Title: Standardization activities in OCF

Abstract

OCF(Open Connectivity Foundation) is an one of promising standardization body driven by leading companies in the industry. It was founded in September 2014 with 4 founder members such as Samsung, Intel, Cisco and MediaTek. In 2015 and 2016, UPnP and Allseen Alliance were merged into OIC(the former OCF) respectively and Its membership is more than 430 by 2018. The presentation briefly covers the followings: Overview of OCF, OCF basic principles, New features of the latest OCF specs(OCF 2.0) and Upcoming features of the future OCF specs.
