ITU Workshop on "Security Aspects of Blockchain" (Geneva, Switzerland, 21 March 2017)

Session 5
Panel discussion – Future directions on blockchain standardization activity

Moderator
Heung Youl Youm
ITU-T SG17 Chairman

Geneva, Switzerland, 21 March 2017

Security Standardization Challenges

- Objectives
  - highlight diverse aspects and standardization efforts on blockchain in international standards bodies;
  - identify potential items that ITU-T SG17 needs to analyze/review/standardize;
  - identify stakeholders with whom SG17 will collaborate in the future; and
  - discuss potential ways forward for ITU-T SG17 to work.

Geneva, Switzerland, 21 March 2017

Panelists for session 5

- FIDO alliance: *Blockchain and Biometrics*, **Rolf Lindemann**, Nok Nok

- OASIS: **Abbie Barbir**, Aetna

- ISITC Europe: **Gary Wright**, Interim Leader of Blockchain DLT Working Group (To be confirmed)

- UK DLT/1: **Gilbert Verdian**

Roundtable

- What do you see as the benefits and challenges of cooperation and collaboration among international standards organizations?

- Which stakeholders should ITU-T SG17 collaborate with in the future?

- What are the potential items that ITU-T SG17 needs to study?

- What are the ITU-T SG17's ways forward in studying security aspects of blockchain?

Geneva, Switzerland, 21 March 2017
