldwide Area with symbol M, R, V or W respectively, as shown below. Table below gives a complete list of these zones and the manner in which they are to be indicated.

6. TABLE 'CLASS OF STATION'

Symbol	Description
AL	Aeronautical radionavigation land station (transmitting station in the aeronautical radionavigation service)
AM	Aeronautical radionavigation mobile station (receiving station in the aeronautical radionavigation service)
AT	Amateur station
BC	Broadcasting station, sound
BT	Broadcasting station, television
FA	Aeronautical station (transmitting station in the aeronautical mobile service)
FB	Base station (transmitting station in the land mobile service)
FC	Coast station (transmitting station in the maritime mobile service)
FD	Aeronautical station in the aeronautical mobile (R) service
FG	Aeronautical station in the aeronautical mobile (OR) service
FL	Land station (transmitting station in the mobile service)
FP	Port station (transmitting station in the maritime mobile service, for port operation)
FX	Fixed station (transmitting station in the fixed service)
LR	Radiolocation land station (transmitting station in the radiolocation service)
MA	Aircraft station (receiving station in the aeronautical mobile, aeronautical mobile (R) or aeronautical mobile (OR service)
ML	Land mobile station (receiving station in the land mobile service)
MO	Mobile station (receiving station in the mobile service)
MR	Radiolocation mobile station (receiving station in the radiolocation service)
MS	Ship station (receiving station in the maritime mobile service)
NL	Maritime radionavigation land station (transmitting station in the maritime radionavigation service)
NR	Radionavigation mobile station (receiving station in the radionavigation service)
OD	Oceanographic data station (receiving station in the maritime mobile service for oceanographic purposes)
OE	Oceanographic data interrogation station (transmitting station in the maritime mobile service for oceanographic purposes)
PL	Combination of two or more classes of station (limited to collective entries made under the terms of RR20.5)
RM	Maritime radionavigation mobile station (receiving station in the maritime radionavigation service)
RN	Radionavigation land station (transmitting station in the radionavigation service)
SA	Meteorological aids mobile station (receiving station in the meteorological aids service)
SM	Meteorological aids base station (transmitting station in the meteorological aids service)
SS	Standard frequency and time signal station (transmitting station in the standard frequency and time signal service)

7. TABLES 'NATURE OF SERVICE' AND 'SYSTEM TYPE CODE'

7.1 TABLE 'NATURE OF SERVICE'

Symbol	Description
AX	Fixed station used for provision of services related to aircraft flight safety
AS	Stations using adaptive system
CO	Station open to official correspondence exclusively
CP	Station open to public correspondence
CR	Station open to limited public correspondence
CV	Station open exclusively to correspondence of a private agency
FS	Land station established solely for the safety of life
HP	Fixed station using high altitude platform
MX	Fixed station used for transmission of meteorological information
OT	Station open exclusively to operational traffic of the service concerned
PX	Fixed station used for press transmission
RC	Non-directional radiobeacon
RD	Directional radiobeacon
RG	Radio direction-finding station
RT	Revolving radiobeacon
ST	Fixed station using tropospheric scatter

7.2 TABLE 'System type code' (Reference Annex 6 of CR/261)

The system type code is used for linking the notified assignment to the corresponding protection ratios for this assignment. More detailed information on this data item can be found in Chapter 4 to Annex 2 of the GE06 Agreement. The allowed values of the system type code are listed in the Table below.

SECTION 10

10. TABLE 'SYMBOLS INDICATING THE POLARIZATION'

Polarization	Symbol	Definition
Horizontal linear	H	The electric field intensity vector is in the horizontal plane.
Vertical linear	V	The magnetic field intensity vector is in the horizontal plane.
Right-hand slant	SR	The electric field intensity vector is in the plane rotated 45 degrees clockwise from the vertical position, as seen from the transmitting point.
Left-hand slant	SL	The electric field intensity vector is in the plane rotated 45 degrees anti-clockwise from the vertical position, as seen from the transmitting point.
Right-hand circular or Direct	CR	The electric field intensity vector, observed in any fixed plane, normal to the direction of propagation, whilst looking in the direction of propagation, rotates with time in a right-hand or clockwise direction.
Left-hand circular or Indirect	CL	The electric field intensity vector, observed in any fixed plane, normal to the direction of propagation, whilst looking in the direction of propagation, rotates with time in a left-hand or anti-clockwise direction.
Dual	D	When substantially equal-amplitude vertically - and horizontally - polarized components are radiated without particular control of the phase relation between them. Typically, the vertically - and horizontally - polarized sources may be displaced one from the other so that the resultant polarization varies between circular and slant, according to azimuth angle.
Mixed	M	The collective term applied when both vertical and horizontal components are radiated, embracing slant, circular and dual polarization.
Linear	L	The electric field intensity vector, observed in any fixed plane, normal to the direction of propagation, whilst looking in the direction of propagation, remains in the direction specified by the angle measured anti-clockwise from a line parallel to the equatorial plane.

SECTION 11

11. TABLE 'SYMBOLS USED FOR COORDINATION AND AGREEMENT'

The following symbols are used in the coordination information, as appropriate.

