# France Identité

Gardez la maîtrise de vos données

The “**France Identité**” application, supported by an interministerial program and developed by **France Titres**, the national secure documents agency, enables **French citizens of legal age** with a “credit card” format identity card to **create a digital identity** enabling them to **access public services via FranceConnect**, **import their driver's license**, **generate a single-use proof of identity**, and **present their identity face-to-face**.

This initiative is part of France's drive to offer **digital identity services** and **simplify their use**.

4 005 000+

eID created

Throughout mainland and overseas territories.

750 000+

eID with LoA high

After visiting the town hall.

9 976 000+

Authentications on FranceConnect

To access public services.

1 100 000+

Driving licenses issued

With legal equivalent to the physical document.

# The EUDI Wallet centers around physical persons

A trusted, secure, and user-centric tool

## Digital cards related to other activities

« Pivot » identity

# Three categories of use

1

## Online

access eGov services, authenticate, share ID data

2

## In person

get your identity or mDL verified

3

## Attestation

use a PDF file to prove your identity for services

# Some examples

1

Online

2

In person

3

Attestation

# Online authentication

Use your ID card to authenticate yourself and access online services

- 1-click authentication with your personal code
- Access sensitive services with a second authentication factor on the application

With FranceConnect  
and  
FranceConnect+

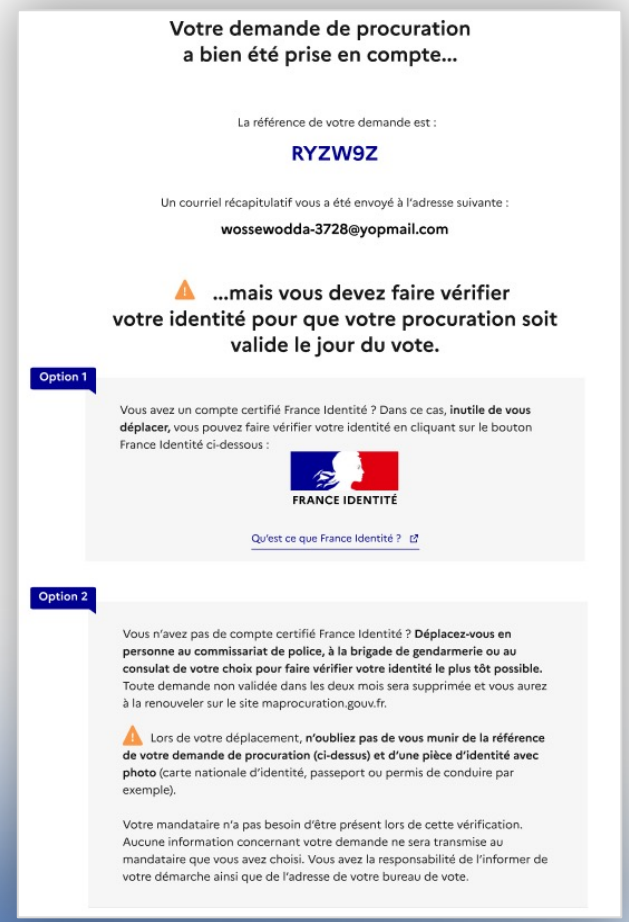

Creation of account  
within application  
carte Vitale

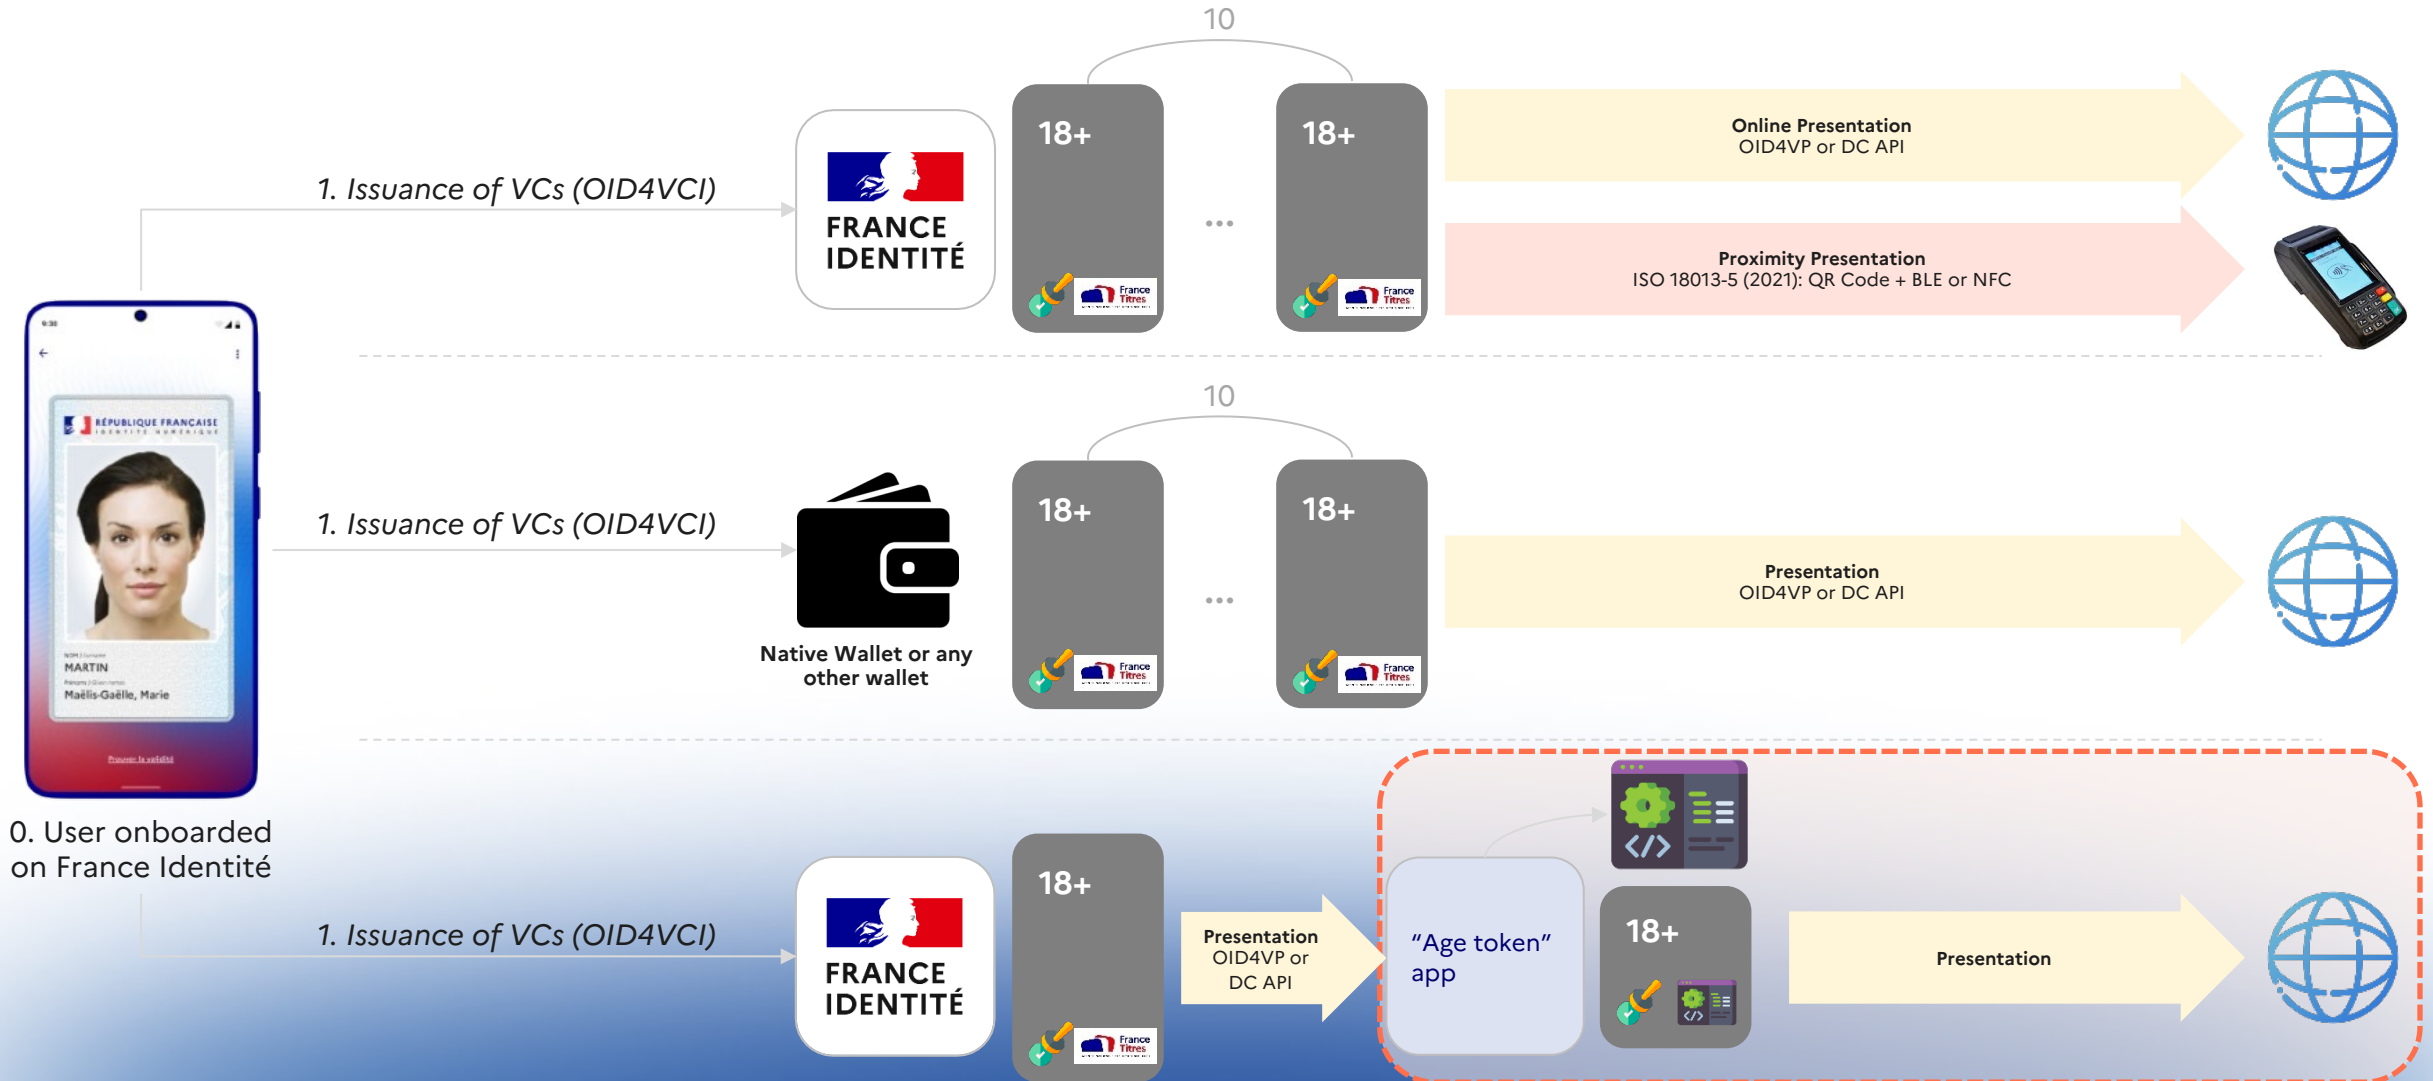

# Fully online proxy assignment for elections, no in-person visit required

With a digital identity certified by the local authority, the user can grant a proxy online

# Three complementary approaches to facilitate age verification adoption

Can be "proprietary" means through a contract between the age token app and the platform

# Status on supported protocols\*

# The single-use proof of ID

Remote proof of identity

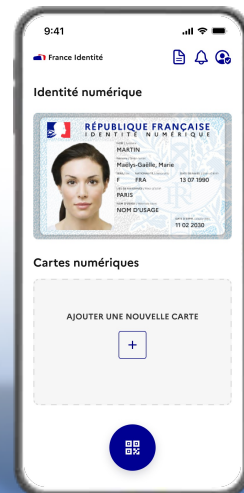

- Replace photocopies of titles
- Securing routine administrative files
- Defining a framework for use

