

**Title of the presentation:** The Accessibility Systems in ITU-R SG6 for broadcast delivery

**Abstract:** New production, exchange and distribution technologies continue to make the goal of the United Nation Convention on the Rights of Persons with Disabilities - to enable equal access to the media, possible and practical. The intention of the session is to present the current work of ITU-R Study Group 6 and its Working Parties and to discuss the future direction of work to continue to improve media access for all.