Symbol	Description
RR6.7	The notifying administration has informed the Bureau of the successful completion of the coordination or agreement procedures in accordance with the provision of the Radio Regulations applicable to this assignment. When this remark is completed by symbols indicating one or more administrations, the coordination/agreement statement refers to the administration(s) designated by the symbol under 'Adm'. This also includes coordination required under RR9.21
AP25/1.4	Coordination successfully completed in accordance with paragraph 25/1.4 of AP25
4.2.2.a	Coordination required in accordance with paragraph 4.2.2 a) of GE84
4.2.2.b	Coordination required in accordance with paragraph 4.2.2 b) of GE84
4.2.2.c	Coordination required in accordance with paragraph 4.2.2 c) of GE84
4.2.2.d	Coordination required in accordance with paragraph 4.2.2 d) of GE84
4.2.2.e	Coordination required in accordance with paragraph 4.2.2 e) of GE84
4.2.2.f	Coordination required in accordance with paragraph 4.2.2 f) of GE84
Res.4	Coordination required in accordance with Resolution 4 of GE84
ST61} GE75} RJ81} RJ88} GE84} GE89} GE85}	This frequency assignment to which the relevant Agreement is applicable has been successfully coordinated with the Administration indicated under "Adm"
4.2.2	Coordination required in accordance with paragraph 4.2.2 of GE89
4.2.3	Coordination required in accordance with paragraph 4.2.3 of GE89
4.2.4	Coordination required in accordance with paragraph 4.2.4 of GE89
4.4.1	Paragraph 4.4.1 of GE89 applies to this assignment
4.2.5	Coordination required in accordance with paragraph 4.2.5 of RJ81
4.3.2.1.2	Coordination required in accordance with paragraph 4.3.2.1.2 of GE75
4.3.2.2	Coordination required in accordance with paragraph 4.3.2.2 of GE75
COORD COMPLETED	The notifying Administration has informed the Bureau of the successful coordination required under a Regional Agreement indicated under 'Provision'
OBJECTION BY	This assignment has been refused to be coordinated by an affected Administration, indicated under 'Adm'
COORD REQUIRED	Coordination required for this assignment has not yet been completed by Administration(s) indicated under 'Adm' or operation on non-interference basis
DISAGREMENT	This assignment has been notified in accordance with the applicable procedures despite the continuing disagreement from the Administration(s) indicated under 'Adm', as appropriate. In the case of a transmitting station, the notifying administration has undertaken to use this frequency assignment on the basis of non-interference to stations of the administration whose symbol appears. In the case of a receiving earth station, the notifying administration has undertaken to accept the interference to this assignment resulting from the existing or future terrestrial station assignments of the administration whose symbol appears

SECTION 12

12. TABLE 'SYMBOLS USED IN FINDING INFORMATION' (PERTAINS TO ARTICLE 11 ONLY)

12.1 TYPE OF FINDINGS

12.1.1 Conformity with the Radio Regulations (Regulatory examination)

The symbols used are the following:

FAVOURABLE Finding favorable with respect to RR11.31.

UNFAVOURABLE Finding unfavorable with respect to RR11.31.

12.1.2 Conformity with the procedures relating to coordination

The symbols used are the following:

FAVOURABLE Finding favorable with respect to RR11.32, as applicable.

UNFAVOURABLE Finding unfavorable with respect to RR11.32, as applicable.

12.1.3 Conformity with a world or regional Plan

The symbols used are the following:

FAVOURABLE Finding favorable with respect to RR11.34, as applicable.

UNFAVOURABLE Finding unfavorable with respect to RR11.34, as applicable.

12.1.4 Technical examination

The symbols used are the following:

FAVOURABLE Finding favorable with respect to relevant provisions of the Radio Regulations, or the appropriate Agreement, as indicated in the "Finding reference" below.

UNFAVOURABLE Finding unfavorable with respect to relevant provisions of the Radio Regulations, or the appropriate Agreement, as indicated in the "Finding reference" below.

12.2 INFORMATION ASSOCIATED WITH FINDINGS

12.2.1 Finding reference:

Reference to a provision of the Radio Regulations or an Appendix thereto or a Resolution of a World Radio Conference or a Regional Agreement

The symbols used are as follows:

Symbol	Description
GE75	This frequency assignment is either in conformity with the Plan adopted by the Regional Administrative LF/MF Broadcasting Conference (Regions 1 and 3), Geneva, 1975, or one for which the notifying administration has successfully applied the procedure prescribed in Article 4 of the Regional Agreement, Geneva, 1975. In relations between Contracting Members, all frequency assignments bearing this symbol are considered to have the same status, irrespective of the dates entered in the field 'Date of Entry in the Master Register'.
GE84	This frequency assignment is either in conformity with the Plan adopted by the Regional Administrative Conference for the Planning of VHF Sound Broadcasting (Region 1 and part of Region 3), Geneva, 1984, or one for which the procedure prescribed in Article 4 of the Regional Agreement, Geneva, 1984, has been carried out successfully.
GE89	This frequency assignment is either in conformity with the Plan adopted by the Regional Administrative Conference for the Planning of VHF/UHF Television Broadcasting in the African Broadcasting Area and Neighboring Countries, Geneva, 1989, or one for which the procedure prescribed in Article 4 of the Regional Agreement, Geneva, 1989, as revised by RRC-06-Rev.GE89 has been carried out successfully with the Administrations.

