METAVERSE WORKSHOP

**18.10.2022**

FG-DLT: 2019

# KRON is a sustainable [worldview operating system] responding to the era of Third World

- The beginning of an era where the real and virtual worlds are fused and aim for a new value of life
- The era of super-sensibility in which the concepts of art and culture, technology and science, time and space are re-established

| Section | First World | Second World | **Third World** |
|---|---|---|---|
| | Real experience in real space | Interesting, but fictional, virtual experience | Fusion of reality and virtual |
| The relationship between virtual and reality | Only reality-oriented | Choice of virtual and real | Virtual + Reality |
| Experience | Real life experience | Separation of virtual experiences on the basis of real experiences | Fusion of real life and virtual experience |
| The location of the experiencer | Matched | Separated | Matched |
| Remote/Present | Present | Present/Remote | Powerful presence |
| Time experience | continuing | Separation/Continuing | Boundary blur/Continuing |

Advent of the era of a high-touch concept metaverse where the perspective of life and reality are fused in a high-tech virtual reality, which is a technological perspective and advanced technological meaning

Kron is not a simple development product realized by advanced technology, but a worldview that can aim for a sustainable life by linking emotional action with humanity and a community concept.