# Present your identity when travelling by train

Prove your identity face-to-face with a QR code

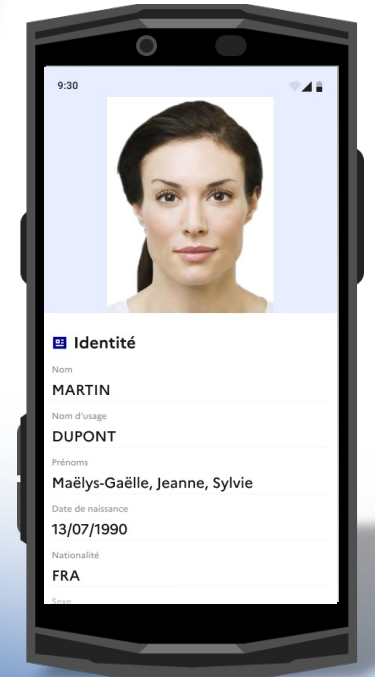

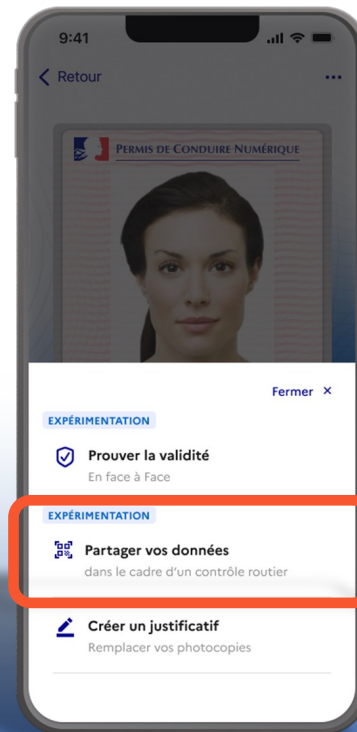

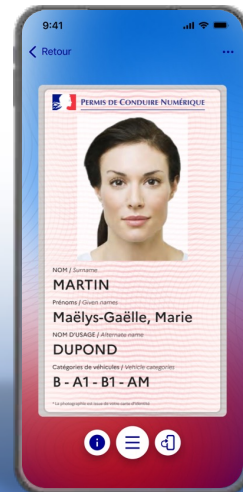

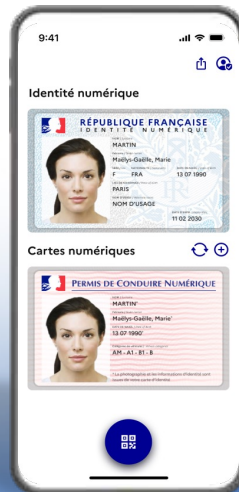

- Proving the authenticity of France Identité
- Proving your identity
- Without network access

# Presenting your mobile driving license

For road checks by police forces

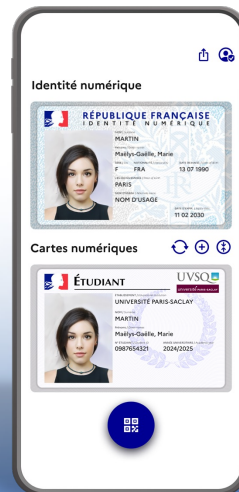

- Proving the authenticity of France Identité
- Passing on your identity
- Transferring driving rights

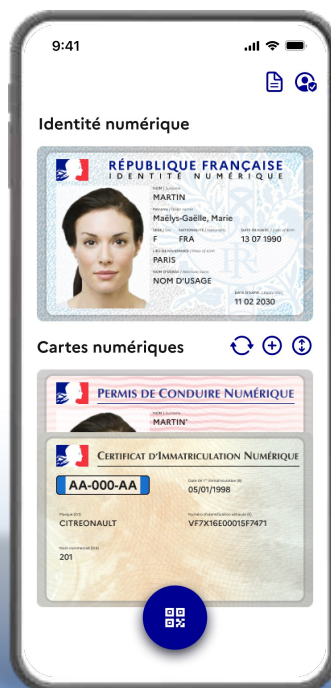

# Present your status

For a fee reduction

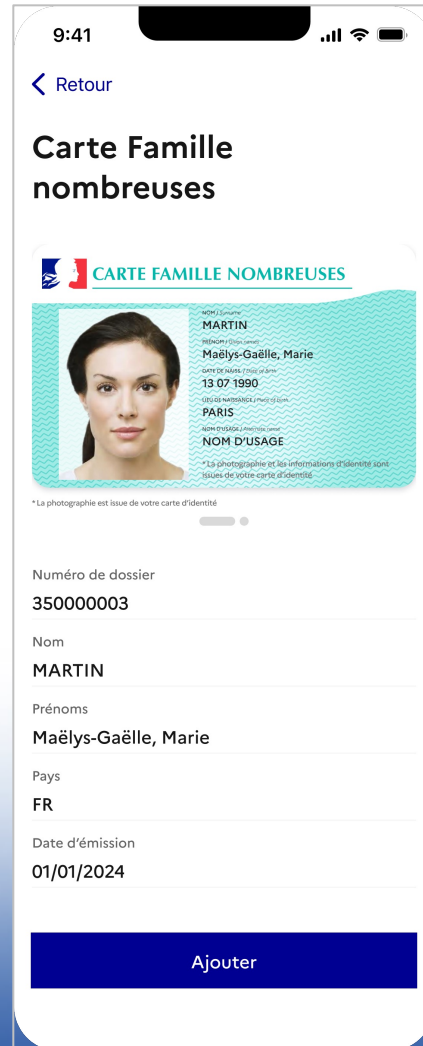

- Prove the authenticity of the data
- Transmit a status
- Pay with a deduction fee