Symbol	Description
RJ81	This frequency assignment is either in conformity with the Plan adopted by the Regional Administrative MF Broadcasting Conference (Region 2), Rio de Janeiro, 1981, or one for which the procedure prescribed in Article 4 of the Regional Agreement, Rio de Janeiro, 1981, has been carried out successfully.
RJ88	This frequency assignment is in accordance with the provisions of the Regional Agreement for the Use of the Band 1 605 - 1 705 kHz in Region 2, Rio de Janeiro, 1988.
GE06A	This frequency assignment is in conformity with the analogue broadcasting Plan adopted by the Regional Radiocommunication Conference for Planning of the digital broadcasting service in parts of Regions 1 and 3, in the frequency bands 174-230 MHz and 470-862 MHz, Geneva, 2006.
GE06D	This frequency assignment is in conformity with the digital broadcasting Plan adopted by the Regional Radiocommunication Conference for Planning of the digital broadcasting service in parts of Regions 1 and 3, in the frequency bands 174-230 MHz and 470-862 MHz, Geneva, 2006.
GE06L	This frequency assignment is either in conformity with the List to existing assignments to other primary terrestrial services adopted by the Regional Radiocommunication Conference for Planning of the digital broadcasting service in parts of Regions 1 and 3, in the frequency bands 174-230 MHz and 470-862 MHz, Geneva, 2006, or one for which the procedure prescribed in Article 4 of the Regional Agreement, Geneva, 2006, has been carried out successfully.
RR8.5	This frequency assignment is the subject of an unfavorable Finding with respect to RR11.31. However, it is recorded in the Master Register in accordance with the provisions of RR8.5, namely, if harmful interference is actually caused to any station whose assignment is in conformity with the Radio Regulations, the station concerned must, on receipt of advice thereof, immediately eliminate this harmful interference.
RR----	The provision of the Radio Regulations indicated by the number following this symbol applies to the assignment.
ST61	This frequency assignment is either in accordance with the Plans adopted by the European VHF/UHF Broadcasting Conference, Stockholm, 1961, or one for which the procedure prescribed in Article 4 of the Regional Agreement, Stockholm, 1961, as revised by RRC-06-Rev.ST61 has been carried out successfully.
X/GE75	This frequency assignment is not in conformity with the Plan adopted by the Regional Administrative LF/MF Broadcasting Conference (Regions 1 and 3), Geneva, 1975, and the notifying administration has not successfully applied the procedure prescribed in Article 4 of the Regional Agreement, Geneva, 1975. Consequently, in accordance with the provisions of paragraph 3.5.4 of Article 4 of the Regional Agreement, the recording of this assignment in the Master Register has been made subject to the condition that no harmful interference will be caused by this assignment to frequency assignments in conformity with the Agreement.
X/RJ81	This frequency assignment is not in conformity with the Plan adopted by the Regional Administrative MF Broadcasting Conference (Region 2), Rio de Janeiro, 1981, and the notifying administration has not successfully applied the procedure prescribed in Article 4 of the Regional Agreement, Rio de Janeiro, 1981. The notifying administration having resubmitted the frequency assignment and having insisted on its reconsideration, its recording in the Master Register has been made subject to the condition that no harmful interference will be caused to frequency assignments in conformity with the Agreement. (See paragraph 5.4 of Article 5 of the Regional Agreement, Rio de Janeiro, 1981.)
X/----	This frequency assignment has been examined with respect to its conformity with a provision or Article of the Radio Regulations or an Appendix thereto or with a Resolution or a Regional Agreement and an unfavorable Finding was formulated. The provision, Article, Appendix, Resolution or Regional Agreement concerned is indicated following this symbol.
AP27/60	In examining the frequency assignment notice corresponding to this assignment, it was noted that either the peak envelope power exceeds the power limit specified in 27/60 of Appendix 27 to the Radio Regulations, or the mean effective radiated power exceeds the limits specified in 27/61. However, a favorable Finding was formulated with respect to 27/65 where applicable, and the assignment was recorded in the Master Register with a favorable Finding with respect to RR11.39A or RR11.39B. The attention of the notifying administration has been drawn to the provisions of 27/62 to 27/64. Should the Bureau receive any complaint of harmful interference from an administration, which is using the frequency concerned in accordance with the relevant provisions of the Allotment Plan, it shall investigate the matter and, if necessary, the previous Finding will be reviewed.
GE85M	This frequency assignment is either in conformity with the Plan adopted by the Regional Administrative Conference for the Planning of the MF Maritime Mobile and Aeronautical Radionavigation Services (Region 1) (Geneva, 1985) or one for which the procedure prescribed in Article 4 or Article 6 of the Regional Agreement adopted by that Conference has been carried out successfully.
GE85N	This frequency assignment is either in conformity with the Plan adopted by the Regional Administrative Conference for the planning of the Maritime Radionavigation Service (Radiobeacons) in the European Maritime Area (Geneva, 1985), or one for which the procedure described in Article 4 of the Regional Agreement adopted by that Conference has been carried out successfully, or one for which a favorable Finding was formulated following the examinations referred to in Article 6 of the same Agreement.
RS716	This frequency assignment is subject to Note 2 of resolves 1 of Resolution 716 (Rev.WRC-2000), which allowed the notification of typical stations according to the provisions of RR11.17 in the frequency bands governed by this Resolution until 1 January 2000.
X/AP26	This frequency assignment has no corresponding allotment in the Allotment Plan for the Aeronautical Mobile (OR) Service contained in Appendix 26 to the Radio Regulations. The Finding with respect to the conditions specified in Part III, Section II, paragraph 4 d) is indicated in the field ‘Technical examination’.

