

e&'s Commitment to Sustainability and Climate Action

Energy Optimization Solution

Renewable Energy Solutions

Lowering GWP Gas

- e& pledged to attain **net zero Scope 1 and 2** emissions for its group operations in the United Arab Emirates **by 2030**.
- Reduce its carbon footprint, through enhanced **energy efficiency** and the adoption of **renewable energy** sources.
- e& has accelerated energy efficiency programs and managed multiple initiatives to reduce greenhouse gas emissions.
- e& is now recognized as '**Committed**' to the near-term science-based targets

e&'s Impact and Future Plans

e& is embarking on a progressive roadmap to drive forward its sustainability initiatives that have a positive human impact on future plans and operations

Deployment of Renewable Energy Solutions

Network Energy Optimization

Replacement of banned refrigerants

Offloading of legacy networks

Integration of Artificial Intelligence

Deployment of energy efficient equipment

Fleet vehicles transformation to Hybrid

Lower GWP refrigerant gasses

e&'s Role at the 28th UNFCCC Conference (COP28)

- e& announced as 'Principal Technology Partner' at COP28.
- e& supports COP28's ambitious agenda.
- e& preparations for COP28 event.
