

# ITU-T SG16 Activities Related to Accessibility

Masahito KAWAMORI

Rapporteur

Q26/16 (Accessibility)

Telecommunication Standardization Sector  
ITU

---

# Introduction to SG16 and Accessibility

- Lead group for multimedia such as audio, video etc.
- Well-known standards such as H.264 and H.265 (HEVC)
- Question 26 is tasked with ICT Accessibility
- Close collaboration with other bodies such as WHO and ISO/IEC
- Recommendations implemented and in wide use

# ITU-T SG16

## 3-time Emmy Award Winner

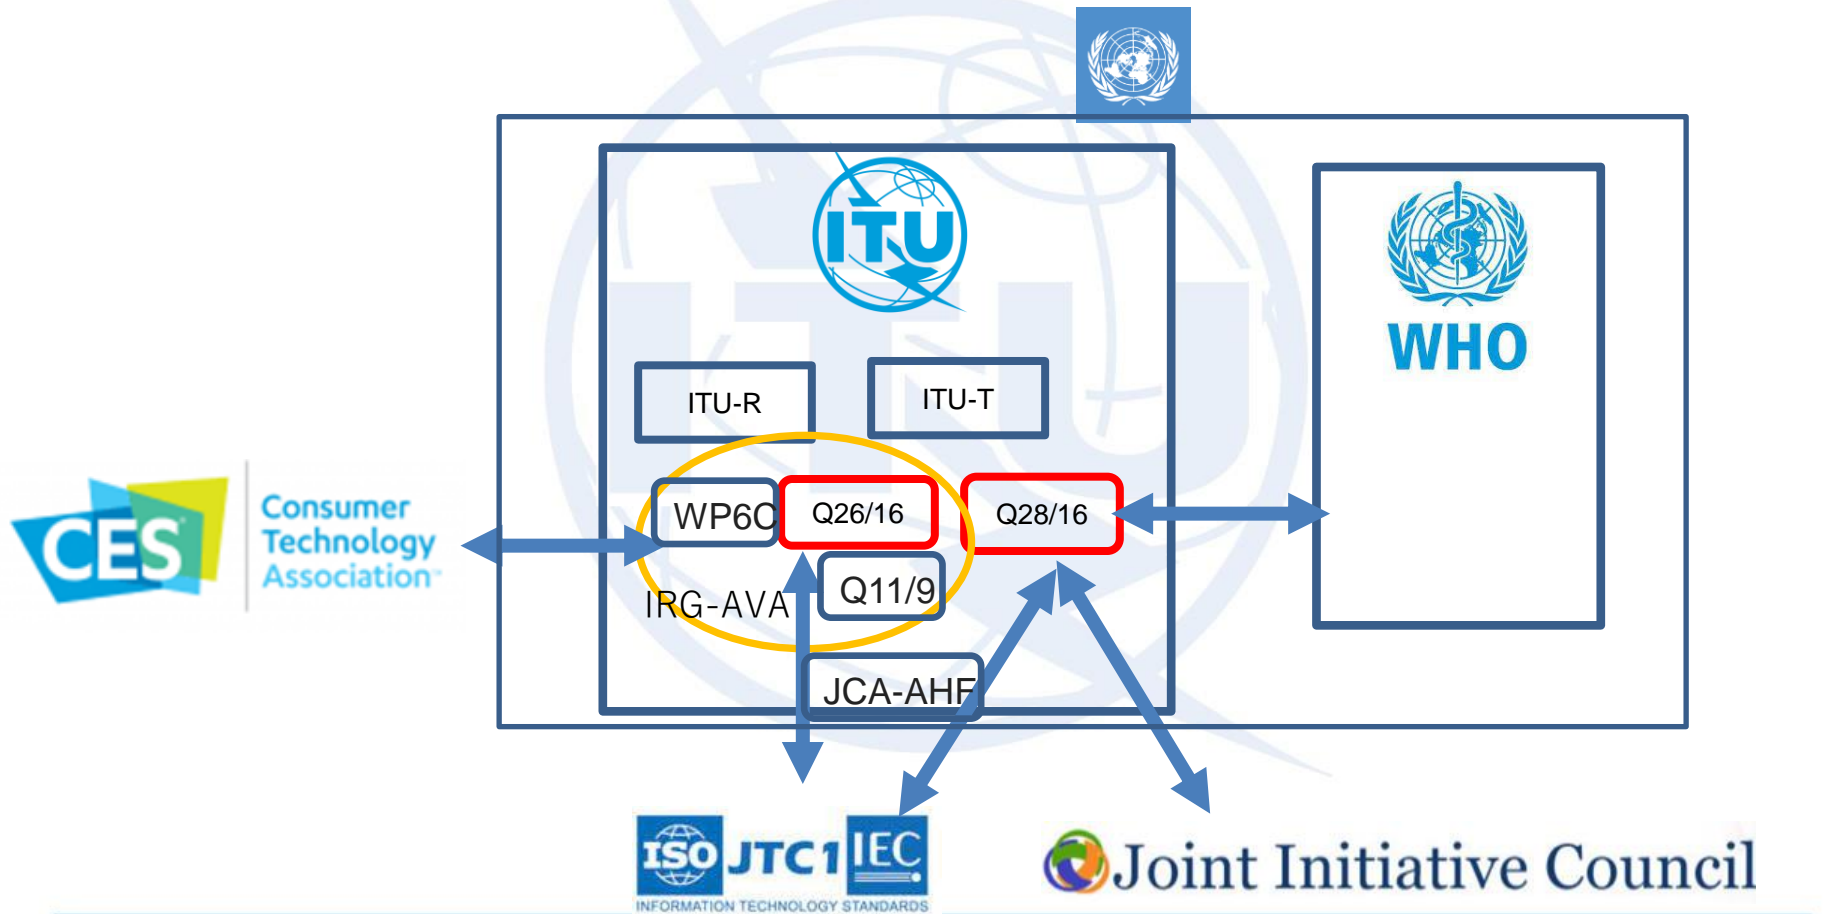

- H.264, H.265 (HEVC) and JPEG (T.851), used world-wide, are 3 of the well-known standards from ITU-T SG16.
- ITU-T received 3 Emmy awards for these standards.

## SG16 Collaboration with other Groups

---

# Some Standards and Work Items Accessibility

- Some of the Recommendations Q26/16 has developed are presented below
- Adapted as US National standard ANSI/CTA-2076, titled "Inclusive, Audio-based, Network Navigation Systems for All Persons including those Who are Blind/Low Vision".

# F.930: Video Relay Service (VRS)

# F.921: Audio-navigation for Visually Impaired

- Used in London Underground;
- Also implemented in New York, Sydney, etc.
- Adapted as US National standard **ANSI/CTA-2076**, titled *"Inclusive, Audio-based, Network Navigation Systems for All Persons including those Who are Blind/Low Vision"*.

# H.702: Accessibility Profiles for IPTV

- Defines accessibility features like closed caption, closed signing, etc. on IPTV
- Implemented in IPTV and set-top box in the global market

# H.702: Accessibility Profiles for IPTV

- Defines accessibility features like closed caption, closed signing, etc. on IPTV