Symbol	Description
X/GE85M	This frequency assignment is not in conformity with the Plan adopted by the Regional Administrative Conference for the planning of the MF Maritime Mobile and Aeronautical Radionavigation Services (Region 1), Geneva, 1985 and is one for which the consultation procedure prescribed in Article 4 of the Regional Agreement adopted by that Conference has not been applied or has not been carried out successfully. This assignment is not entitled to any protection in relation to assignments that are in conformity with the Plan and must not cause any harmful interference to any such assignments.
X/GE85N	This frequency assignment is not in conformity with the Plan adopted by the Regional Administrative Conference for the planning of the Maritime Radionavigation Service (Radiobeacons) in the European Maritime Area (Geneva, 1985), and is one for which the consultation procedure prescribed in Article 4 of the Regional Agreement adopted by that Conference has not been applied or has not been carried out successfully.

12.2.2 Findings observation:

The symbols used are as follows:

Symbol	Description
H	This assignment shall be operated subject to not causing harmful interference to or claiming protection from the existing or planned assignments that conform with the relevant Plan or List (GE06L) indicated after the symbol X under Item 13B1 (finding reference) of this assignment, or the assignments of administrations for which no successfully completed coordination has been notified, and which are indicated under Item 11 (coordination information) after a reference to the relevant provisions.
Q	The favourable finding for this assignment, with respect to RR11.32 was based on earth station information submitted to the Bureau under the provisions of RR11.9. The finding may be reviewed if the Bureau receives a comment from another administration, within three years following the date of notification of this assignment, indicating that the concerned assignment was included in a coordination procedure initiated by this latter administration pursuant to RR9.15, RR9.17 and/or RR9.17A in respect to its earth station, and was not agreed to, or was agreed with different technical characteristics.
R	In accordance with the provisions of the Table of Frequency Allocations, the Appendix or the Resolution indicated in “finding reference”, the present assignment is to be operated subject to not causing harmful interference or, in the case of No. 5.316A, subject to not causing unacceptable interference to stations of (a) particular service(s) in the Region(s) or countries to which the finding reference applies.
S	The service indicated in class of station being secondary (RR5.28), this assignment is not taken into account when examining, with respect to the provisions of Article 11, an assignment pertaining to a primary service.
V	In accordance with RR23.8 of the Radio Regulations, this frequency assignment has a lower status with respect to the assignments to the broadcasting service within the Tropical Zone and within the bands listed in RR23.6.
X	This assignment, which should have been transferred to another frequency in accordance with a transfer procedure decided by a Radiocommunication Conference, was not acted upon by the concerned Administration and hence has been retained in the Master Register without a date in date of recognition (Date of Entry in the Master Register) and for information only.
Y	Pursuant to the provisions referred to in Finding Reference, this assignment is not taken into account when examining frequency assignments in accordance with the provisions of Article 11 of the Radio Regulations. The present assignment has been recorded or retained in the Master Register for information only.

12.2.3 Finding Action: (Date relating to a review to be made)

The symbols used are as follows:

Symbol	Description
A/....	This assignment is recorded in accordance with RR11.47 on a provisional basis before it is put into use. If the notifying administration has not confirmed the putting into use by the date indicated following this symbol, the assignment will be deleted from the Master Register.
C/....	The use of this frequency assignment is authorized until the date indicated under this symbol.
D/....	The Bureau has been informed that the use of this assignment, which is suspended, will resume on the date indicated against this symbol. At that date, the situation will be reviewed.
F/....	In accordance with the provisions of the Radio Regulations, which apply to the frequency band in which this assignment is situated (eg.RR11.41), this assignment will be reviewed on the date following this symbol.

CHAPTER IV

SECTION 13

13. TABLE 'REMARKS'

The following coded remarks of a general nature are used.

13.1 Remarks by the Bureau

E/....	The resubmitted notice concerning this assignment was received on the date indicated in this symbol.
N/....	The date indicated in this symbol is the date of receipt of the notice when, for any reason, this date is not recorded against the date of recognition.
T/....	The date indicated in this remark is the date on which the finding of this assignment was reviewed in accordance with RR14.1.
A/....	The present assignment was published in Part A of the Special Section (ST61) bearing the number shown after this symbol.
RPL.... MHz	The present assignment replaces that entered in the Plan (ST61) on the frequency indicated after the symbol RPL.

13.2 Coded remarks entered against assignments notified by a given administration, the country symbol of which forms part of the symbol representing the Remark.

Note: Only those symbols pertaining to terrestrial services are listed here.

