

Stablecoin and Micropayment for the Real World

How to Utilize everiToken and everiPay Solution

Stablecoin for Micropayment based on everiToken

01

everiPay

- 3 second transaction confirmation with high security;
- Instant liquidation, tamper-proofing;
- Free to upgrade the software without needs to upgrade hardware; the lowest promotion cost
- Public agreement allow anyone to integrate with lowest entrance threshold,

02

everiCard

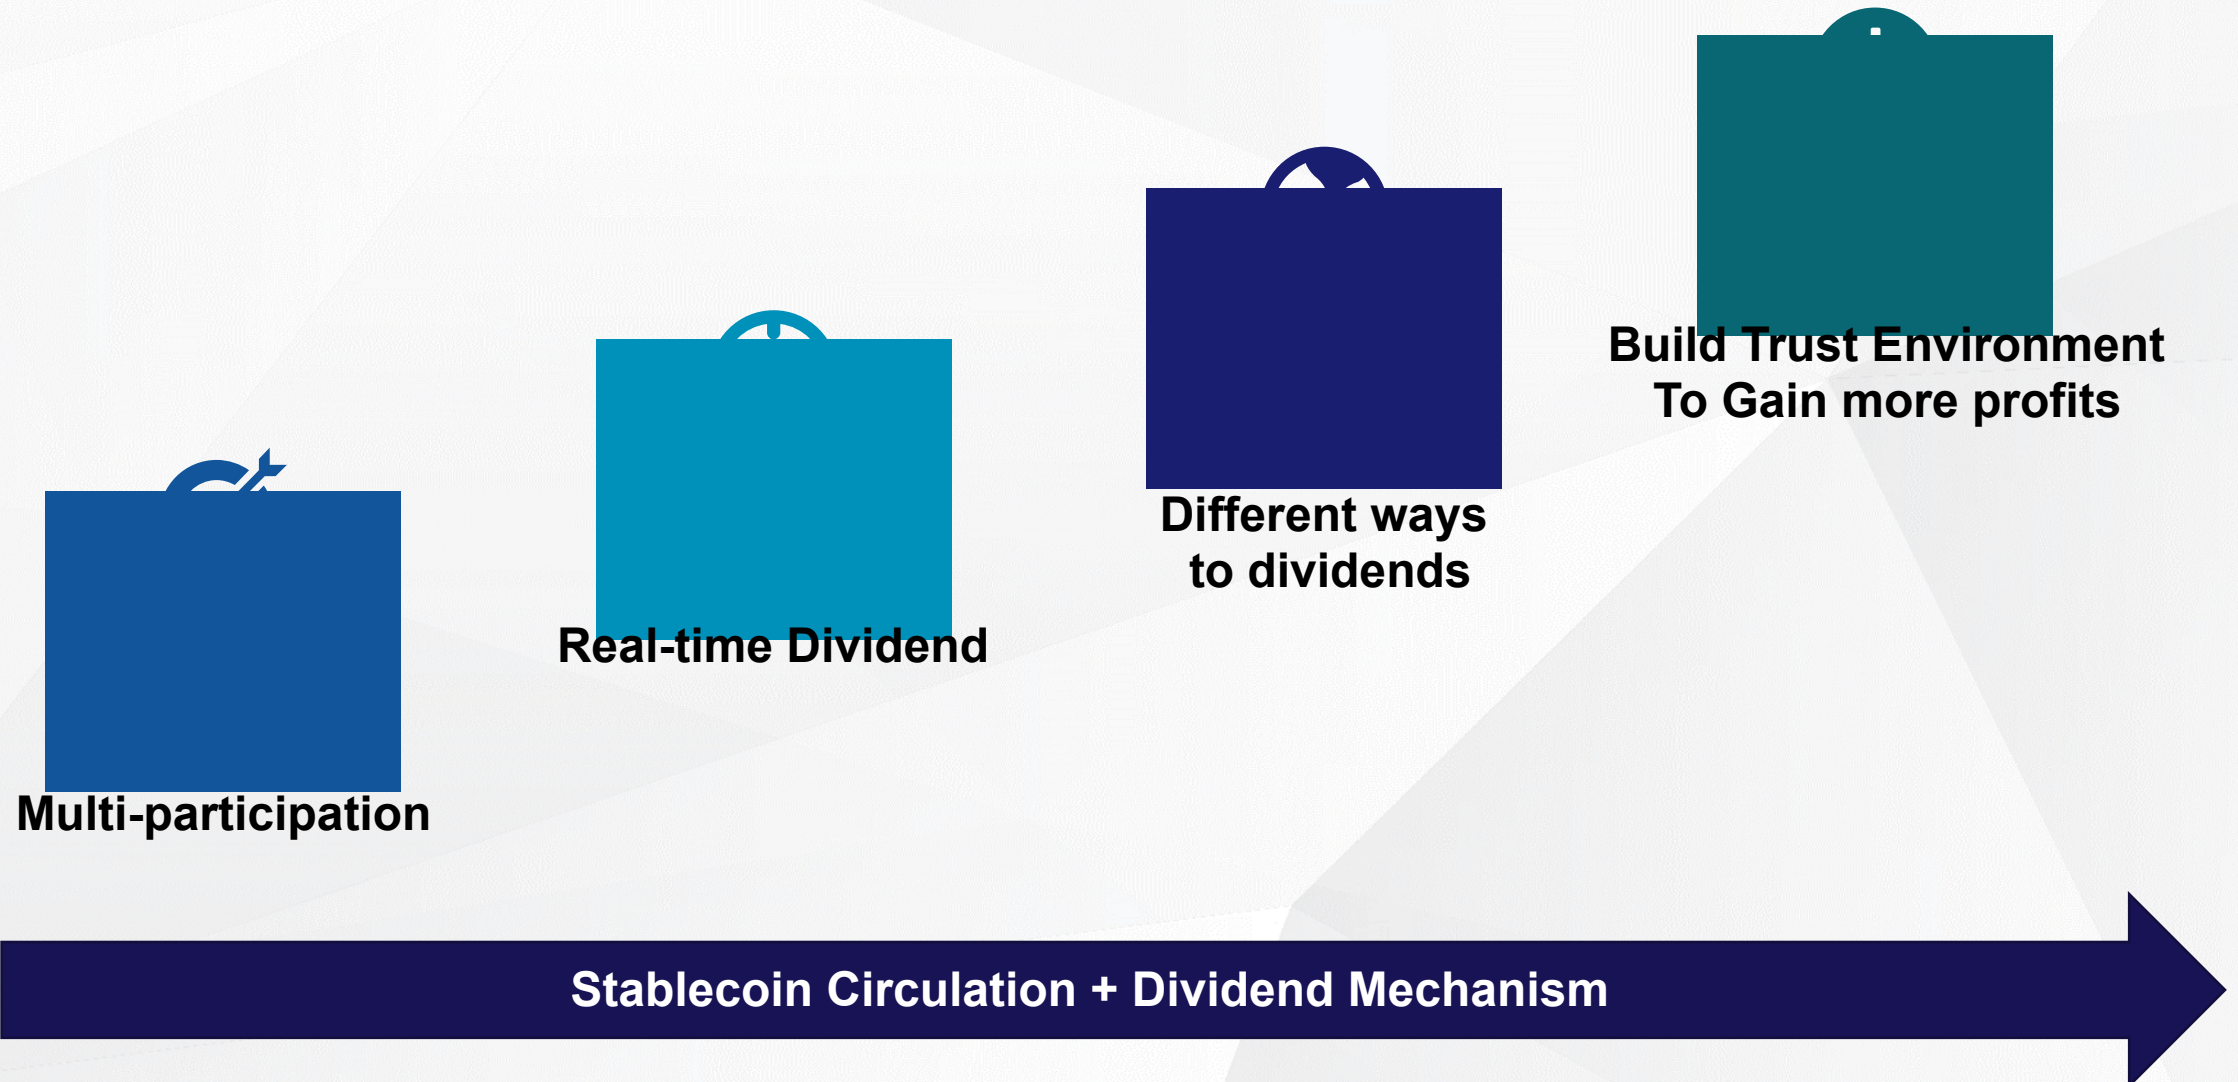

- Access to any hardware without any modifications.
- Supporting everiPay® payment protocol for lightening payment experience;
- Supports automatic dividend;
- Support for storage and payment of all tokens issued based on the everiToken®

Details About Dividend Mechanism

By the **bonus feature** provided by the everiToken, transaction fees can be charged by their own token. And all the fees will distributed later on the chain according specific rules to make it fair.

In this way, business side can build a trust environment for strange business side, which can attract more untrusted parties.