- Implemented in IPTV and set-top box in the global market

---

# Work on Accessibility in Metaverse

- presents ways in which to integrate accessibility products and services in a sustainable and energy efficient metaverse for people with diverse access needs.
- It covers a range of guidance for making the metaverse sustainable and accessible.
- Q26 is expected to develop more standards on accessible metaverse

---

# Collaboration with ISO/IEC JTC1

- SG16 is closely working with ISO/IEC JTC1 on Accessibility
- It has produced some “twin text” Recommendations/Standards with them:
  - T.701.21 **"Guidance on audio description"**
    - (twin of *ISO/IEC TS 20071-21:2015*)
  - T.701.25 **"Guidance on the audio presentation of text in videos, including captions, subtitles and other on-screen text"**
    - (twin of *ISO/IEC TS 20071-25:2017*)

### WHO-ITU global standard for accessibility of telehealth services

1 January 2022 | Publication

WHO-ITU Global standard for  
accessibility of telehealth services

#### Overview

Telehealth is a service that has been widely applied in many countries for decade now. During the Covid-19 pandemic, the use of telehealth services has increased substantially in many countries, becoming a basic need for the general

- ITU and WHO jointly developed a global standard for accessibility of telehealth

- Several governments, including India, have shown interest in adoption.

---

# Video Presentation by WHO

- Mr Kaloyan Kamenov, WHO, will present ITU/WHO joint Global Standard
- “Accessibility of Telehealth Services”

- 
- Thank you