ARS	**Kingdom of Saudi Arabia**
ARS1	Transmissions every hour, from H + 00 to H + 10 and from H + 35 to H + 45
AUS	**Australia**
AUS3	Transmission of oceanographic data from Nomad Buoy station (150° 00' E 40° 00' S)
AUS6	Postmaster General Monitoring centres
AUS24	This transmitter is located at Belconnen and is used for official correspondence with naval vessels under the call sign VHP and for the transmission of radiotelegrams addressed to ships of the British Common-wealth of Nations when the call sign VIX is employed. For the former (VHP) service the transmitter is keyed locally but in the case of the latter (VIX) it is keyed over landlines from Sydney. The radiotelegram service is part of the British Commonwealth area scheme and, as published in the ITU List of Coast Stations, the service is regarded as being provided by Sydney Radio
BEL	**Belgium**
BEL8	Transmissions each hour from H + 45 to H + 10
BEL9	Transmissions each hour from H + 15 to H + 40
BOL	**Bolivia (Plurinational State of)**
BOL1	On condition that no harmful interference is caused to Chile on 2 551.5 kHz
CHN	**China (People's Republic of)**
CHN2	The angular width of the main lobe of the antenna is normally 12 degrees with an antenna gain of 13 dB; however, it may occasionally be 25 degrees with a gain of 7.5 dB
CHN14	Transmissions at 0110 and 0710
CUB	**Cuba**
CUB1	The Administration of Cuba has indicated that the station bearing the identification number appearing after this symbol is operating on a higher power than that required to guarantee a national service of satisfactory quality and is causing harmful interference to the Cuban station against which this remark has been entered. Consequently, the Cuban Administration wishes to draw attention to its reservation in the International Telecommunication Convention of 1982 (State No. 69 of the Final Protocol)

F	**France**
F11	Paris and all Prefectures in France
F16	The characteristics are those of television system L except for the number of lines, which is 819
F18	Passive repeater in the direction of Nice
F25	Transmissions from 0445 to 0500, 0845 to 0900 and 1245 to 1300 (Regular hours of operation)
F30	Intermittent operation
F479	This station transmits time signals of the International Time Bureau and URSIGRAMS at 0900 and 2100
F481	This station transmits time signals of the International Time Bureau and URSIGRAMS at 0930, 1300 and 2230
G	**United Kingdom of Great Britain and Northern Ireland**
G2	The form of this entry has been amended so as to bring it into line with the prescriptions of Appendix 4 to the Radio Regulations. The notifying administration states that it should not be implied from this that there has been any change in the actual use of the assignment, which will continue to be used exclusively by British ships for working to United Kingdom coast stations and coast stations of other countries in Region 1, in accordance with Nos. RR52.210 - RR52.212 of the Radio Regulations
G4	This frequency is used by non-directional radio beacons (N.D.B) on oil installations in the United Kingdom (off-shore waters) oil concession areas west of 03° East and between 54° and 62° North
G18	Lifeboats, lighthouses and lightships
G19	Lightships, lighthouses
HOL	**Kingdom of the Netherlands**
HOL1	Transmissions each hour, from H + 00 to H + 15
HOL18	Station PCI carries out the service when station PCH, using the same frequency, is unable to do so
HOL56	The Netherlands Administration reserves the right to increase the power up to 200 kW
IRQ	**Republic of Iraq**
IRQ1	Transmissions each hour from H + 06 to H + 09 and from H + 33 to H + 39 (Regular hours of operation)
J	**Japan**
J6	On non-interference basis to India
MAU	**Mauritius (Republic of)**
MAU1	Station BIGARA transmits for approximately 20 minutes every 3 hours from 0030 to 1900 UTC
MDG	**Democratic Republic of Madagascar**
MDG1	Automatic transmission of seismo-graphic data
NOR	**Norway**
NOR3	Transmissions from 0900 to 1000, 1400 to 1500, 1900 to 2000 and 2300 to 2400
PAK	**Pakistan (Islamic Republic of)**
PAK3	Pakistan will consider using directional aerial system to reduce radiation in the direction of Vientiane in the event of harmful interference to it
PHL	**Republic of the Philippines**
PHL15	Transmissions from 2200 to 1400 on weekdays; from 2200 to 0900 on Sundays and holidays
S	**Sweden**
S26	Radiobeacon in rocket payload used for recovery reasons Maximum altitude of rocket is 20 km Transmission starts during the descent at the height of 6000 metres Estimated number of rockets: 15/year Operating time during descent: Maximum 10 minutes/rocket Operating time on ground: Maximum 32 hours/rocket Test transmissions from ground: 20 hours year
SDN	**Republic of the Sudan**
SDN1	This station operates from Khartoum by remote control lines to antenna at Omdurman
THA	**Thailand**
THA1	Transmissions at 0000, 0300, 0600, 0900, 1200, 1500 and 1800

