

Title: AI in 5G security

Abstract:

As a newly emerging technology, AI technology becomes to the hot topic in telecommunication domain. Currently, for 5G network, AI relevant researches include in the end user service experience improvement, automatic network operation, data analysis etc., the AI in the 5G security is still in the initial stage.

In this presentation, the topics on the what AI can do for the 5G network security will be discussed.

It includes AI in 5G typical service security, AI in 5G network security, and also AI in the network element security.