TUR	**Turkey**
TUR1	Transmissions are made at the beginning of each hour
TUR2	Transmissions at 0530 and 1730
URG	**Eastern Republic of Uruguay**
URG2	Transmissions of fog signals, every 10 minutes, starting at H + 00
URG3	Transmissions of fog signals, every 10 minutes, starting at H + 05
USA	**United States of America**
USA3	Groups of dashes
USA4	Series of dots
USA14	In accordance with Nos. RR11.9 - RR11.11 of the Radio Regulations notice is given that this frequency also will be used by coast stations for the reception of ship stations
USA15	In accordance with Nos. RR11.9 - RR11.11 of the Radio Regulations notice is given that this frequency also will be used by land stations for the reception of mobile stations
USA31	Telegraphy only
USA41	In case of harmful interference to 2 255 kHz (Guadeloupe) mutual agreement will be reached covering the use of this frequency
USA48	In case of harmful interference to 2 830 kHz (Guadeloupe) mutual agreement will be reached covering the use of this frequency
USA62	Transmissions are made every three hours starting at 0000 UTC, from H + 70 to H + 120
USA63	Transmissions are made every three hours starting at 0000 UTC, from H - 30 to H - 5 and from H + 10 to H + 50
USA89/	(Identification number of interfering station) The United States has reported that the station bearing the identification number following the present symbol is operating at higher than notified power, at which level the United States reports that this station causes harmful interference to the United States station against which this remark appears. The United States accordingly notes its reservation to the 1982 International Telecommunication Convention (Protocol Statement 111)
USA90/	(Identification number of interfering station) The United States has reported that the station bearing the identification number following the present symbol is operating at higher than notified power and that it causes harmful interference to the United States station against which this remark appears; it would continue to do so if its power were reduced to the notified level. The United States accordingly notes its reservation to the 1982 International Telecommunication Convention (Protocol Statement 111)
USA91/	(Identification number of interfering station) The United States has reported that the station bearing the identification number following the present symbol is operating at the notified power and location and that is causes harmful interference to the United States station against which this remark appears. The United States accordingly notes its reservation to the 1982 International Telecommunication Convention (Protocol Statement 111)
USA92/	(Identification number of interfering station) The United States has reported that the station bearing the identification number following the present symbol is operating at lower than notified power and that it causes harmful interference to the United States station against which this remark appears. 123	This frequency assignment is made for the use of the embassy of a foreign country which has allocated the call sign
133	Used by the International Committee of the Red Cross (Resolution No. 10 of the World Administrative Radio Conference, Geneva, 1979)
199	Call sign not allocated or variable for security reasons, or other means of identification used
350	No value of frequency offset is indicated for this station, which is a low-power station as defined in paragraph 14 of the Final Acts of the European VHF/UHF Broadcasting Conference, Stockholm, 1961, as follows: "For the frequency bands between 41 and 230 MHz, a station having a maximum effective radiated power of less than 1 kW and for the bands between 470 and 960 MHz, a station having a maximum effective radiated power of less than 10 kW"
352/H2B	This station is equipped with a selective calling system using class of emission H2B (see No. 27/72A of Appendix 27)
353/…	This entry relates to a frequency assignment to a stratospheric station located in a fixed position at an altitude which exceeds 9999 metres. The altitude of the station is indicated in metres after the slant stroke.
354/…	The station to which this assignment refers to is located, in accordance with the Bureau's digital world map, outside the notifying administration's borders.
355/	This entry relates to a frequency assignment to a broadcasting station using a digital DRM (Digital Radio Mondiale) radio system on a provisional basis in accordance with Resolution No. 8 of the Regional Administrative LF/MF Broadcasting Conference (Geneva, 1975) and the Part A3-GE75 of the Rules of procedure.
DIST/	The information contained in this remark is given in the format "geographical area/distance" and indicates the ITU codes of the geographical areas being at a distance of less than 1000 km from the notified site of the terrestrial station, to the nearest points of the boundary of these geographical areas, followed by a stroke and the distance value.

CHAPTER V

Contents of the coordination data and explanation of the symbols used exclusively in remarks of the special Section St61

Symbols in Coordination data	Explanation
27/22 + list of geographical area symbols	This assignment has been notified under No. 27 of the Regional Agreement and is published in accordance with No. 28 of the Agreement. The notifying administration has stated that the proposed change is the result of consultation carried out under the provisions of Nos. 20, 21 and 22 of the Agreement and that the provisions of No. 22 have been satisfied with respect to the administration of each geographical area of which the geographical area symbol follows.
32/27 + list of administration symbols	This assignment has been notified under No. 32 of the Regional Agreement and is published in accordance with No. 28 of the Agreement. The symbol is followed, where appropriate, by the symbols of the administrations in respect of which the notifying administration has stated that the provisions of No. 32 have been satisfied.
Note 1: When symbol 27/22 or 32/27 is followed by #, this signifies that coordination has been effected under the terms of Article 4 with the administrations concerned in the European Broadcasting Area, within the framework of the adoption by those administrations of new frequency offsets in 1969	
27/24	This assignment has been notified under No. 27 of the Regional Agreement and is published in accordance with No. 28 of the Agreement. The notifying administration has stated that the proposed change is being effected under the provisions of No. 24 and either No. 25 or No. 26 of the Regional Agreement.
AN.1	The provisions of the final paragraph of Annex 1 to the Regional Agreement apply to the present assignment (transmitting antenna effective height greater than 1 200 m or no limiting distance appearing in the tables).
Note 2: Provisions 19 to 28 of the Agreement revised by RRC-06-Rev.ST61 are applicable for frequency bands 47-68 MHz and 87.5-100 MHz. Provisions 29 to 32 of the Agreement revised by RRC-06-Rev.ST61 are applicable for the frequency band 162-170 MHz.	
PLAN	The symbol PLAN means that the assignment remains unchanged from that appearing in the adopted Plan, Stockholm, 1961.
LLP	The symbol LLP means that the assignment remains unchanged from that appearing in the List of Low Power Broadcasting Stations.
ST61X	By this symbol attention is directed to a remark to be found in Annex 2, Chapter 2 of the Regional Agreement for the European Broadcasting Area, Stockholm, 1961 (Plans for the Assignment of Very High Frequencies and Ultra High Frequencies to Broadcasting Stations in the European Broadcasting Area), for the assignment concerned. The explanation of this remark is given in Chapter 3, paragraph 5 of the said Annex 2 (pages 290 to 294 of the Final Acts of the European VHF/UHF Broadcasting Conference, Stockholm, 1961).

CHAPTER VI

Table of frequencies prescribed by the Radio Regulations (RR) for common use by stations of given service(s)

The Table appearing hereunder lists, in accordance with RR11.13, all the frequencies, which are prescribed by the Radio Regulations (RR) for common use by stations of a given service. Such frequencies appear in the Master Register and in the International Frequency List with symbol 'XAA' or 'XAX' (see Tables 'Standard defined areas') in field 'geographical or standard defined area' (see RR20.5). The purpose of the present Table is to indicate in detail the conditions in which the common use is prescribed in the RR and the services to which they apply, with appropriate reference to the relevant provisions.

When several frequencies are specified for the same common use in a given frequency band, only the band(s) in which they are situated are stated, with appropriate reference to the provision or table where they are defined in the RR.

The frequencies intended for use in the Global Maritime Distress and Safety System (GMDSS) are also included in this Section. The full list of distress and safety frequencies, which are subject to protection, is given in Tables Nos. 15-1 and 15-2 of Appendix 15.

Frequencies prescribed by the RR for common use by stations of a given service. In accordance with 11.13, such frequencies are not to be notified.

No.	Prescribed assigned frequency (or band in which it is situated)	Prescribed common use	Relevant provisions of RR
		(kHz)	
1	410	Worldwide frequency for radio direction-finding in the maritime radionavigation services.	RR5.76
2	455.5	International frequency for digital selective calling (DSC), used by coast stations.	RR52.119 RR52.153 RR54.2
3	458.5	International frequency for DSC, used by ship stations.	RR52.120 RR52.149 RR54.2
4	2 046.4 (Carrier frequency: 2 045)	International (Region 1) ship-to-shore working frequency for ships making international voyages.	RR52.204 RR52.205
5	2 049.4 (Carrier frequency: 2 048)	International (Region 1) intership frequency for ships making international voyages.	RR52.206 RR52.207 RR52.208
6	2 170.5	International frequency for selective calling using the SSFC System.	RR54.2
7	2 174.5	Worldwide frequency for distress and safety traffic by narrow-band direct-printing (NBDP) telegraphy.	RR5.110 AP15, Table 15-1
8	2 177	International frequency for DSC, used by coast stations. This frequency can also be used for DSC, by ships, for intership calling only.	RR52.132 RR52.136 RR52.153 RR54.2
9	2 183.4 (Carrier frequency:2 182)	Worldwide distress and calling frequency for radiotelephony. This frequency can also be used for vital navigational warnings. 2 182 kHz, international frequency for search and rescue operations concerning manned space vehicles. 2 182 kHz, GMDSS frequency for distress and safety traffic by radiotelephony. 11	2 189.5	International frequency for DSC, used by ship stations.	RR52.131 RR52.149 RR54.2
12	2 636.4 (Carrier frequency: 2 635) 2 639.4 (Carrier frequency: 2 638)	International (Regions 2 and 3) intership frequencies for ships on international voyages.	RR52.215

No.	Prescribed assigned frequency (or band in which it is situated)	Prescribed common use	Relevant provisions of RR
		(kHz)	
13	3 024.4 (Carrier frequency: 3 023)	Worldwide frequency for use by stations of the aeronautical mobile (R) and (OR) services as laid down in Part II of Appendix 27 to the RR and by stations of the maritime mobile service engaged in coordinated search and rescue operations. 3 023 kHz, international frequency for search and rescue operations concerning manned space vehicles.	RR5.111 RR5.115 AP15, Table 15-1 AP27/219, 232
14	4 126.4 (Carrier frequency: 4 125)	Worldwide calling frequency for use by ship single-sideband radiotelephone stations. Worldwide frequency to be used to supplement frequency 2 182 kHz for distress and safety purposes and for call and reply. 4 125 kHz, GMDSS frequency for distress and safety traffic by radiotelephony. In the United States, also authorized for common use by coast and ship stations for single-sideband radiotelephony on a simplex basis, provided the peak envelope power of such stations does not exceed 30 dBW. Also authorized for common use by coast and ship stations for single-sideband radiotelephony on a simplex basis for call and reply purposes, provided the peak envelope power of such stations does not exceed 30 dBW. The use of these frequencies for working purposes is not permitted. Further authorized for common use by coast and ship stations for single-sideband radiotelephony on a simplex basis for distress and safety traffic. Also used by aircraft stations to communicate for distress, urgency or safety purposes with stations of the maritime mobile service transmitting and receiving class J3E emissions. 4 125 kHz, international frequency for selective calling by coast stations using the SSFC System. 59	16 421.4 (Carrier frequency: 16 420)	GMDSS frequency for distress and safety communications by radiotelephony. Also authorized for safety-related calling limited to that to and from rescue coordination centres.	RR5.145 RR52.221 RR52.221A RR52.221.3 AP15, Table 15-1 AP17, Part B RES 352 (WRC-03)
60	(16 528 – 16 549)	Worldwide frequencies for use by ship and coast single-sideband radiotelephone stations by simplex (single frequency) operation and for intership cross-band (two-frequency) operation. Carrier frequency 16 537 kHz is the preferred frequency for calling purposes, by ships.	RR52.221A RR52.227 RR52.228 AP17, Parts A, B
61	(16 549 – 16 617)	Worldwide working frequencies for ship stations equipped for wide-band telegraphy, facsimile and special transmission systems.	AP17, Part A
62	(16 618.75 – 16 683.25)	Working frequencies to be used by ship stations using A1A Morse telegraphy. Can also be used by aircraft stations for the exclusive purpose of communication with stations of the maritime mobile service.	AP17, Parts A, B
63	16 695	Worldwide frequency for distress and safety traffic by NBDP telegraphy.	RR5.110 AP15, Table 15-1
64	(16 733.75 – 16 738.75)	Frequencies to be used by ship stations for A1A Morse telegraphy calling.	AP17, Parts A, B
65	(16 784.75 – 16 804.25)	Frequencies to be used by ship stations for NBDP telegraphy (non-paired).	AP17, Parts A, B
66	(16 804.25 – 16 806.25)	International frequencies for DSC, used by ship stations. 16 804.5 kHz, GMDSS frequency for distress and safety calling using DSC techniques.	RR5.109 RR52.149 RR54.2 AP15, Table 15-1 AP17, Part A

94	26 173.4 (Carrier frequency: 26 172)	Worldwide calling frequency for use by coast single-sideband radiotelephone stations. 26 172 kHz, international frequency for selective calling by coast stations using the SSFC System.	RR52.222 RR54.2 AP17, Part B
		(MHz)	
95	75	Worldwide frequency assigned to aeronautical marker beacons.	RR5.180
96	121.5	Aeronautical emergency frequency. Used for distress and urgency purposes for radiotelephony by stations of the aeronautical mobile service using the band between 117.975 and 137 MHz. May also be used for these purposes in survival craft stations and emergency position-indicating radiobeacons and by mobile stations of the maritime mobile service (class A3E emissions) for the exclusive purposes of distress and urgency with stations of the aeronautical mobile service. International frequency for search and rescue operations concerning manned space vehicles.	RR5.111 RR5.200 AP15, Table 15-2
97	123.1	Aeronautical frequency auxiliary to the aeronautical emergency frequency 121.5 MHz. May also be used by mobile stations of the maritime mobile service (class A3E emissions) and by other mobile and land stations for coordinated search and rescue operations with stations of the aeronautical mobile service.	RR5.200 AP15, Table 15-2
98	156.3	Worldwide frequency to be used for communication between ship stations and aircraft stations, using class G3E emission, engaged in coordinated search and rescue operations. May also be used by aircraft stations to communicate with ship stations for other safety purposes.	RR30.11 AP18, note f)

100	156.8	International distress, safety and calling frequency for the maritime mobile VHF radiotelephone service (class G3E emissions). May also be used for selective calling (SSFC System) in the coast-to-ship and intership directions. International frequency for search and rescue operations concerning manned space vehicles and by aircraft stations for safety purposes only.	RR5.111 RR5.226 RR30.11 RR54.2 AP15, Table 15.2 AP18
101	161.975	Worldwide frequency used by automatic identification systems (AIS) for search and rescue transmitters (AIS-SART) in search and rescue operations. May also be used by aircraft stations for search and rescue operations and other safety-related communications. Additionally may be used in the mobile-satellite service (Earth-to-space) for the reception of AIS transmissions from ships.	RR5.227A AP15, Table 15-2 AP18
102	162.025	Worldwide frequency used by automatic identification systems (AIS) for search and rescue transmitters (AIS-SART) in search and rescue operations. May also be used by aircraft stations for search and rescue operations and other safety-related communications. Additionally may be used in the mobile-satellite service (Earth-to-space) for the reception of AIS transmissions from ships.	RR5.227A AP15, Table 15-2 AP18
103	243	Worldwide frequency for use by survival craft stations and equipment used for survival purposes. International frequency for search and rescue operations concerning manned space vehicles.	RR5.111 RR5.256
104	1 544 – 1 545	Worldwide frequency in the mobile-satellite service (space-to-Earth) for distress and safety communications.	RR5.356 AP15, Table 15-2
105	1 645.5 – 1 646.5	Worldwide frequency in the mobile-satellite service (Earth-to-space) and for inter-satellite links for distress and safety communications.	RR5.375 AP15, Table 15-2
